Thread: [Suggest me a Graphics card to play Assassins Creed Black Flag.](#)

Crash-Override - May 9, 2014, 9:51 pm

Please Suggest me a Graphics card to play AC4 without any lags/delays and good FPS.

My current configuration are as follows..

Intel core i3-3220 CPU @ 3.30 GHZ

4 GB RAM

1 TB HDD

Nvidia GT 610 (which is a shitty graphics card)

Thank you..

You might wana make the following upgrades

i3 -> i5

4 GB -> 8 GB

GT 610 -> 760+

I think I will make the upgrade for the graphics card. But is there an equivalent 760 in Radeon. Cuz I am not a fan nvidia now a days.

750Ti is cheap and it can handle most of the new games on 30 FPS at 1080p.

30 fps isn't good, dickwad, and he said he didn't want nVidia.

OP, go for a R9 270x or a 280x.

Thanks for all your responses. I finally settled down with Nvidia and the card I bought is GTX 750. I can play ac4 now. But is it good enough for upcoming days?

thanks guys.
