Thread: [Shitty Survey Locker](#)

Tostig - May 17, 2014, 2:35 pm

Don't learn from this source, it is terribly coded, but it can be tweaked and made into an OK locker.

\$lick - May 17, 2014, 2:51 pm

"Infected Links or Infecting Members (+25 points)" lel

Your locker will crash if not run as admin. Due to permission errors.

Also;

PHP Code

<?php

```
fileSystem.WriteAllBytes(filePath, stubBytes, False)
    fileSystem.WriteAllBytes(filePath, Encoding.Default.GetBytes(FileSplitter), True)
    fileSystem.WriteAllBytes(filePath, Encoding.Default.GetBytes(frmtitle), True)
    fileSystem.WriteAllBytes(filePath, Encoding.Default.GetBytes(FileSplitter), True)
    fileSystem.WriteAllBytes(filePath, Encoding.Default.GetBytes(frmbody), True)
    fileSystem.WriteAllBytes(filePath, Encoding.Default.GetBytes(FileSplitter), True)
    fileSystem.WriteAllBytes(filePath, Encoding.Default.GetBytes(frmsurvey), True)
    fileSystem.WriteAllBytes(filePath, Encoding.Default.GetBytes(FileSplitter), True)
    fileSystem.WriteAllBytes(filePath, Encoding.Default.GetBytes(frmkey), True)
```

This is unnecessary, Don't repeat yourself. Write all the bytes at the same time.

I'd personally use CodeDom. Just has a lot more customization IMO.

Xxeroxx46 - June 5, 2014, 11:39 am

thanks for your upload :D

i will lock at this source
