Thread: [\[Question\] Ultimate Logger down?](#)

What happened to ultimate logger?!

The site redirects to google and the owner/seller didn't reply to my PM! Either i want a refund due to the "lifetime" part or he returns the services. The thing isn't even a RAT so I don't know what is going on.

I got the refund, I sent a refund request through PayPal and he gve it to me within a few hours. I got predator pain, it's better anyways compared to galaxy logger cause it has everything combined.
