Thread: [DARKCOMET I HAD 26 USERS, NOW GONE! WTF!?](#)

hello im me - May 17, 2014, 10:38 am

So I have asked on here before, but now I found my user data in Darkcomet, I had 26 users!? Now I have 0! I have enabled startup, what is going on!

Screenshot;

Please help I really don't know what's going on, I can provide more screenshots too if you wanna help.

FrankLucas - May 17, 2014, 10:41 am

I had about 150 slaves myself then one morning i wake up and only half of them left.

I have 0 users, what is going on?? I have used 5 weeks on this. I had 5 slaves just today, and now they are all gone..:(

?Chief Keef. - May 17, 2014, 10:45 am

they went offline? Did you buy your bots? Did you get your bots from someone who was giving out for free?

hello im me - May 17, 2014, 10:47 am

I have never bought bots, and i have never had more than 5-6 slaves at once, so i went into the Client settings and i had over 26 users. And now they are all completely gone..wtf.>.>

Your stub was probably no longer FUD an your slaves' AV picked it up.

john12 - May 17, 2014, 10:50 am

Did you used a free crypter?Or a paid one?

hello im me - May 17, 2014, 10:52 am

So everytime it stopps being FUD the AV detects? Don't you need to do a virus scan? And how can i update my stub while they are executet on my slave? I also made a New stub yestartday. wich was 1/34 nodistribute and 4/60 razorscanner. Still they are all gone..

Mr.Pu?ple - May 17, 2014, 10:52 am

POSSIBLE YOUR STUP EXPIRED IF YOU NEED CRYPTING PM ME :)

Linkin™ - May 17, 2014, 10:54 am

Hello,

1. Please be sure to open your NO-IP Client (DUC).
2. Make sure you are listening to the port in DarkComet with UPNP enabled.
3. When darkcomet is open, headover to <http://canyouseeme.org/> and check your port, let me know whether it is successful or not.

Good luck.

Just a heads up nodistribute does, infact, distribute.

doanduykiem - May 17, 2014, 12:30 pm

be careful with no-ip slealer ! make sure only one no-ip client id work on your pc !
