Thread: [\[Tutorial\] Steam Guard "Bypass"](#)

UnDuLaaTTi - May 6, 2014, 1:11 pm

Tutorial [\(Click to View\)](#)

Step by step [\(Click to View\)](#)

It will take you 20 seconds to say thank you.
Remember to say thanks.

Not bad, creating a whole website might be exhausting but if you got like 50 victims like this then it would be really smart!

Yep. I have also received many accounts by sending them the message box in which I put their password. ?

Storm- - May 6, 2014, 2:03 pm

Nice guide.. But if you had a keylogger installed wouldn't you already have their steam password?

Yes, but you need his email address & email password. And when your victim change his steam password, you will get:

- New steam password
- Email address
- Email password

Before victim do that, you only know:

- Steam account
- Steam password

You can't bypass Steam Guard, if you don't know email address & password. ?

Ah I see!

Sorry if I sound rude again, and I don't mean to be, but could you just clear saved passwords for their internet browser so they would have to relogin using their email and password? Or is steam an application itself?

(Sorry, I don't know what steam is and I'm too lazy to Google it :p)

There is a application version of Steam, which is primarily used. There is also a website for it. In the end you can just key log and get the e-mail username and password without them knowing about anyone having their password.

x34c - May 8, 2014, 8:20 pm

If you have them keylogged, you have there email.. this tutorial is not very good but +1 for effort I guess.

Private Network - May 9, 2014, 1:36 am

Good guide but if you have someone keylogged then you get the email also so what i do is this:

1. Change email details (Pass,security question etc)
2. Change Steam password (Via email)
3. Enjoy account :D (Most tricky part)

MiserAbleMan - May 9, 2014, 4:45 am

using a drive by exploit would help like java or flash exploit

good job on the tut overall

juscallmeshane - May 14, 2014, 7:47 pm

thats whats up i deff gotta try this one
