Introduction

Welcome to my personal 'When all else fails' method. This method guarantees \$1 per day on complete autopilot.

So Yous...how do I start making money in my sleep?

Making money in your sleep has never been easier. Let me explain the process..

1). We will download this program and let it run in the background of our computer. It only uses 2% CPU

Quote:Sign-Up through my link if you appreciate me sharing these methods (does not affect earnings at all)

<https://coingeneration.com/auth/new/684217>

... or if you prefer sign-up without my link

<http://coingeneration.com/auth/new/>

2). Simply run the program and start earning! It runs in the background and only uses 5% CPU

3). What you are running is called a 'thread' the more threads you have the more you earn. You get a free one month trail thread when you sign up. This would have earned you \$30. To buy more threads they cost \$50 a piece and last an entire year. But think about it they each earn \$1 per day.

After your first trail expires you will have \$30 out of the \$50 needed to get a full thread that lasts 1 year. You can simply re-register (proxy recommended) and earn the other \$20 you need by running the program for a 2nd month.

Full threads cost \$50 and last 1 year. If you just buy 1 thread with money you already earned from running your two trail threads you would make \$365/year doing NOTHING

But if you're a hotshot with a super computer nothing is stopping you from running 10 threads at a time.

It's as easy to install as any other program and its completely harmless. The program works automatically, and will not interfere with other programs at all. It also won't bother you with annoying pop-ups. You won't even notice a difference in your computer's performance after you install our program. In fact the only thing you will notice because of our program is the increased size of your wallet. Feel free to check out the company's website they are a legit fairly large company with offices in Portugal and San Francisco :D

coingeneration is a scam....im sorry...i have an account for a year now and have many refs...but I cant payout and they already announce things that they dont make true...

Man16 - May 16, 2014, 7:24 pm

Show payment proof? No point posting a thread without.

anarchyreignsjustice - May 16, 2014, 8:26 pm

Yea i know a coin generation money maker, its called Cryptocurrency mining, and \$1 a day off 2% of a cpu? SCAM

Pjuklas - May 17, 2014, 1:17 pm
