You should upload to virus total. Uploading a unknown exe to a site that doesn't distribute is quite fishy

I am educating myself with everything I can find and testing it to understand how it works. What is this exactly? How do I use it?

swagfag69 - May 9, 2014, 7:44 pm

can you help with the api part? what exactly is that for?

Host FR™ - May 10, 2014, 3:52 am

add me on skype sir i help you with pleasure ! ismozyhd_

If anyone needs help with the following member's software. I will be glad to help you out, as I know lots in this area.

You should also check all your shells before importing them, you could use many web-checkers or downloaded software.

I know he has supplied free shells, but those will die out in probably a few weeks so you must find loop-holes to get your own.

I would also like to give you the creator of this a lovely hug, so member's who are new to all of this can learn to know lots about hacking.

is it just me or does this just ddos me rofl. I use a skype resolver and it gives me ip so i input it but it

ends up ddosing me rofl.
