He already gave me a vouch copy to test the product and I can say it works great.

I went on 3 random servers to test the item spawner and on each one it worked without a hitch. While you do have to be concious of infistar, its not something to give a second thought about when purchasing this product.

A great item for sale here. Good luck with sales!

Sold copies : 6/15

Hello and welcome, the reason I made this thread today is to offer my private DayZ MOD Item spawner to the members of Hackforums! Are you also tired from having to buy new keys every day? So was I! so my friend and I coded a hack for ourselves! This hack has been up and running undetected for over 3 months now! I myself use the hack every week on a legit key and have had 0 bans! This works on all mods and works through all antihacks EVEN infiStar! This hack can spawn every item in the server database!

To obtain this hack you can PM me or use the autobuy! If you want proof first we understand that! PM me and I will answer ASAP!

PRICE \$25 FOR A LIMITED TIME!

Let me know if you are still considering vouch copies, otherwise I might just have to buy this. Seems pretty good.
