Thread: [Help with the new Malware Bytes version](#)

King of Clubs - May 6, 2014, 8:12 am

Hey guys. I don't really like the new Malware bytes version.

I just have a quick question.

How do I scan single files with the new update ?

Aura - May 6, 2014, 8:16 am

Right-click on the file and select "Scan with Malwarebytes" ?

That option isn't available anymore after I updated.

In under the Settings Tab, and under General Settings make sure that "Explorer context menu entry" is set to "Yes".

No problem buddy, glad that I could solve your issue ?

Have a good day !
