Thread: [Good way of testing you rat server no sandbox or anubis!!](#)

dishonoredI - May 12, 2014, 1:11 pm

1 go to <https://malwr.com/submission/>

2 submit your file

3 wait until your Darkcomet shows you that your server has been opened

Anubis somehow did not work for me but this did
GL?

kalebb - May 12, 2014, 1:50 pm

Your awesome; my sandbox just expired :)

yea this site is great and also easy and free enjoy it :D

aerithsorrow - May 12, 2014, 2:44 pm

Are you sure it's not sending to AV ?

This looks weird...

This looks weird... You only scan unencrypted files not encrypted files

klaas - July 1, 2014, 9:32 am

is it possible to look with a encrypted file? if so can you see the connections it makes also?

justmatty - July 1, 2014, 10:54 am

Thanks a lot for this! Not working for me, probably because my stub isn't working though...

Knight - July 19, 2019, 4:44 pm

Hello

Dear, how to create a rat with anubis?
