Favorite game(s): League of Legends, Skyrim, Binding of Isaac, Garry's Mod, Team Fortress 2, Fallout New Vegas, DayZ, Project Zomboid, and Payday 2

Some Things About Me: I play mostly League of Legends, but when I get bored, I hop on some other games, usually multiplayer ones so I can play with friends. In league of legends, I am currently Plat V and play almost everyday.

I'm on at least 4 or 5 hours a day and more on the weekends and enjoy playing video games with friends.

I like competitive games more than casual ones because I firmly believe competition, success, and failure all alike make you a better person at the end of the day, and that's the only way to improve your skills.

I'm currently in 11th grade in a Middle High School, top 5% of my class and plan on graduating early next school year.

I have great writing skills, you're welcome Homeland, and great grammar. I always try to help anyone out with whatever they need, be it video games or real life stuff.

Marauder ?? - May 14, 2014, 6:27 pm

Marauder's Instinct Application

Name: Marauder

Age: 16

Location: Hawaii

Steam ID: STEAM_0:0:25337398 or <http://steamcommunity.com/id/ShinzoFTW>

Roughly how many games do you own?: Close to 100 Steam Games I believe!

Favorite game(s): League of Legends, Arma 2/3, Dayz (Mod and Standalone), L4D2, BF4, Team Fortress 2, Counter Strike (Source, GO, 1.6,), Call of Duty: MW2, Bops 2

About Me: I am a 11th grade honors student currently living in Hawaii. I play on my school's varsity tennis team and am part of the National Honors society. When I'm not on the court or doing school work I'm usually on Teamspeak or Skype with my friends playing some League of Legends. Its been my total addiction for the past 4 years and I cant think of any other game I'd rather be playing. I'm open minded and try to take constructive criticism as well as I can to improve myself in school, tennis and league! I'm typically a cheery guy and try to bring a positive atmosphere wherever i go. I really look forward to joining in with some good guys that actually want to do some gaming! I though respawn was really for me but just like everyone else that left, i just felt no gaming was really happening...

My Skills

-Leadership: I am treasurer of my school's chapter of the National Honors Society and Parliamentarian for our Skills USA chapter. Both involve a relative variety of leadership opportunities and responsibilities that I hope will serve me well here

-Responsibility: From being a good and tryhard student (XD) in general i have developed a self proclaimed decent sense of responsibility, I will complete the requirements to remain in the group well before the dates that they are due and do so with the utmost quality

-Trustworthiness: After being entrusted with power through these leadership opportunities and carrying out plenty of deals on HF I have gained a sense of trustworthiness and will never deal wrongly upon another member. I'll middleman or perform any services needed for my fellow members!

-Gaming: I'm a relatively good gamer and play other games besides league. Hopefully I can teach a few othermembers some things, and pick up some things for myself! I'm always looking for chill people to play with and this just looks like the perfect place to do it!

-Intelligence: I'm not trying to brag or pass myself off as too smart here but I'm a pretty decent student in school and would be willing to do some free work of my Homework service for members, help them edit guides or whatever kind of things they need!

-Outgoing: As a member of Nexus, I will try my absolute hardest to be outgoing and provide a positive atmosphere to everyone in the group and do my best to contribute to the overall quality of the group whether it be by giveaways, guides or even just talking with members :)

-Passionate: As In anything, I try to put all of my effort towards participating. I am incredibly passionate about league of legends and would love to participate in game nights, team games, or any kind of League of Legends related activity!

-Coding Knowledge: Well I'm a bit of a noob in this area but I know some basic Batch and a little bit of Java, I could do some basic things if needed. I'll also add that I'm currently studying for my CCNA certification and would be willing to help others enrolled in the course for free!

Why you should accept me:

Gaming is something that I am very passionate about and I love playing within a group or community. PC Gaming is my favorite section of gaming, although I do also own a PS3. Instinct is proving to look like the best gaming group on HackForums at the moment and it would be truly amazing for you to accept me into the group. Currently my most played game is 'Rust' recently passing 200 hours, I would love to play with others and share my experience with the game as well as playing multiple other games with the members and hopefully them introducing some new games to me! Besides Steam, I have other games especially in Origin that I would love to play with others like FIFA 14, BF3 and BF4 etc. All in all, this group would be amazing to be in and I hope you take the time to consider my application and hopefully accept me! Have a brilliant day!

Roughly how many games do you own?:

To answer the question as it asks, I own roughly 140 games, but if you were to ask for an exact amount I own 137 games, varying from Far Cry 3 to Euro Truck Simulator ;)

Favorite game(s):

I have my games nice and organised, so this is easy ;)

My all time favorite PC game is definitely Counter-Strike Source though. It was a game my dad played as a teenager, so he in turn passed it down to me to play. me and him would've played a good 300 hours together when he had a computer. Unfortunately work and stuff got in the way of his spare time and we don't play video games together anymore.

Coming in second would be all of the Age Of Empires games. Again, my dad showed me this too. From an early age I watched him play from a seat directly next to him for hours on end. I eventually went on to play the game myself (took a while, my mum was always strict on video games) and absolutely fell in love. I would finish school, and could not wait to get home just to do my homework and jump on the PC.

Moments like these were essentially where my love for PC gaming began. I always looked up to my dad and still do, and through his guidance (I think) I have become a pretty knowledgeable gamer amongst all genres.

Thank you for taking the time to read my application, hopefully it is you Homeland! Looking forward to seeing what the Steam sector of Instinct can do for the community, and hopefully I can be someone who can help guide that.

Favorite game(s): My favorite has to be Counter Strike: Source. Reason being because it's where i really started as a PC gamer. From joining communities to making and managing my own i have mostly stuck around CSS. I have around 1579 hours loggeD.

I made a community around the beggining of last year. I am no longer the head cheif because it just took too much of my time and so i passed it down to a friend. I based around Counter Strike: Source by hosting a Jailbreak gamemode server. It has since prospered from their and i have expanded it from CSS to Team Fortress 2, Garry's Mod, CS:GO and Minecraft. It may not be the biggest community but i can honestly say im proud to have made it and see it still alive today.

<http://confoundgaming.com/>

I have been a member of steam since August of 2009 and am level 9 currently which isn't impressive but ive always wanted to go higher to show off my collection of backgrounds and all that. I also use a custom purple theme because the default is pretty ugly in my opinion :S I have an alternate account i honestly jsut made for TF2 trading purposes and as an extra backpack space. This is my inventory as well if anyone is interested :P

<http://steamcommunity.com/id/SCHURRSODAPOPOP13/inventory/>

Steam has even helped me with various other skills and learning experiences as well. I have learned a bit of gfx when trying to come up with neat in-game spray ideas, logos and transparent gifs. It has also showed me a bit of coding by having to edit and mess with my servers' FTP. Also a

bit about internet security when having my servers targeted by DOS attacks and resolving those issues. Also how to and what it means to be in a leadership position when managing and resolving issues related to my community.

In closing the best thing i have to say about steam and why i would love to join this group is because steam has really had a big impact on me throughout the years. It has introduced me not just to a variety of games but an entire community, friends and opportunities that i never would have had seen without it and that is why id love to be a part of this group, because steam was and still is such a big part of my life.

Also a quick crappy video i made >^<

Roughly how many games do you own?: According to steam library I have 84 games, however one of those games is a trial version (Arma 3). I also own about 50 Xbox 360 games, I do not own a Playstation 4 or Xbox One.

Favorite game(s): Mass Effect series, and probably Fallout 3 & New Vegas... I love a good ol' RPG.

Youtube Videos:

My Youtube channel has just a small amount of games, however each game is playable at over 60 FPS with the highest settings maxed out. Ignore how on some videos the border doesn't expand through the whole 1920 x 1080 monitor, it was an editing mistake. I've since learned to correct it.

Roughly how many games do you own?: In all, I own about 79 Games for the PC. I play about 6 of them actively though.

Favorite game(s):

My All-Time favorites are Counter Strike: Source, Counter Strike: Global Offensive, and Garry's Mod for Steam right now due to having a bad PC.

Non-Steam games include, League of Legends, Star Wars: The Old Republic and Minecraft.

Thanks for reading Homeland, I have been looking for an opportunity to join Instinct for a long time now and this might be my shot!

Roughly how many games do you own?: I got 99 problems but steam ain't one.

Favorite game(s): The only reason I got steam was due to CS 1.6 which I ended up playing a lot. Later on steam started selling other games and I ended up purchasing plenty due to how easy it was to store & handle the games. My favourite game of all time is Far Cry 3 and I can't wait for the 4th one. I used to play a lot of Left 4 dead but all my friends quit playing it so I rarely get the chance however I'd love to do it again. I also love Civ 5, GTA (just got it on steam), Batman and ofc AoE 2 which is my favourite game that I play whenever my friend's over which is sadly rarely.

Currently the game that I play mostly would be Payday 2. In general I love FPS games.

About myself::

I started gaming when I was 9 i guess prob younger, my mother was going to a friend of her and he had a playstation with some games, I played gta 1 and was the first game i played, there was a love for gaming, started playing CoD but started to suck at Ghost (my opinion) so i started playing bf4 again, I'm going to alot of LAN party's, some of them are competitive and i'm pretty good with tactics in BF4.

I would love to join Instinct because I know some people who are in Instinct which I play alot with, mostly Dokkii , and I would like to meet more people to talk to and play games with.

Roughly how many games do you own?: My current games list on steam is around 40 games, although owning 40 games certainly doesn't mean I play them all lol. I mainly play CS:GO and Call Of Duty 4. Both in the competitive scene, obviously CS:GO has its Competitive Matchmaking, which really is bullshit with the amount of hackers nowadays :/ But I have been purchasing ESEA membership for CS:GO monthly so I can play on 128TICK servers with ALOT less hackers :3 And I have recently got back into Call Of Duty 4 again, I used to play it tons on my old steam account, played competitive Promod for a long time, and also loved to hop on CodJumper servers! Going back has been nostalgic as fuuuuck!

Favorite game(s): As mentioned above, Counter Strike: Global Offensive, Call Of Duty 4 mainly! But I do delve into playing Arma games with friends, mainly arma II playing wasteland mod with friends, i tend to record videos on my games in the hope I record some funny shit. And some of those videos can be seen below :3
