who cares, this is a hacking forum.

Does god exist... Fill this topic with crap. - Uhmhhh god... hacking???

Plz post in this thread if yu do enuf spam hear i may release this private shit that is actually public. - Obviously making people watch the thread so that when the shit is released more chance of +rep.

This stuff is the real low quality. Couldn't you just ban threads like this instead of 10 post limit. Also maby remove the religion part from the science. religion and philosophy section?

Yes this is a hacking fourm but we also supply other interests also thats why the "lounge" and many other sections are here for your interests therefore if you want to talk about jesus then you can blab all you want. makeing this post will do nothing but supply low quality posting.

So what's the rule you're suggesting?

"Please no threads about your religion being best."

If it's in the wrong section then report it. Otherwise I'm not going to make a silly rule.
