Thread: [Sellan | Acpt OMC, BTC, PP | Affiliate, Feedback Sys | Sell E-books, Codes, Netseal++](#)

King of Hearts - May 11, 2014, 6:14 pm

I'm on vacation. This site will continue to operate and will be administered by an irl friend of mine (he doesn't use HF). He has access to all emails, databases, servers, etc.

For help, please contact us using the <http://sellan.net/contact> page.

Hey,

I'll have a thread design up later on but for now here we go: <https://sellan.net>

Sellan is a new e-commerce solution for those who'd like to accept multiple types of currencies and paypal and sell digital content. You can sell many types of items (including but not limited to e-books, downloadable items, codes, unique items separated by commas, custom software including licensing support using the custom feature, and much more).

If you'd like more info visit: <https://sellan.net/features>

If anyone wants to see the service in action first, I've added some test products for you to use. [Rose picture \(\\$01\)](#).

[Custom Note. Limited Quantity. \(\\$01\)](#).

[Get an e-mail containing Google.com's source \(testing the function bit use file_get_contents\). \(\\$01\)](#)

Tested it out for King. Works like a charm. Very awesome interface, fast and efficient.

King of Hearts - May 11, 2014, 11:08 pm

Thanks for the vouch guys. I'm working on a thread design to make this look better.

Boomboxes - May 12, 2014, 4:39 am

I've actually known KoH for a while now, and he told me about Sellan a while ago. I seriously think this is something great, and think a lot of people should start using this. Keep it up KoH, keep me updated about it :)

Yes. Each buyer will be emailed a unique id. To do this, first click on add a product. Then change product type to Accounts/codes/serials/etc. Then add the xbox live codes in the space provided, separating each code with a comma. There are a couple of people who use this site to sell xbox live codes.

Does your system include a payments table that:adds all payments up

Keeps track of users refunded

Keeps track of disputes

Keeps track of users who won disputes & users who lost disputes

Separate payment calcs for different payment processors, ex. PayPal, BTC, LTC, etc.

Something like that? If it included a nice table like that with a bit more, I'd buy into it.

Keeps track of users refunded I don't have a refund option. So N/A

Keeps track of disputes I don't have this because the money is sent from coinpayments. N/A

I've added an affiliate system. Here's more info:

Quote:When adding a product, you can choose if you want users to be able to create affiliate links for the product. If you check the checkbox, on the product page there will be a link "Become an Affiliate". The link will open a popup box which will allow anyone with a paypal address to become an affiliate. Once an affiliate enters his/her email account, he is sent an email with instructions (login information and affiliate url). Whenever a buyer buys a product through an affiliate url, the database is updated and the number of Sales and number of Unpaid Sales are both incremented. Once a merchant pays his affiliate, the merchant can reset the number of Unpaid Sales to zero. To prevent merchants from scamming affiliates, every time a buyer buys a product through an affiliates url, the affiliate is sent an email.

King of Hearts - June 25, 2014, 7:48 am

I've also added a custom feedback feature. Buyers will be sent a unique id and password with which they'll be able to leave merchants feedback.

I'm on vacation. This site will continue to operate and will be administered by an irl friend of mine (he doesn't use HF). He has access to all emails, databases, servers, etc.
