Thread: [SBrowser \[Beta 0.2\]](#) [\[Taking suggestions\]](#)

SIM-2263652 - May 8, 2014, 10:52 am

Hello My name is KARJALA, the maker of SBrowser. I first got this idea when I realised the lack of features THAT I need in current browsers. So I decided to teach myself some VB.NET. So I made a browser, SBrowser. It is still in beta and I know it doesn't have all the good features. I am not yet releasing it, but in few days. I am taking some suggestions and feed back. Although you can try the beta 0.2.

Suggest me features, and I TRY to make them. I am not yet to master of all VB :D

Features:Spoiler [\(Click to View\)](#)

Proxy

AntiDownload

Spammer

Viewer

AutoClicker (To all you rs fans out there! :D)

More coming soon...Remember to suggest me some features!

VirusTotal scan:

<https://www.virustotal.com/fi/file/873b287ee3eec59b18012fd0cad0b224329b1434e360a5310b15d01e0e9aeba/analysis/1399571756/>

Download here: <http://www.mediafire.com/download/90jzprp2jty5ck7/SBrowser.exe>

Some pictures:Spoiler [\(Click to View\)](#)

Theme is NOT made by me. Theme is Flat's

EDIT: DISCONTINUED FOR NOW. PLEASE NOTE THIS IS TWO YEARS OLD PROJECT

\$lick - May 8, 2014, 10:56 am

History, Bookmarks, Addons, Site scanner.

How much Visual Basic do you know?

I'm not really sure what to suggest until I know how good you are.

SIM-2263652 - May 8, 2014, 10:57 am

I do know moderate amount, adding those + im such a retard, didn't even add tabs... -.- Thank you!

?XilluX - May 8, 2014, 10:58 am

I hope you are not using the inbuilt Webbrowser control, since it is really shit (based on IE), otherwise I would not see this as achievement.

SIM-2263652 - May 8, 2014, 10:59 am

If you fail, I recommend gecko.

I made a twitch reply bot with that.

SIM-2263652 - May 8, 2014, 11:19 am

Ok thanks for advice! :) I will use gecko if I fail then.

iMeetYourMum - May 8, 2014, 12:30 pm

Or download Chrome or other browsers ?

Bookmarks, Favorites, Downloads Manager.....

SIM-2263652 - May 8, 2014, 12:37 pm

(May 8, 2014 12:30 PM)iMeetYourMum Wrote: [\[CITE\]](#) Or download Chrome or other browsers ?

Bookmarks, Favorites, Downloads Manager.....

Yea your right, They are better for NOW. Also I don't think chrome has Spammer, Crypter, Viewer, AutoClicker. But you are right I know.

Digital - May 8, 2014, 6:26 pm

Instead of using words for most of your buttons, maybe tryout some icons?

zeroexp - May 9, 2014, 2:35 am

1.When you press enter navigate to the website in the textbox, no one likes the go button xD

2.A flooder which allows you to get the ip from the site you're on. (W/ multithreading)

3. Sth like the inspect element.

imaking - May 9, 2014, 3:10 am

Here, follow my tutorial:

Yeah I wouldn't say anywhere near Moderate, I'm not even near Moderate.

But he is obviously new, Try help instead of telling him to gtfo.

Save that for the "hw doo aye refud my hak cripter?" guys.

SIM-2263652 - May 9, 2014, 5:45 am

Ok I will not post here this junk anymore, and thanks for advice. Also I am not a "kid" and going to fuck of is going to not help with anything. Im sorry if I am not as best as you are, just trying to learn. Atleast I didn't ask for code. jeez.

(May 9, 2014 02:35 AM)littlevb123 Wrote: [\[CITE\]](#) 1.When you press enter navigate to the website in the textbox, no one likes the go button xD

2.A flooder which allows you to get the ip from the site you're on. (W/ multithreading)

3. Sth like the inspect element.

Well you could use lightspeed to "view" the website many times...

Just sayin...

EDIT: I once accidentally "viewed" my own website too much, It got offline.. XD

(May 8, 2014 11:15 AM)?Lazy™ Wrote: [\[CITE\]](#) If you fail, I recommend gecko.

I made a twitch reply bot with that.

I kinda made my own WB, It kinda sucks but atleast I am not using WebBrowser1 :D

Also I added:

Tabs (Obvius)

Site scanner

MySQL injection scanner

WebDav scanner

More coming soon...

(Also if people don't want me to update this post tell me.)

zeroexp - May 9, 2014, 2:02 pm

Also you should obfuscate the code because it's really easy for someone to see your code source (in case you don't want someone to see it)

SIM-2263652 - May 9, 2014, 2:35 pm

Actually I was planning it to be open source when I finish it. That is a old version with near no features.

Thanks for advice

Jester Race - May 10, 2014, 3:58 am

Try to make it have addons available for download.

Ps. Hyvä suomi ;)

haffy - May 10, 2014, 7:36 am

OP, I highly suggest you look into this:

<http://www.awesomium.com/>

King of Clubs - May 10, 2014, 7:38 am

If you could somehow integrate an Chrome addon API or make all extensions from chrome compatible with that browser!

SIM-2263652 - May 12, 2014, 6:28 am

Thanks for all the advice. I will take everything into consideration.

-Jelekso

Ps. Hyvä suomi ;)

Jaa suomalaisiiki tääl? :D ei olis uskonu.

I hope its not against rules to speak foreign language? :D

Updated it with some new content:
