Closed for several reasons and for personal purposes.

Happeh got lucky when buying the other VPN off Darkwin mainly because he paid with OMC, and Darkwin misevaluated how much those OMCs were worth. He probably thought 5000 omc was \$200.

A VPN business using openvpn+whmcs should cost at least \$200 imho without a custom desktop client.

Just for clarification, he only did the deal because someone offered him \$100's for 5000OMC.

Still this was super cheap because I have a small customer base already, everything setup and good to go including Freeradius + whmcs and the short domain. I got lucky and all of this should of probably cost \$300+.

I can sell you a custom client if you ever want to buy one.

SMTP Server - May 25, 2014, 6:40 pm

My friend has a VPN company that he wanted to sell for 200

TRH4CK - June 21, 2014, 10:05 am

Start your own, because for that price you won't be able to buy a company ... The last time I saw someone selling, it was for about \$150...
