Thread: [Beginners Guide to Clash of Clans! \[Noob Friendly\]](#)

Sinq - May 13, 2014, 1:18 am

Clash of Clans!

What is clash of clans?

Clash of clans is a phone based game

available on the iOS or Android store where you run a village and

upgrade your defenses and offences to be the best clasher in the game.

It's free to download and can be very addictive.

Beware. You may get highly addicted.

Town hall upgrading.

This is one of the biggest decisions you make when it comes to clash of clans, so please make sure you're 100% ready before going along with this.

Some things you must consider when wanting to upgrade is; Defense Levels

Resource collector levels

Walls

These are the top 3 most important things when considering upgrading your town hall. First off look at your walls. When upgrading make sure they're all maxed out and you cannot upgrade them any more.

Also look at your defense levels, these include; Archer Towers,

Mortars, Cannons, Wizard Towers, etc.

If they're all maxed out GREAT! you're ready to look at the final step.

You want to keep your resource collectors as high as possible, the

reasoning is because they're your main source of elixr and gold income.

Once you upgrade those to max you're ready to upgrade your town hall.

After Upgrading your Town Hall.

Once you've finished upgrading your town hall you're going to have

to farm extensively. Make sure to always be loading up your troops

for battle. You will need to basically start again from level 1 and

upgrade your new items to the max level. You want to mainly

upgrade the Laboratory and army camps so you're able to raid in

bigger compositions. (Please refer to the bibliography for meanings.)

Another big thing you should be thinking about is re-arranging your

base, make sure to look up some nice designs for your specific

town hall. You don't want to keep everything everywhere because

people will come in and swoop it away.

Shields

So someones attacked your base while your taking a poop?

Well. Not to worry, it's not the end of the world. It should have a

small notification at the bottom right. Click on it and assess what

went wrong. Always replay your lost battles, it's always good to see

where you went wrong in your base design and alter it a bit!
Depending on how the raid went you will receive a shield. What a shield does is, it stops people from raiding your base for amount of time given.

Note: You can buy shields with gems.

Gems

Gems are in game currency. Due to the game being a free to download Supercell (Creators) must have some way to earn an income. Gems are the way they do so. You can purchase gems by pressing the little green plus button underneath your Elixir amount at the top right.

Builders Hut

Builder huts allow you to build and upgrade things. You start the game with 2 by default. You can get up to 5 huts. You will have to pay gems for this which will cost you more and more each builder. The rates are; 1st Builder = Free!

2nd Builder = Free!

3rd Builder = 500 Gems

4th Builder = 1,000 Gems

5th Builder = 2,000 Gems

Sorry I started running out of time so I didn't get to detail it more

But my future tutorials will be better!
