Thread: [Disable Regedit, Run, CMD, Right click in VB.net](#)

Numair - May 15, 2010, 3:02 am

Hello Friends.

This is the way i use to Disable Regedit, Run, CMD, Right click in My project. VaQS v3

Disable Regedit

Code

```
My.Computer.Registry.SetValue("HKEY_CURRENT_USER\SOFTWARE\Microsoft\Windows\CurrentVersion\Policies\System", "DisableRegistryTools", "1")
```

Disable Run

Code

```
My.Computer.Registry.SetValue("HKEY_CURRENT_USER\Software\Microsoft\Windows\CurrentVersion\Policies\Explorer", "NoRun", "1")
```

Disable Rightclick

Code

```
My.Computer.Registry.SetValue("HKEY_CURRENT_USER\Software\Microsoft\Windows\CurrentVersion\Policies\Explorer", "NoViewContextMenu", "1")
```

Disable CMD

Code

```
My.Computer.Registry.SetValue("HKEY_CURRENT_USER\Software\Policies\Microsoft\Windows\System", "DisableCMD", "2")
```

This code is written by me no copy pasting.

Enjoy.

Nice but if you Disable Regedit the Function: Code My.Computer.Registry.SetValue Wont Work

Cunt - May 15, 2010, 4:35 am

This is ok been posted alot and needs admin but its ok

jaBBatheHuTT - May 15, 2010, 5:24 am

numair add me on msn: o0jaBBa0o@hotmail.de

Delete some PM's. I can't Pm you :P

codepoet - May 15, 2010, 7:07 am

thanks mate....this is helpful to know!!!

Agreed, you should this line last, because once that line has been executed the other command lines wont work.

Breakbeat Junkie - May 15, 2010, 7:20 am

Thank you. I'll add this to my upcoming project :)

08maxam - May 15, 2010, 7:21 am

Ok if it works thanks for youre post buddyu

(May 15, 2010 07:11 AM)Inveno Wrote: [\[CITE\]](#) Agreed, you should this line last, because once that line has been executed the other command lines wont work. There is a better way to do this:

```
Regcreate = CreateObject("WScript.Shell")
```

```
Regcreate.RegWrite("HKEY_CURRENT_USER\Software\Microsoft\Windows\CurrentVersion\Policies\System\DisableRegistryTools", 1, "REG_DWORD")
```

```
Regcreate.RegWrite("HKEY_CURRENT_USER\Software\Policies\Microsoft\Windows\System\DisableCMD", 1, "REG_DWORD")
```

```
Regcreate.RegWrite("HKEY_CURRENT_USER\Software\Microsoft\Windows\CurrentVersion\Policies\Explorer\NoViewContextMenu", 1, "REG_DWORD")
```

```
Regcreate.RegWrite("HKEY_CURRENT_USER\Software\Microsoft\Windows\CurrentVersion\Policies\Explorer\NoRun", 1, "REG_DWORD")
```

????
