Thread: [New Skittles Free 1 Week Codes Method \[Patched\]](#)

Shike - May 7, 2014, 12:22 pm

Hello friends ?

I HAVE BEEN INFORMED YAHOO WAS BANNED FROM THE SKITTLES PROMOTION! SHOOT ME A PM TO GET THE CURRENT METHOD (not free)!

Not giving out codes anymore, sorry :)

Figured i'd give an updated way to get all of the codes into one email:

First things first, thanks to [BlueTigerSlayer](#) for his original thread:
<https://hackforums.net/showthread.php?tid=4199888>

Also a big thanks to [Balloon](#) for his [thread](#) which help me set up my iMacro that gets codes from the skittles site.

And now onto the getting of codes:

- Sign up for a Yahoo email [www.yahoo.com]

Note: you will need a valid phone number to input, although there are no verification codes sent.

- Go to your inbox and then go to settings
Spoiler ([Click to View](#))

- Go to the security page
Spoiler ([Click to View](#))

- Create a base name, mine for example is ShikeHF
Spoiler ([Click to View](#))

- Click add and start making addresses! [Can make up to 500 per yahoo account]
Spoiler ([Click to View](#))

- You're going to want to go to <https://ssl.skittles.com/Registration.aspx> in an incognito Chrome window,
or Private Firefox window

- Enter the code: M95MN

- Fill in info, real or fake and put in your yahoo addresses you made earlier, like this:
Spoiler ([Click to View](#))

- Voila! Check Yahoo inbox [will be in spam more than likely]
Spoiler ([Click to View](#))

Exit browser, and repeat!

Hope this helps out a few people. ?

Please note before pm'ing! You need an imagetyperz/DBC account with money in it. My iMacros are set up for imagetyperz (i will not change coding for DBC) I have written a guide on how to use all of my imacros scripts, that being said, it may NOT be the most organized way to do this, but it IS the FASTEST and most logical way to me. I have broken up the tasks of getting the codes, setting up the emails, and getting the codes from the emails into 3 separate iMacros scripts, each running in a different browser.

If anyone is interested, i have 3 iMacro scripts to make this 95% automatic (from making the alternate addresses, to getting the codes sent to one place), send me a PM if you're interested in them, note, you will need BOTH the firefox browser addon, as well as iMacro enterprise edition (i have version 9.something so that'd be the preferred version.)

Does anyone have a free bot their giving out for this. Not a Imacros script!

santi9118 - May 7, 2014, 3:33 pm

Just use this way its simple and easy plus you'll only need like 30 codes because the skittles promotion lets you redeem the codes until October. Unless you're going to sell them you should use a bot. Also these codes aren't stackable meaning you cant redeem 10 codes at a times you need to redeem one code one week then another code the next week and so on.

If you get hope you enjoy than u need to clear ur browser cookies. This can be done by going to options or entering CLEAR if you are using macro script.

For emails you can create script to add emails in the lists.
Have a look in this thread...similar steps but different script u ll need
