Thread: [\[TUT\] make rat/keylogger/virus fully fud WITHOUT crypter!!! \[tut\]](#)

jay1994 - May 10, 2014, 4:40 pm

ive been asking everyone for help on here lately so i thought id give back, each of these methods ARE NOT my own, i just found them and used them together to make my rat scantime/runtime FUD and thought that this would be better than buying crypter all the time, so i hope you guys enjoy!!!

requirements:

winrar

file splitter/joiner

hex editor

and a file to make fud

i just googled for a free file splitter/joiner and i use hxd portable as my hex editor

to start, we want to make the file runtime fud using hex editing, i used this tutorial to learn:

<http://www.youtube.com/watch?v=34JuwNg9ECU>

once this file is created, we then need to make it scantime fud, which i figured out how to do using this tutroial:

<http://gapsecurities.blogspot.com/2013/05/make-your-server-fud-without-any-crypter.html>

(in the tut the person who made it complains about hex editing, but the hex editing itself isnt scantime fud, so this still applies)

if anyone for any reason needs help or clarification, ive already done this and tested it so if you need help either pm me or add me on skype: jay4901

i know this isnt a good tutorial, more of just sharing information but i think this can help alot of people out!

BY THE WAY: with the hex editing, its said to work on anything, but i am a bit sceptical, so test the file after you use the hex method just to make sure its working properly! (it basically works on everything!)

sweet! glad it helped! be sure to test to make sure everything works

Serquet70 - May 10, 2014, 6:14 pm

Nice look, I'm about to test it to see how well it works. Be prepared for a flood of PM's from me :)

grady - May 14, 2014, 9:33 am

Haven't tested this out myself, but I believe that this works,.

Nice share, if I were you, I'd post this under the "Hacking Tutorials" section, but clean it up a bit.

Nice to see newer members already contributing.

????? - May 14, 2014, 11:31 am

I believe that this is only Scantime FUD and not run time, so its useless unless you just want to store it.

jay1994 - May 14, 2014, 12:49 pm

Well, if you read the beginning youd know that the hex editing makes it runtime fud and einrar makes it scantime fud... making it fully fud :)

7cubislate - December 25, 2014, 10:00 am

dude,please,i request you,please share the exidous av signature tool with me,i tried every link of this tool,al torrentz by everything is down.

Please buddy help me out by sharing the tool,please,will be very much thankful to u.

my mail id is 7cubislate@gmail.com

Please help me man.??

luc200 - May 27, 2016, 3:06 am

That is very informative i must say.

What this guy said

qik_first - May 27, 2016, 4:55 pm

I'm about to test it to see how well it works. Thanks

GunVein - May 27, 2016, 5:00 pm

wow what a tutorial, might try it soon, thanks for letting us know !

uzmod - May 27, 2016, 10:05 pm

must say, it is interesting and would look into it now. thanks for this mate.
