Thread: [\[Tutorial\] Hide your porn or important stuff by new way](#)

hacktoxin - May 9, 2014, 12:23 am

Hi HF members i am new here and after reviewing all the articles i think i should contribute my earned points with you, so here i am

HIDE PORN STUFF OR IMPORTANT DATA !!

Suppose number of files named as Sexyboobs.avi , xxxsashagrey.avi ,mommyboobs.avi , bigtits.avi etc.....

Now What's common in it --> sexy names like boobs, hot,sex,xxx etc.

We are not supposed to put in hidden folder, its an old trick these days.

A smart ass friend/relative/brother of urs can unhide hidden folders and then make a search for specific keywords - sex,xxx,etc

And guess what , he would definitely get a file and ur private stuff in no more private ?

SOLUTION

Go to folder and search options > View > Tick Show hidden files > Untick Hide extensions to known file types > Apply and Ok

Go to file you want to hide ex- sexyass.avi and when you rename delete the extension avi and name sexy ass and name it \$%Q\$# or any character names likes \$@\$#%#\$, ^%\$, @#\$, ^#\$ etc and after that file will changed with different non executable unknown icon .

Now the friend of urs will never search for these keywords - \$@\$#%#\$, ^%\$, @#\$, ^#\$ and not able to get it ? .

Now place the file wherever you want to place and if your friend see it by chance, he will have no idea whether its porn or else ? .

Don't worry you can access it by double click and choose program as vlc or any media player you

want to choose

One plus benefit for this trick that after playing that, file will not record in your vlc mediaplayer or any player file history , so complete privacy.

Guyz if you have any doubts do ask me . I appreciate those who knew this and for those who don't , this is tutorial for you. Do thanks comments if you like it.

adampelletgun - May 9, 2014, 12:26 am

Or you could just create an encrypted TrueCrypt file container.

hacktoxin - May 9, 2014, 12:30 am

I appreciate your point .

But Why there is need of ace card , if jack is enough for us to handle it

adampelletgun - May 9, 2014, 12:31 am

Well my method is much more simple.

I appreciate your contribution though.

the best guy ever - May 9, 2014, 12:32 am

thank u for ur info OP ill look into it a little more and then ill try and learn more

hacktoxin - May 9, 2014, 8:35 am

Thank you the best guy ever i appreciate you liked it !

grady - May 9, 2014, 12:10 pm

Or you could just not let your brother/friend/gf on your computer.

MUCH easier method.

Storm- - May 9, 2014, 12:15 pm

I tried this, but now I don't know which of my 179 HD porn videos are which. Because their all named random stuff.

CCBM - May 9, 2014, 12:37 pm

You could just have a password protected .rar file...

hammy2 - May 10, 2014, 1:01 am

lol pepole still download porn

/toshort

Have to be prepared in case internet goes out.

And OP, I feel a TrueCrypt type solution would be much easier here.

?Nespresso - May 10, 2014, 6:59 am

try this.

Rename file to (Alt + numpad 0 > numpad 1> numpad 6> numpad 0)

remove extension.

Change icon, or put it invisible folder.

Supreme??????? - May 10, 2014, 7:00 am

Seems such a hassle to do all that. Might as well use Truecrypt.

YeAt - May 10, 2014, 7:03 am

how about instead you stop watching porn you virgins. its fucking up ur brain and u dont even know it. ha!

zadiar - June 1, 2014, 3:46 pm

good way of thinking hahaha "hide your porn"

network10 - June 7, 2014, 5:56 am

lol thanks for the tutorial op but no need to hide porn here.

traczthefox - June 13, 2014, 4:14 am

(May 9, 2014 12:26 AM)adampelletgun Wrote: [\[CITE\]](#) Or you could just create an encrypted TrueCrypt file container.

Exactly! xD

I clicked this thinking maybe I would have a neat folder trick to add to my arsonal.

But it's just renaming the files.

(May 10, 2014 07:03 AM)YeAt Wrote: [\[CITE\]](#) how about instead you stop watching porn you virgins. its fucking up ur brain and u dont even know it. ha!Yeah use your head silly OP.

You could have put more thought into it and made a truecrypt tut out of this.

Don't get my wrong OP this will help some people that have this problem for sure. Thanks for posting ?

?homas - June 25, 2014, 5:57 am

So many people are going to use this because it says "How to hide your porn" hahaha

swagster1337 - June 25, 2014, 9:59 am

High Quality thread, However there are much more simple ways than this...

Good effort anyway :)
