Thread: [\[The Brotherhood\] Antivirus Finding Thread](#)

King Cin - May 11, 2014, 12:30 pm

In this thread we will find the right antivirus program for you, as there is no "best" antivirus. It depends on several factors.

Current helpers: • ['Cinnamon](#)
• [Aura](#)

Use this format:

Code I want a free/paid antivirus:
Computer specs:
Operating System:
I am looking for an antivirus that:
I mainly do this on my computer:

Aura - May 11, 2014, 4:31 pm

I'm part of this thread, even if Unknown doesn't know about it yet.

My Name Is Pedro - May 11, 2014, 4:35 pm

I think this thread is an excellent idea. I have only recently started looking at the White Hat section but I have noticed the ungodly amount of threads on this subject. Would be nice for everything to be compiled.

Aura - May 11, 2014, 4:36 pm

(May 11, 2014 04:35 PM)Etienne Sin Wrote: [\[CITE\]](#) I think this thread is an excellent idea. I have only recently started looking at the White Hat section but I have noticed the ungodly amount of threads on this subject. Would be nice for everything to be compiled.

We could compile all these threads in one but this question is asked so many times a day ... People don't even notice the excellent sticky by Chief on this question too.

rxki - May 11, 2014, 4:42 pm

Do you want a free or paid antivirus: Free
Computer specs:
Phenom X4 964 3.41
8GB DDR2
GTX 760.

Aura - May 11, 2014, 4:46 pm

(May 11, 2014 04:42 PM)L?ki Wrote: [\[CITE\]](#) Do you want a free or paid antivirus: Free
Computer specs:
Phenom X4 964 3.41
8GB DDR2
GTX 760.

You have really good specs so I would go with either Avast! free or Avira free. Really up to you. You can also check out Comodo if you want (Comodo Antivirus 2014).

King Cin - May 11, 2014, 10:04 pm

(May 11, 2014 04:31 PM)Aur? Wrote: [\[CITE\]](#) I'm part of this thread, even if Unknown doesn't know about it yet.

'Elcome to muh thread, aye ?.

(I added you to the OP)

?A.J? - May 12, 2014, 6:27 am

Hopefully this stops some threads like:

Best antivirus?

Suggest me an antivirus.

etc..

Great idea.

Aura - May 12, 2014, 7:21 am

(May 12, 2014 06:27 AM)Skylin? Wrote: [\[CITE\]](#) Hopefully this stops some threads like:

Best antivirus?

Great idea.

All these threads wouldn't even be created if people were reading the excellent sticky thread from Chief, but they don't.

?A.J? - May 12, 2014, 8:44 am

(May 12, 2014 07:21 AM)Aur? Wrote: [\[CITE\]](#) All these threads wouldn't even be created if people were reading the excellent sticky thread from Chief, but they don't.

Most of them think they will get the best answer if they do a separate thread.

A lot of us know which are the best antiviruses and keep suggesting the same suggestions over and over again.

SIM-1729678 - May 12, 2014, 8:45 am

lemme try this, I already have a anti-virus, I pay out 350 euro's a year for 3 licenses,

Do you want a free or paid antivirus: PAID

Computer specs:

it sucks I know.

Aura - May 12, 2014, 8:51 am

(May 12, 2014 08:45 AM)ScreemS Wrote: [\[CITE\]](#) lemme try this, I already have a anti-virus, I pay out 350 euro's a year for 3 licenses,

You want a paid Antivirus with these specs, ESET Smart Security. It will go easy on your resources but still offers one of the best protection there is. Kaspersky and ESET are the two best Antiviruses companies but Kaspersky products uses a bit more resources than ESET products and you want to avoid that right now. So ESET Smart Security would be my pick. 350 Euros a year for three licences ? What Antivirus do you use ?

SIM-1729678 - May 12, 2014, 8:54 am

Don't use Avast on Windows 8 computers, just a tip.

rowebil - May 21, 2014, 2:40 pm

Does anyone have recommendation on an endpoint security solution?

For those who don't know what it is - it is a solution for small-businesses that contains a server that is used for distributing Anti-Virus/Firewall/etc software to client machines, and configuring policies to controlling the software.

Right now, I am using 'Kaspersky Total Security for Business' and I like it, but I've heard lots of reports that it can take a slow machine down to a crawl. In AV-Comparatives, Kaspersky is .2 points better in performance than ESET (most recommended AV for slow machines).

I don't see much of an impact, but I'm just curious on hearing what other people suggest. I think the saying 'whatever works for you is best' is fine, but I am easily motivated on others' opinions. Kaspersky licensing has fallen short ;), which is another reason why I like it. I asked the sales rep, and she said I can request another trial key and add it. So I might stick with it, but am open to new ideas if anyone has any experience in this field outside of 'home anti-virus'.

Sure, I can ask around on server forums, but I think members on HF know much more than most average people on anti-virus solutions. So I always check here first before anywhere else.

Atara - May 22, 2014, 2:37 am

Do you want a free or paid antivirus: Paid
Computer specs:

I am looking for an antivirus that:

- Very high detection rate
- Does not take too much CPU
- Very good anti-phishing
- A strong firewall

At my internship we use a TrendMicro's edition, I can't tell you which one too, I'll check it on Monday when I go back there. TrendMicro's solutions are apparently one of the best for enterprises/companies.

With your specs and the criteria you gave me, I'll suggest you ESET Smart Security Antivirus. ESET products are very more light-weight than Kaspersky's products and still have a very high detection rate as well as an integrated firewall and antiphishing feature.

Sam_ - May 22, 2014, 11:39 am

Do you want a free or paid antivirus: I'd like a free suggestion and a paid suggestion.

Computer specs: Windows 7, i2500k @ 4.0GHz, 780Ti Sc, 8GB of 1600MHz Ram

I am looking for an antivirus that: Offers good real-time security that won't break the bank.

Something with a very high detection rate, won't interfere with gaming and streaming, and won't eat up my CPU.

Currently I'm using Microsoft Security Essentials and the free version of MBAM.

King Cin - May 22, 2014, 12:52 pm

Hi, I'll be assisting you.

Firstly, please note that Malwarebytes Anti Malware is not an antivirus. You may already know this, but I tell everyone this. Disregard if you had the knowledge already.

Secondly, judging by your specs, I recommend you Kaspersky. Although it uses up more resources, you should be able to handle it without problems. Kaspersky is one of the, or even the best paid antivirus programs. It has a very high detection rate and will protect you properly.

Aura - May 22, 2014, 1:52 pm

I don't even know if I can help in that thread anymore ...

jimmy666 - May 23, 2014, 3:03 am

Do you want a free or paid antivirus: i wan't a paid anti virus

Computer specs: 3.2GHz, 3gb RAM , 320 HDD ,AMD phenom II X2 555 processor ,windows XP 2002 sp3

I am looking for an antivirus that: I am not a president of US so i don't need a virus "anti-virus" who constantly scanning my PC and using my CPU cycles all i wan't is a decent light weighted anti-virus with smart scan capability .My main concern are :-

- 1.) Need a quick scan (low CPU usage) who can scan HDD ,external HDD,disk, Pen drive ,mobile ,tablet etc .
- 2.) Parental control :i must have control over what website could be accessible or not + i need control over program that they could use internet or not(firewall etc)
- 3.)THE MOST IMPORTANT THING is i must have full control over anti virus, means : auto update on/off , auto scan on/off , i don't wan't quarantine or deleting anything without asking (or option to do it automatically or not) , and specially browsing restrictions i don't want some anti virus to BLOCK me from going to a website instead a WARNING would be better so that i could choose myself .

Other information :

past few years i have been using quick heal , it was awesome except few moths before it changed completely and it's no more "quick" heal.

currently i am using Kaspersky trial version it's pretty good but few things are very annoying :

- 1.) it's not that much user friendly
- 2.) update takes forever to complete (i think kaspersky server sucks , it updates @ 10 kb/sec and i have higher internet connection , but it may also be because i m using trial version but still it's a bad sign)
- 3.)again it's not so user friendly and easy going software.

Thank You :)

Aura - May 23, 2014, 4:01 am

With these specs and what you're asking, I would go with ESET Nod32. It's more light-weight than an edition of Kaspersky Antivirus, is one of the best Antivirus there is on the market, it's user-friendly (and this according to a lot of members on HackForums), have a quick scan feature and it's customisable as well. If you want more information on this Antivirus, you can always send a PM to Maitricks.

King Cin - July 18, 2014, 8:08 am

Bringing this back up. A lot of antivirus-related questions lately.

MrBenny - July 20, 2014, 7:34 am

What type: free

Specs: 64 bit, mac osx 10.9.4, 8 gb ram, dual core i5 processor, intel graphics hd 4000

Current antivirus: none

I am looking for an antivirus that offers the best real time protection for free

King Cin - July 20, 2014, 11:44 am

(Jul 20, 2014 07:34 AM)MrBenny Wrote: [\[CITE\]](#) What type: free

Mainly just gaming and browsing, and don't really mind about resources only play league and isn't that intensive

Aura - July 22, 2014, 5:11 pm

(Jul 22, 2014 05:09 PM)Mudge. Wrote: [\[CITE\]](#) Mainly just gaming and browsing, and don't really mind about resources only play league and isn't that intensive

Alright then here's the four choices that you have :KasperskyKaspersky Internet Security (middle package)

Kaspersky PURE 3.0 (full package)

ESETESET Nod32 (middle package)

ESET Smart Security (full package)

All these products include both an Antivirus and a Firewall, so you'll be able to give the firewall responsibility to these Antivirus and not Windows Firewall. ESET products uses around 200-300MBs less RAM than Kaspersky's products, but for being a KIS user for 7 years, I never noticed big resources usage from it. Kaspersky and ESET are the two top Antivirus company at the moment and their products are they only ones worth paying for in my opinion.

Yeah but if the OP isn't looking for any other features other than the basic ones, recommending Kaspersky PURE and ESET Smart Security isn't worth it since he would buy a product that he wouldn't use completely.

@Viper: Chuuut I already answered your questions ...

King Cin - November 29, 2014, 2:36 am

We are still doing this. Feel free to post.

Wired? - November 30, 2014, 7:34 am

I want a free/paid antivirus: Paid

Computer specs: <http://prntscr.com/5bqlne>

Operating System: Windows 7 Ultimate

I am looking for an antivirus that: (Obviously) protects against most viruses; has a high detection rate, easy to use interface, fairly cheap (preferably less than \$60), good customer support, internet security (like how Avast! blocks you from entering infected websites, warns you of bad emails, etc.), easy to customize.

I mainly do this on my computer: Gaming, Watching videos, and making stuff

Side note: I visit a lot of websites in my free time when I'm bored and I download a lot of things. I've been using a free antivirus for months and been careful of what I download, and I haven't gotten anything but a few bits of adware. I really only want a paid antivirus just as a security blanket to make me feel even more secure.

King Cin - November 30, 2014, 8:33 am

The price is \$60 for 2 years (sale until the 1st of December)

If that's too much, you can purchase ESET NOD32:

<http://www.eset.com/us/home/products/antivirus/>

\$40 for 2 years (sale until the 1st of December)

Alright, thanks for the recommendation. Is ESET better than Kaspersky?

King Cin - November 30, 2014, 9:21 am

(Nov 30, 2014 10:18 AM)Wired™ Wrote: [\[CITE\]](#) Alright, thanks for the recommendation. Is ESET better than Kaspersky?

I'd say they are on par with each other. The only reason I recommended ESET over Kaspersky is because you mentioned gaming. Kasperky asks more from your system than ESET, which can be annoying while gaming.

SIM-1729678 - November 30, 2014, 9:24 am

I want a free/paid antivirus: Paid.

Computer specs:

I am looking for an antivirus that: Can detect most viruses or malwares.

I mainly do this on my computer: Photoshop, game, code.

I currently run :

And

I'm pretty sure my system can handle it, so with that in mind, is ESET still good?

One thing that I like already is that I've noticed a lot of crypters having issues with ESET detecting their files.

King Cin - November 30, 2014, 10:50 am

One thing that I like already is that I've noticed a lot of crypters having issues with ESET detecting their files.

On the contrary, ESET is a pain in the ass for malware developers. Their antivirus is often the first to pick up new malware. This includes crypted RAT servers.

For you, I would go with Panda Cloud Antivirus. You have low specs, so we want to limit it's usage and therefore a cloud-based Antivirus is more suitable.

Using an Antivirus doesn't make your system 100% safe, hence why you also have to use your brain, common sense and other protection utilities in order to stay as secure as you can be.

Sadly, there's no free Antivirus that can do what you want it to do. You'll have to use a free Antivirus (avast! or Avira) in conjunction with a password manager (LastPass is a good free one). As for the "Pretty much if it looks interesting to me i will download it and run it." part, this is just plainly bad. This is exactly how you get infected and your information gets compromised. I strongly suggest you to learn more about Virtual Machines and use one from now on when you're doing this.

Personally, I despise AVG products since they use "adware" like methods when you try to uninstall them, are bloated, takes up a lot of resources and I find them buggy in overall. There's a lot of other Antivirus products worth buying before AVG products.

Derrick420 - December 1, 2014, 5:52 pm

You already have the standard free protection setup that I usually recommend, so I have nothing to say about that.

If you want a paid Antivirus with a firewall, ESET Nod32 or Kaspersky Internet Security should fit your needs, they are "Internet Protection suite" and therefore include Antivirus, Antimalware and Firewall.

Zakarum - December 2, 2014, 5:48 am

I want a free/paid antivirus: Suggest both. I currently use ESET Smart Security 8 and Malwarebytes Anti-Malware

Computer specs:

Processor: i7-3520M CPU @ 2.9GHz

Video adapter: GeForce GT 630M

Memory: 12GB RAM

Operating System: Win 7 x64

I am looking for an antivirus that: Offers real time protection with moderate false-positives.

I mainly do this on my computer: Browsing, Downloading, Gaming and some eWhoring.

Thank you for your time ?

Aura - December 2, 2014, 5:56 am

You have one of the worst CPU in history.

At this point, I would recommend Panda Cloud Antivirus and TinyWall since they are both light-weight and efficient. You won't really get a free Antivirus that have a Firewall included, except for Qihoo 360 IS.

9/11 - December 5, 2014, 5:55 pm

Hey Panda Cloud Antivirus didn't work. Every time I ran it it would just close. No gui would come up or anything.

Aura - December 5, 2014, 5:59 pm

Aura - December 5, 2014, 6:11 pm

Apparently you have another Antivirus installed ?

Cerber AntiVirus (Version: 0.1.1652 - Mega HighTech S.L.) Hidden
<http://www.cerberav.com/>

Start by uninstalling it.

9/11 - December 5, 2014, 6:12 pm

Yeah that got installed when I ran something. How can I uninstall it if it's hidden?

Aura - December 5, 2014, 6:13 pm

(Dec 5, 2014 07:12 PM)Maihym (Lord Fukquad) Wrote: [\[CITE\]](#) Yeah that got installed when I ran something. How can I uninstall it if it's hidden?

Try the manual uninstall :

<http://www.shouldiremoveit.com/Cerber-AntiVirus-2013-38005-program.aspx>

Uninstaller is located there :

Uninstaller: C:\Program Files\Cerber AntiVirus\uninstall.exe

9/11 - December 5, 2014, 6:30 pm

You'll never guess why it wasn't working. I had Firefox set to automatically detect proxy settings and that was affecting the installation for some reason. #Logical

Also I deleted all the files linking to Cerberus and it still says it's installed in that program.

Aura - December 5, 2014, 6:32 pm

(Dec 5, 2014 07:30 PM)Maihym (Lord Fukquad) Wrote: [\[CITE\]](#) You'll never guess why it wasn't working. I had Firefox set to automatically detect proxy settings and that was affecting the installation for some reason. #Logical

Also I deleted all the files linking to Cerberus and it still says it's installed in that program.

Because the "Uninstall" registry key is probably still listed. Deleting it manually or via JetClean should do the trick.

That's a weird issue.

D?xing - December 5, 2014, 10:57 pm

I want a free/paid antivirus: If paid is actually worth it then I do not mind

Computer specs: i7 4930k 16 GB ram

Operating System: Windows 7

I am looking for an antivirus that: Will not mess much with my ram or cpu(if possible)

I mainly do this on my computer: Gaming

9/11 - December 6, 2014, 12:43 am

(Dec 5, 2014 07:32 PM)Aur? Wrote: [\[CITE\]](#) Because the "Uninstall" registry key is probably still listed. Deleting it manually or via JetClean should do the trick.

Is there anything like JetClean but for drivers. I want to make sure all my drivers are up to date with the proper version of hardware.

What a rig man... ? i recomend kaspersky internet security or bitdefender (both are paid) ? , but if you want the free one, you can try avast or avira (both are really good)

King Cin - December 6, 2014, 4:00 am

(Dec 6, 2014 04:27 AM)Arrandale Wrote: [\[CITE\]](#) What a rig man... ? i recomend kaspersky internet security or bitdefender (both are paid) ? , but if you want the free one, you can try avast or avira (both are really good)

Kaspersky and Bitdefender both use up a lot of resources. He was asking for something lightweight.

If you want something really lightweight, you should go with Panda Cloud free. If you want a paid one, I recommend ESET Smart Security or NOD32.

Aura - December 6, 2014, 7:34 am

(Dec 5, 2014 11:57 PM)D?xing Wrote: [\[CITE\]](#) I want a free/paid antivirus: If paid is actually worth it then I do not mind

With these specs, you can run Kaspersky Internet Security or ESET Nod32 and you wouldn't notice a difference at all.

(Dec 6, 2014 01:43 AM)Maihym (Lord Fukquad) Wrote: [\[CITE\]](#) Is there anything like JetClean but for drivers. I want to make sure all my drivers are up to date with the proper version of hardware.

You don't need to use programs to update/install drivers. The only drivers that needs to be updated are your graphic card drivers. Updating your other drivers won't do anything, nor boost the performance of your hardware.

King Cin - December 9, 2014, 11:19 pm

We're still doing this. Had a bit of a busy period, but I'll start posting here again.

Accelerator. - December 10, 2014, 4:23 am

I already have an antivirus but none the less I would like to see your opinion.

I want a free/paid antivirus: Paid

Computer specs: Intel Dual Core 3ghz, AMD Radeon HD 6900, 8gb Ram

Operating System: Win 7 64bit

I am looking for an antivirus that: Protects me from downloaded viruses and infected websites.

I mainly do this on my computer: Gaming

Aura - December 10, 2014, 4:47 am

Either Kaspersky Internet Security or ESET Smart Security. Disable Gaming Mode on both (even if it's disabled by default, make sure it is). You should be good with that.

Accelerator. - December 10, 2014, 4:49 am

Aura I am currently running 'Nod32 Antivirus 8'. Should I change?

Aura - December 10, 2014, 4:49 am

(Dec 10, 2014 05:49 AM)Ken Kaneki. Wrote: [\[CITE\]](#) Aura I am currently running 'Nod32 Antivirus 8'. Should I change?

ESET Nod32 doesn't provide a firewall, which one do you have right now ? I don't know if ESET provides you with a discount if you want to "upgrade" product from a current one.

Accelerator. - December 10, 2014, 4:56 am

(Dec 10, 2014 05:49 AM)Aur? Wrote: [\[CITE\]](#) ESET Nod32 doesn't provide a firewall, which one do you have right now ? I don't know if ESET provides you with a discount if you want to "upgrade" product from a current one.

Is ESET NOD32s only lacking feature the firewall? Because I have the program 'Comodo Firewall'. Anything else the upgraded version of ESET provides?

Aura - December 10, 2014, 5:01 am

Comodo Firewall is better than ESET's firewall, I was wondering if you had one or if you were using Windows Firewall. If you're okay with Comodo (dem HIPS), you'll be good.

Ahh okay, thanks for the advice Aura!

TheDFighter - December 10, 2014, 5:42 am

I want a free/paid antivirus: Free

Computer specs: Intel Core i5 2419M, nVidia Geforce GT 540M, 8gb ram

Operating System: Windows 7

I am looking for an antivirus that: Protects me from virus in programs, and infected websites. Should have a whitelist option though.

I mainly do this on my computer: Gaming

Prince™ - December 10, 2014, 8:32 am

I want a free/paid antivirus: I would like to hear them both. Each one is good.

Computer specs: i5-4670K, 8GB DDR3 RAM, Gtx 760.

Operating System: Windows 7 [Soon to be 8.1. So please consider it too!]

I am looking for an antivirus that: Umm. I'm a heavy internet user so an antivirus that can protect me from internet stuffs and also shouldn't make my PC run slower.

I mainly do this on my computer: Gaming, YouTube, Live streams. At maximum, that's it.

Aura - December 10, 2014, 9:30 am

Both of you seems to have similar specs so, as a free Antivirus, you can pick either Avast or Avira (which both have "white-list" features) and add Comodo Firewall (for automated protection) OR TinyWall (for light-weight protection, however you'll need to customize it).

As for a paid Antivirus, both of you will need a Firewall, so might as well buy an Internet Security Suite, either Kaspersky Internet Security or ESET Smart Security.

Prince™ - December 10, 2014, 12:08 pm

ESET Smart Security (for lower specs) or Kaspersky Internet Security (for medium specs). What do you mean by "enough" in the specs as well ?

Dexter - December 11, 2014, 1:58 am

(Dec 10, 2014 09:44 PM)Aur? Wrote: [\[CITE\]](#) ESET Smart Security (for lower specs) or Kaspersky Internet Security (for medium specs). What do you mean by "enough" in the specs as well ?

I have a pretty good computer, good enough specs to run any AV. So don't base your opinion on how good or bad my specs are. That is the point I was trying to make.

Are you sure about Kaspersky? You have any thoughts on Bitdefender?

Aura - December 11, 2014, 5:56 am

Bitdefender have a buggy GUI/engines and takes up a lot of resources compared to both ESET and Kaspersky. Also, their detection rates are better than Bitdefender.

Yes, I tried it myself and it works.

By the way, Kaspersky actually lets you to upgrade to 2015 version with 2014 key.

If you log in to your Kaspersky My Account, they let you to download the 2015 update for whatever 2014 product key that you have. :)

When you want real security reviews, don't take them from PCMag. I suggest you to update your Windows to Windows 8.1 to start off. If you currently have avast!, you don't need to change it, however I suggest you to add a firewall as the free version of avast! doesn't have one. You can take either Comodo Firewall for extreme security, or TinyWall if you want to customize, set your own rules, etc. If you want a more light-weight Antivirus product that will fit your computer specs, swap avast! for Panda Cloud Antivirus, a Cloud-based Antivirus. If you are to pay for one, I would take ESET Smart Security as it's light-weight.

Never have more than one Antivirus installed at the time on a system. So uninstall avast!, and go with ESET Smart Security. This ESET product includes a Firewall, which means that you won't need Comodo Firewall if you install it.

avast! or Avira would do the job perfectly fine for you. However, none of these comes with a firewall, so you'll have to get one from a third party. Comodo Firewall is good, but the HIPS can be a pain in the ass if you don't know how to manage it. ZoneAlarm is another alternative. You can use TinyWall (simplistic) if you know how to customize your own rulesets.

If you want absolute protection without having to do anything, go with Comodo Firewall. HIPS stands for Intrusion Prevention System, basically, each time you want to run a program or script and others are called in the back-end, Comodo Firewall will notify you about it. ZoneAlarm is also good, in the end it's up to you.

Aura - December 20, 2014, 5:33 pm

(Dec 20, 2014 06:31 PM) twalig Wrote: [\[CITE\]](#) Oh mybad, I prefer a free one. And I download a lot of bots/tools and stuff like that.

I suggest you to start using a secure VM in order to do that and see if the files are infected before moving them to your host system. There's no Antivirus that can protect you against what you're doing, since what is failing right here is your common sense, and not a software.

You can use avast, Avira or Qihoo 360 IS (not TS) and add a Firewall. Comodo Firewall if you want to know everything that's going on your system or ZoneAlarm if you want a more laidback one.

twalig - December 20, 2014, 6:01 pm

Even there, there's no Antivirus or security software on this planet that will protect you if you download suspicious files. Bots, hacking tools, etc. are suspicious and yes, your Antivirus will throw false positives sometimes, but it's for a good reason too.

?Dødgygeez - December 21, 2014, 9:12 am

I want a free/paid antivirus: Either; whichever is best.

Computer specs: [\(Click to View\)](#)

Operating System:Windows 7 Ultimate: 64 bit

I am looking for an antivirus that:Protects me (real-time), uses low resources and actually allows me to decide the fate of quarantined files. (I previously had AVG premium and Avast and after a scan, neither of them allowed me to restore a file that was quarantined, or permanently delete it.) And I want an Anti-Virus that will allow me to make exceptions of what not to detect (ex. exclude a directory from a scan).

I mainly do this on my computer:Browse the internet. Play games. Watch po... I mean, YouTube. Yeah, I think I'm past my excessive downloading phase but I wouldn't be surprised if I am currently heavily infected due to how many suspicious things I have downloaded in the past. My RAM usage is almost always constant at around 70-80% with only Google Chrome open (and a couple useless background processes), and when I play games I am forced to close chrome and MalwareBytes Anti-Malware just to be able to run the game and even then it does not perform that well. This never used to be the case so I presume that I am infected ;P So yeah, I don't know if my RAM usage is always so high because 6GB is not enough? Or I am infected? Both? I am clueless :D

Any assistance is appreciated.

Kind Regards,
~ dodgygeez

Aura - December 21, 2014, 9:17 am

Following your specifications, I would go with ESET Smart Security. It have everything you're looking for. While you're at it, I noticed that your WPI score isn't updated, you should update it ?

<http://www.sevenforums.com/tutorials/263-windows-experience-index-update-refresh-score.html>

Yeah, I didn't even realize it until I took the screenshot and refreshed my WEI before you replied haha!

Nevertheless, thank you so much for recommending ESET Smart Security. It is amazing. It uses exactly 17x less resources than MalwareBytes (as a comparison) so I'm very impressed! It does everything I requested, I can not thank you enough for choosing this one for me.

It has all these features which I don't understand... Network attack protection IDS, botnet protection and all this... It's even got a personal firewall.

However it is a little tricky to play around with; it's occasionally difficult to navigate through the options and all of that but I presume I will get used to that.

I am very impressed with this Anti-Virus so far and hope that it will work a treat alongside MalwareBytes.

EDIT: SmartSecurity 8 has a Gamer Mode! This is perfect! Further reduces demand for resources, instantly suspends pop-ups, scheduled tasks and scans. I'm glad I posted here instead of just googling "Best Anti-Virus Software 2014" hahaha!

Thank you very much.

Kind Regards,
~ dodgygeez

P.S: btw Aura, are you very familiar with MalwareBytes? If so, then could I possibly send you a PM with a couple of questions with 2 minor issues I have with it?

Aura - December 21, 2014, 11:32 am

Malwarebytes is made to work alongside any Antivirus, so you should be good ? And yes, our recommendations are usually better than Google ones. I'm quite familiar with it, feel free to PM me any questions you have for it.

B?ue - December 21, 2014, 11:18 pm

I want a free/paid antivirus:

Paid

Computer specs:

Spoiler ([Click to View](#))

(Sorry, some parts irrelevant, C&P from steam)

Quote:AMD FX 8120 4Ghz 8 Core ~/~ Hydro H110 Watercooler

XFX R9 280X 3GB

Corsair Carbide 500R Case White ~/~ NZXT Sentry FX Controlle

Corsair Vengeance Pro 16GB 2133Mhz ~/~ Grey Trim

Corsair M65 Mouse ~/~ Corsair MM600 MousePad

Gigabyte 970A DS3P Motherboard

WD 1TB Blue ~/~ WD 1TB Black ~/~ -WD 1TB Green ~/~ Sky 320GB

Operating System:

Windows 7 Ultimate 64

I am looking for an antivirus that: Would be nice but all aren't essential.

Has many features.

High detection rate

Android
Back up (Don't worry too much)
Cloud
Software updater (Like avast)
Firewall maybe, Not too fussed.
Yearly payments.

I mainly do this on my computer:

Gaming
Ordering stuff
Studies
TOR (Yes...)

Probably a lot more computing/Networking stuff, starting new studies for IT soon.

Already got Avast Free, really like it. Just looking for other options before I go and buy it. I would kind of like the best I can get, even if I don't really need it. but either way, your support is appreciated ?

Aura - December 21, 2014, 11:32 pm

Except for the software updater (avast! is one of the only to have it, you can check out SecuniaPSI however for that, I use it and I love it), both ESET Smart Security and Kaspersky PURE 3.0 would fit you. I'm including Kaspersky PURE 3.0 because it offers a back-up feature, but if you don't need it, use Kaspersky Internet Security. In the end, it'll be your call. Here's links to both products so you can compare their features and decide which one you like the most.

Kaspersky PURE 3.0 :

http://www.kaspersky.ca/products-services/home-computer-security/pure?bid=b2chp_prods_pure

ESET Smart Security : <http://www.eset.com/us/home/products/smart-security/>

Both of these solutions also includes many other features, high detection ratio (at the top), Cloud protection and features, firewalls and yearly payments. Also, for pretty much every products, except Norton, if you want the Android version of an Antivirus, you have to pay an extra. However, I'm aware that Kaspersky have a free Internet Security app in the Google Play Store. You could look it up.

The RooT - December 26, 2014, 9:21 pm

I want a free/paid antivirus: Free

Computer specs: 4GB RAM - 32bits

Operating System: Windows 7 Professional

I am looking for an antivirus that: Protects my PC & Is really lightweight

I mainly do this on my computer: Browse Forums & Other Websites

Aura - December 26, 2014, 9:27 pm

(Dec 29, 2014 09:21 AM)LewbJob Wrote: [\[CITE\]](#) 360safe.com the 360 total security also known as the site that shows up when searching for qihoo

It's most likely because you tried to install 360 TS, which contains a "PC Booster" feature. It's true that by disabling these services (the updaters), your boot time will improve but not by a lot. Hence why I tell you to download 360 IS, that doesn't have that feature instead of TS.

LewbJob - December 29, 2014, 8:25 am

Yes isn't a suitable answer for the first question ?

Also, don't test cracked programs straight on your host system, it's the best way to get infected and no Antivirus can block these at 100% since it's the user's fault here. Start using a Virtual Machine for that.

LewbJob - December 29, 2014, 9:03 am

For the first one, you have enough specs to run any Antivirus you want. So it's your call between Kaspersky Internet Security and ESET Smart Security. For the second one, I would say either avast! or Avira, however, I think you want to keep resources for the video editing, so Qihoo 360 IS could be a really good choice.

If you want "Internet Security" by an Internet Security suite, none of them are free (at least, no good ones). You'll have to combine a free firewall and a free Antivirus. So avast!, Avira or Qihoo 360 IS, in combinaison with either ZoneAlarm or Comodo Firewall (if the HIPS bugs you out, disable it, Comodo is the best free firewall you can have in my opinion).

ArnieBob - December 30, 2014, 7:56 am

(Dec 30, 2014 08:52 AM)Aur? Wrote: [\[CITE\]](#) If you want "Internet Security" by an Internet Security suite, none of them are free (at least, no good ones). What's HIPS? Also, which one do you recommend the most out of Avast, Avira and Qihoo 360 IS and why?

Thanks for your help.

Aura - December 30, 2014, 8:06 am

(Dec 30, 2014 08:56 AM)ArnieBob Wrote: [\[CITE\]](#) What's HIPS? Also, which one do you recommend the most out of Avast, Avira and Qihoo 360 IS and why?

Thanks for your help.

I have no favorites between the three of them, however, I like Qihoo's interface and the recent performance it have for the detection ratio would make me want to use it over the others. However, avast! and Avira have been out longer than Qihoo's products, and so I would trust them in a way that they made their proofs already in the past. HIPS stands basically for Intrusion Prevention System, a feature that monitors the network or the system for suspicious activities/behaviors and blocks them to report them to you and let you know what's going on.

Oh God, for \$100 you can have 3 licences of any Antivirus you want (and even there, it would cost like \$80 max). Either Kaspersky Internet Security or ESET Smart Security will do it for you ?

Yertle - December 31, 2014, 4:14 pm

(Dec 31, 2014 05:11 PM)Aur? Wrote: [\[CITE\]](#) Oh God, for \$100 you can have 3 licences of any Antivirus you want (and even there, it would cost like \$80 max). Either Kaspersky Internet Security or ESET Smart Security will do it for you ?

Okay, thank you!

Would you recommend me to buy it in an electronic store or just online?

<http://www.eset.com/us/home/products/smart-security/>

Scymo - December 31, 2014, 4:14 pm

I want a free/paid antivirus: free please

Computer specs: intel i5-321M, 8GB RAM(Laptop)

Operating System:, Windows 8 64-bit

I am looking for an antivirus that: Is very non-annoying. Like one that won't constantly keep popping up and annoying me. Something simple.

I mainly do this on my computer: View youtube, forums, photoshop and google stuff

Aura - December 31, 2014, 4:18 pm

<http://www.eset.com/us/home/products/smart-security/>

It's usually cheaper in store than online. It's always higher on the official vendor website.

Qihoo 360 Internet Security should do it for you then. I would recommend you Comodo Firewall as well (as Qihoo 360 IS don't have a Firewall, no free Antivirus do) but the HIPS gives you a lot of pop-up. You could however use it and disable it, but therefore there would be no real point in using it.

AAE32 - December 31, 2014, 4:21 pm

You should install your Antivirus to the SSD for maximum performance, yes. Also, stop using Sandboxie on your host system, move to a VM.

Where do you live?

Solspwee - January 2, 2015, 4:19 am

I want a free/paid antivirus: Either, I believe paid would probably get me what I'm looking for.

Computer specs: i7-4770 - Gtx 770 - 16GB's RAM - multiple HDD's.

Operating System: W7

I am looking for an antivirus that: Basically on the cutting edge of detection. Allows certain processes and will allow me to easily temporarily disable it.

I mainly do this on my computer: Heavy export of media, gaming, work, and other things.

I understand common sense is the best AV, I use VM's as a sandbox for uncertain exe's then check my process list and what not. I currently use AVG but it's starting to annoy me with it's pop-ups and what not. On top of that it constantly forgets the areas I tell it to ignore. I constantly have to disable it.

Also, whichever you recommend me, could you please go into detail as to why you recommend that AV? Or if you already have, just link me to some review or what not. Because as far as my understanding about AV's go, there almost all the same, though some get updated quicker (I hear NOD32 get thrown around a lot) than others and some have extra features.

Cracked tools are almost always backdoored, I suggest you stay away from them.

As for my recommendation, I recommend Panda Cloud if you're looking for something super-lightweight, and either Avira or Avast if you want something a little bit heavier.

Aura - January 3, 2015, 12:20 pm

(Jan 3, 2015 04:53 AM)BladeZ201 Wrote: ([CITE](#)) Hi there again Aura, I tried the 30day trial for ESET Smart Security 8 and it seems the firewall is really annoying as i have so many Steam games. I have to disable the firewall to be able to play the game online.

If you don't want a Firewall, downgrade to ESET Nod32, as it doesn't have one. Also, ESET have a

Gaming Mode that should enable you to play games without pop-ups.

What are you looking for exactly?

You have great specs, so your computer could easily handle Kaspersky running while gaming.

If you want something lightweight and paid, I'd go with ESET NOD32 or Smart Security.

If you want something moderately lightweight and free, I'd go with Avira.

If you want total protection that's paid, and heavy, you should go with Kaspersky.

(Jan 4, 2015 06:55 AM)Freerunning Wrote: [\[CITE\]](#) I want a free/paid antivirus: Free

Computer specs:

CPU: i7 4790K

GPU: GTX 970

RAM: 8GB Vengeance

PSU: XFX 750W

MOBO: Z97X-SOC

HDD: 1TB

Operating System: Windows 7 Home Premium 64 Bit

I am looking for an antivirus that: Is gonna ensure my safety

I mainly do this on my computer: Gaming

I have an high budget, just need the best really :)

If you need the best, without extra features, Kaspersky Internet Security or ESET Smart Security is for you. If you need the best with extra features like encrypted drive, password manager, cloud storage, etc., take Kaspersky PURE 3.0.

Vizolic - January 5, 2015, 2:58 pm

I don't need the extra features so I got to pick between Kaspersky Internet Security and ESET Smart Security... I don't know which to pick

Any will be fine, it's your pick honestly. You can compare their features and see which one attracts you the most.

Vizolic - January 5, 2015, 3:06 pm

Is Kaspersky PURE 3.0 the same as Kaspersky Total Security?

Aura - January 5, 2015, 3:07 pm

(Jan 5, 2015 04:06 PM)Vizolic Wrote: [\[CITE\]](#) Is Kaspersky PURE 3.0 the same as Kaspersky Total Security?

Kaspersky PURE 3.0 is Kaspersky Total Security. The name varies depending of the website you go on (country).

Vizolic - January 5, 2015, 3:09 pm

I can definitely afford the price of the total security, it it worth the money?

Aura - January 5, 2015, 3:14 pm

(Jan 5, 2015 04:09 PM)Vizolic Wrote: [\[CITE\]](#) I can definitely afford the price of the total security, it it worth the money?

It's worth the money if you intend to use all it's extra features. Otherwise, stick to Kaspersky Internet Security.

SoldierX - January 7, 2015, 2:26 pm

I have a windows tablet with following specs-

2GB Ram
1.35 Ghz Quad Processor
Windows 8.1 Complete (Not RT)

I basically surf study and play games.

This is my tablet config, take this into consideration.

I would stay with the default Windows Defender and raise the UAC on your tablet and harden the Windows Defender settings. Installing an Antivirus on a tablet, even Panda Cloud might slow it down. Otherwise, you can give Panda Cloud a go.

SoldierX - January 7, 2015, 2:46 pm

I have installed avast free :o
should i remove it?

Do you feel like it's slowing you downat the moment or not?

King Cin - January 13, 2015, 1:46 am

This is still available. I think we can easily say we've assisted 100+ members on this thread already.

Kraith - January 13, 2015, 4:23 am

I want a free/paid antivirus: either
Computer specs: i7 4770k / gtx 770
Operating System: windows 8.1 pro
I am looking for an antivirus that: will not eat my CPU up while gaming
I mainly do this on my computer: gaming

Singular - January 14, 2015, 12:01 pm

I want a free/paid antivirus: any (Mainly free but willing to get a paid AV, a recommendation on both would be greatly appreciated :D)

Computer specs: i5-3210M / GeForce GT 650M
Operating System: Windows 7 Ultimate

I am looking for an antivirus that: The best one that I can have for my comp don't really care about CPU usage

I mainly do this on my computer: Everything from gaming to work etc.

King Cin - January 14, 2015, 11:42 pm

I would recommend Avira or Avast as a free antivirus, and ESET NOD32 if you want a paid AV. This is my advice for both of you.

Go with ESET Smart Security, not NOD32 Antivirus. SS is the complete protection package of ESET and will offer more protection than NOD32 Antivirus.

Legendair - January 29, 2015, 3:25 am

I want a free/paid antivirus: ANY

Computer specs: I7-2630QM / GTX660M / 16Go

Operating System: W7 ultimate

I am looking for an antivirus that: don't take 50% of my CPU

I mainly do this on my computer: Gaming
