Nope lel. There are much better deals on Ebay. There may be 500gb memory but most of the time people are selling ps3's for only \$200 with a few games.

That is a 'too good to be true' deal. Where does it ship to? Cheers.

Slick deals generally looks for the best buying choices.

It searches lot of electronical online shops (and it dont stops there) and gives you the best deal ! The bad is that the most online shops that provides are shipping only in USA & Canada and not internationally.

Btw. This is a good deal and i trust slick deals a lot.

Before someone buy it though remember to check very good the seller and ask ratings and reviews about him

You dont want to be scammed and lose 300\$

Good luck to the lucky buyer ;)
