Hello everyone I am providing a .psd of this theme I have created myself:

You can download it right here :

Everything is editable and the font that is being used is [Basic Title Font](#) by Przemyslaw Hoffer

Please do not claim this as your own work, sell it or even share it, although you can edit it and use it for your thread as well as link the person here!

I will be providing different coloured variations of this theme on this thread.
