420 Blaze It - May 14, 2014, 3:02 am

This thread is closed and junked.

Aura - May 14, 2014, 5:30 am

A backdoor, a RAT and a torjan horse aren't standalone malwares category but trojan-based malwares. You might want to change that.

MouseDesign - May 14, 2014, 10:26 am

Yes, because this is complete. I expected much more.

King Cin - May 14, 2014, 11:21 am

Nice copy & pasted thread mate.

It could be him who made it imo, the user who posted the thread at that site got an award for joining "via" HF.

Hmm. Overlooked that.

If OP can prove to me that he is that guy, I will apologize.

Why would he copy parts of his own tutorial when he can copy the whole thing, is my question.

Flak - May 16, 2014, 5:54 am

Time to inform Omniscient I guess.. >_>

georgeziozas - May 16, 2014, 6:03 am

Well done.

I find the thread very usefull.

Congrats.

What do you need to inform him with?

This, lol.

I don't think that Omni will do anything about it

He certainly won't do anything 'bout this thread, but I'm sure he will disqualify him from his (Omni's) contest.

Aren't UB3R's expected to have the slightest intelligence? No offense, but replies like that are quite annoying.

Omniscient - May 16, 2014, 11:42 am

I probably should clarify I don't want the content on any other sites, blog, or forum.
