Thread: [XBL 1 Week Free Script \[No Auto-Captcha\]](#)

**PROTONIX** - May 7, 2014, 6:27 pm

Hey guys! So I know you guys are probably cheesed about the auto - captcha having to be paid for. If you do not have the money then this is the way to go to get fast going codes.

```
Code SET !EXTRACT_TEST_POPUP NO
SET !DATASOURCE C:\Users\(\computer username)\Desktop\emails.txt
SET !DATASOURCE_COLUMNS 1
SET !DATASOURCE_LINE {{!LOOP}}
SET !LOOP 1
CLEAR
TAB T=1
URL GOTO=http://ssl.skittles.com/
TAG POS=1 TYPE=INPUT:TEXT FORM=ID:form1 ATTR=ID:Header_ecCode_txtCode
CONTENT=m95mn
TAG POS=1 TYPE=INPUT:SUBMIT FORM=ID:form1 ATTR=ID:Header_ecCode_btnCodeSubmit
TAG POS=1 TYPE=INPUT:TEXT FORM=ID:form1
ATTR=ID:ContentPlaceholder1_Registration1_txtFirstName CONTENT=george
TAG POS=1 TYPE=INPUT:TEXT FORM=ID:form1
ATTR=ID:ContentPlaceholder1_Registration1_txtLastName CONTENT=springer
TAG POS=1 TYPE=INPUT:TEXT FORM=ID:form1
ATTR=ID:ContentPlaceholder1_Registration1_txtEmail CONTENT={{!COL1}}
TAG POS=1 TYPE=SELECT FORM=ID:form1
ATTR=ID:ContentPlaceholder1_Registration1_ddlDOBMonth CONTENT=%02
TAG POS=1 TYPE=SELECT FORM=ID:form1
ATTR=ID:ContentPlaceholder1_Registration1_ddlDOBYear CONTENT=%1987
TAG POS=1 TYPE=SELECT FORM=ID:form1
ATTR=ID:ContentPlaceholder1_Registration1_ddlDOBDay CONTENT=%16
TAG POS=1 TYPE=INPUT:CHECKBOX FORM=ID:form1
ATTR=ID:ContentPlaceholder1_Registration1_chkXBoxNo CONTENT=YES
TAG POS=1 TYPE=INPUT:CHECKBOX FORM=ID:form1
ATTR=ID:ContentPlaceholder1_Registration1_chkTerms CONTENT=YES
WAIT SECONDS=10
TAG POS=1 TYPE=INPUT:IMAGE FORM=ID:form1
ATTR=ID:ContentPlaceholder1_Registration1_btnSubmit
'Original code by Balloon
'Edited for those who do not want to auto captcha
'Visit Balloon's post if want auto captcha
'Edited by PROTONIX
What you will need
iMacros - Google search it. Its a Google App :3
Brain - Hopefully you have this
```

NOTE: This is a edited script from Balloon's script! If you would like the script please go here:  
<https://hackforums.net/showthread.php?tid=4206844>

What you will be doing

Go to iMacros, record a Macro then stop it. Now when the window pops up after stopping it, paste the code above.

Now what you will do is make a file named "emails.txt" on your desktop.

Visit here to find out how to make disposable emails on Yahoo here:

<https://hackforums.net/showthread.php?tid=4216395>

After making disposable emails, Add the list of emails on the "emails.txt" file. Make sure they are all together no spaces!

Now before running the script, on the main menu of iMacros, add a loop of how many emails you will like to do.. example: I have 5 emails, I will set the loop to 5

There you go! If you have any trouble please ask me any questions. Full credit to Balloon for making this script happen! :D Cheers!

**dhanadhan** - May 7, 2014, 7:19 pm

You gotta clear cookies too so i suggest to use Self-Destructing Cookies addon with firefox which will automatically delete cookies when the tab is closed.

**.Magic** - May 7, 2014, 7:31 pm

If you want it to automatically clear them, then add CLEAR to one of the lines on the script. It clear cookies and cache

**FearTroy** - May 7, 2014, 10:17 pm

I Get This Error " RuntimeError: Data source file does not exist. line: 4 "

**fabiaiz** - May 8, 2014, 3:03 am

i've tried to do this with imacros, but every time it blocks somewhere, sometimes it blocks loading page, sometimes it blocks after putting name and surname

**PROTONIX** - May 8, 2014, 5:01 am

Ill fix the code. Just give me a second :)

**PROTONIX** - May 8, 2014, 5:06 am

Fixed code, Added "CLEAR" variable into script. Clears per loop! :)

**doviis** - May 8, 2014, 9:19 am

How to create an account here: <http://Captchatypers.com/Forms/FileUploadAndGetText.htm> ??

**TheDutchend** - May 8, 2014, 9:36 am

(May 8, 2014 09:19 AM)doviis Wrote: [\[CITE\]](#) How to create an account here:

<http://Captchatypers.com/Forms/FileUploadAndGetText.htm> ??

You can't register with them for some reason... really annoying

**P?kachu** - May 8, 2014, 12:57 pm

I get:

NS\_ERROR\_UNEXPECTED: Component returned failure code: 0x8000ffff  
(NS\_ERROR\_UNEXPECTED) [nsIPrefBranch.getCharPref], line 2 (Error code: -1001)

Any idea?

**Igforce** - May 8, 2014, 1:09 pm

(May 8, 2014 12:57 PM)P?kachu Wrote: [\[CITE\]](#) I get:

NS\_ERROR\_UNEXPECTED: Component returned failure code: 0x8000ffff  
(NS\_ERROR\_UNEXPECTED) [nsIPrefBranch.getCharPref], line 2 (Error code: -1001)

Any idea? Make sure you have saved it in utf-8

**P?kachu** - May 8, 2014, 1:51 pm

(May 8, 2014 01:09 PM)Igforce Wrote: [\[CITE\]](#) Make sure you have saved it in utf-8  
Well it works in Chrome.

For some reason it ALWAYS leaves the first name? I have even tried recording a new script but it doesn't work

**Shike** - May 8, 2014, 1:52 pm

(May 8, 2014 01:51 PM)P?kachu Wrote: [\[CITE\]](#) Well it works in Chrome.

For some reason it ALWAYS leaves the first name? I have even tried recording a new script but it doesn't work

```
TAG POS=1 TYPE=INPUT:SUBMIT FORM=ID:form1 ATTR=ID:Header_ecCode_btnCodeSubmit
TAG POS=1 TYPE=INPUT:TEXT FORM=ID:form1
ATTR=ID:ContentPlaceholder1_Registration1_txtFirstName CONTENT=george
```

Add WAIT SECONDS=1 on a new line, after ATTR=ID:Header\_ecCode\_btnCodeSubmit  
like this:

```
TAG POS=1 TYPE=INPUT:SUBMIT FORM=ID:form1 ATTR=ID:Header_ecCode_btnCodeSubmit
WAIT SECONDS=1
TAG POS=1 TYPE=INPUT:TEXT FORM=ID:form1
ATTR=ID:ContentPlaceholder1_Registration1_txtFirstName CONTENT=george
```

**P?kachu** - May 8, 2014, 2:11 pm

(May 8, 2014 01:52 PM)Shike Wrote: [\[CITE\]](#) TAG POS=1 TYPE=INPUT:SUBMIT FORM=ID:form1  
ATTR=ID:Header\_ecCode\_btnCodeSubmit  
TAG POS=1 TYPE=INPUT:TEXT FORM=ID:form1  
ATTR=ID:ContentPlaceholder1\_Registration1\_txtFirstName CONTENT=george

Add WAIT SECONDS=1 on a new line, after ATTR=ID:Header\_ecCode\_btnCodeSubmit  
like this:

```
TAG POS=1 TYPE=INPUT:SUBMIT FORM=ID:form1 ATTR=ID:Header_ecCode_btnCodeSubmit
WAIT SECONDS=1
TAG POS=1 TYPE=INPUT:TEXT FORM=ID:form1
ATTR=ID:ContentPlaceholder1_Registration1_txtFirstName CONTENT=george
```

Yeah, just done this. Thanks.

Now to get a way to create loads of emails.

Anybody know a way?

I have a yahoo email but cant use imacros to create them over and over as the ID changes each time.

Anybody else got a way?

**Xez** - May 8, 2014, 2:59 pm

(May 8, 2014 02:11 PM)P?kachu Wrote: [\[CITE\]](#) Yeah, just done this. Thanks.

Anybody else got a way?

You can, just go read the documentation. There are others ways to select objects :)

**Shike** - May 8, 2014, 3:04 pm

Anybody know a way?

I have a yahoo email but cant use imacros to create them over and over as the ID changes each time.

Anybody else got a way?

I have a script to do this, as long as you have the iMacros browser, PM me ?

**The Undertaker** - May 8, 2014, 3:07 pm

Thank you,for this I set this right on up

**Satanistic** - May 8, 2014, 3:41 pm

NS\_ERROR\_UNEXPECTED: Component returned failure code: 0x8000ffff  
(NS\_ERROR\_UNEXPECTED) [nsIPrefBranch.getCharPref], line 2 (Error code: -1001)

Any idea about this?

**Sexy???** - May 8, 2014, 3:43 pm

when do these codes expire? I would love to know if it's worth it

**Suffixed** - May 8, 2014, 4:33 pm

I receive an error saying SyntaxError: wrong format of SET command at line 2.  
If it helps, I'm running Windows XP.

**Shike** - May 8, 2014, 4:36 pm

(May 8, 2014 04:33 PM)BloodlessGold7 Wrote: [\[CITE\]](#) I receive an error saying SyntaxError: wrong format of SET command at line 2.

? did you change the file location from (computer user name) to your actual name?

**Supra23** - May 9, 2014, 8:17 am

RuntimeError: Data source file does not exist, line: 3

I've tried everything and nothing works. Yes I did change (computer name) to my computer name.

Please get back to me as soon as possible thank you

(May 8, 2014 04:36 PM)Shike Wrote: [\[CITE\]](#) ? did you change the file location from (computer user name) to your actual name? Thank you very much for your help i appreciate it!

**Syberpro** - May 9, 2014, 1:39 pm

what's best way to make lost of emails? Yahoo ?

**Shike** - May 9, 2014, 1:51 pm

(May 9, 2014 01:39 PM)Syberpro Wrote: [\[CITE\]](#) what's best way to make lost of emails? Yahoo ?  
Made a thread about this:

<https://hackforums.net/showthread.php?tid=4216395>

(May 8, 2014 04:33 PM)BloodlessGold7 Wrote: [\[CITE\]](#) I receive an error saying SyntaxError: wrong format of SET command at line 2.

If it helps, I'm running Windows XP.

Only works on Windows 7, Windows 8.

Guys I fixed it where it doesn't add the first name, I got the updated code from Balloon with the input box and I set where it cleans cookies & cache beginning and ending of the script.

```
Code SET !EXTRACT_TEST_POPUP NO
SET !DATASOURCE C:\Users\thatg_000\Desktop\emails.txt
SET !DATASOURCE_COLUMNS 1
SET !DATASOURCE_LINE {{!LOOP}}
SET !LOOP 1
CLEAR
TAB T=1
URL GOTO=http://ssl.skittles.com/
TAG POS=1 TYPE=INPUT:TEXT FORM=ID:form1 ATTR=ID:Header_ecCode_txtCode
CONTENT=m95mn
TAG POS=1 TYPE=INPUT:SUBMIT FORM=ID:form1 ATTR=ID:Header_ecCode_btnCodeSubmit
WAIT SECONDS=2
TAG POS=1 TYPE=INPUT:TEXT FORM=ID:form1
ATTR=ID:ContentPlaceHolder1_Registration1_txtFirstName CONTENT=bob
TAG POS=1 TYPE=INPUT:TEXT FORM=ID:form1
ATTR=ID:ContentPlaceHolder1_Registration1_txtLastName CONTENT=vance
TAG POS=1 TYPE=INPUT:TEXT FORM=ID:form1
ATTR=ID:ContentPlaceHolder1_Registration1_txtEmail CONTENT={{!COL1}}
TAG POS=1 TYPE=SELECT FORM=ID:form1
ATTR=ID:ContentPlaceHolder1_Registration1_ddlDOBMonth CONTENT=%02
TAG POS=1 TYPE=SELECT FORM=ID:form1
ATTR=ID:ContentPlaceHolder1_Registration1_ddlDOBYear CONTENT=%1987
TAG POS=1 TYPE=SELECT FORM=ID:form1
ATTR=ID:ContentPlaceHolder1_Registration1_ddlDOBDay CONTENT=%16
TAG POS=1 TYPE=INPUT:CHECKBOX FORM=ID:form1
ATTR=ID:ContentPlaceHolder1_Registration1_chkXBoxNo CONTENT=YES
TAG POS=1 TYPE=INPUT:CHECKBOX FORM=ID:form1
```

```
ATTR=ID:ContentPlaceHolder1_Registration1_chkTerms CONTENT=YES
WAIT SECONDS=2
PROMPT "Please enter the captcha:" !VAR1
TAG POS=1 TYPE=INPUT:TEXT FORM=ID:form1 ATTR=ID:recaptcha_response_field
CONTENT={{!VAR1}}
TAG POS=1 TYPE=INPUT:IMAGE FORM=ID:form1
ATTR=ID:ContentPlaceHolder1_Registration1_btnSubmit
WAIT SECONDS=1
CLEAR
```

Good luck! Also here is what I made in under 10 minutes with this script; <https://puu.sh/8Gbrd.jpg>

**Satanistic** - May 10, 2014, 3:55 am

Need help i keep getting this error

```
NS_ERROR_UNEXPECTED: Component returned failure code: 0x8000ffff
(NS_ERROR_UNEXPECTED) [nsIPrefBranch.getCharPref], line 2 (Error code: -1001)
```

**pause** - May 10, 2014, 7:59 am

(May 10, 2014 03:55 AM)Satanistic Wrote: [\[CITE\]](#) Need help i keep getting this error

```
NS_ERROR_UNEXPECTED: Component returned failure code: 0x8000ffff
(NS_ERROR_UNEXPECTED) [nsIPrefBranch.getCharPref], line 2 (Error code: -1001)
Save the emails.txt as UTF-8 and it should work
```

**ipsukhi** - May 10, 2014, 10:39 am

been trying for an hour and keep getting this error :/

```
RuntimeError: net::ERR_BLOCKED_BY_CLIENT, line: 8
```

**PROTONIX** - May 13, 2014, 2:39 pm

(May 10, 2014 10:39 AM)ipsukhi Wrote: [\[CITE\]](#) been trying for an hour and keep getting this error :/

```
RuntimeError: net::ERR_BLOCKED_BY_CLIENT, line: 8
Use google chrome, Run as admin on google chrome, Run the script.
```

Mistakes most people have: Adding .txt in the extension of a text file. Leave .txt blank! make sure it shows the text file icon if you remove .txt in the extension. The text file already has a .txt extension hidden in the name. Good luck :)

Also make sure you add your computer name on the location were I added (Computer name).

Make sure its emails not email when adding a text file onto your desktop.
