I recieved a vouch copy and here is my review:

First Impression

6/10

I saw a few plain pages with no pictures. I didn't know what to expect.

Originality

7/10

I've seen this method some places before, however: This e-book dives into the depths of of it, and how to make \$\$\$ quick.

Ease of use

7/10

If you want to make money with close to no work you need to make a little invest ment first, or else you need to work a little yourself.

Design

7/10

It has a nice background and a black square around every page, it looks suprisingly good. I would love some pictures too. It makes it soo much easier! Hehe

Overall
7/10

This E-book covers a topic I've seen a few times ago. There is work you need to do from your own side, if you don't want invest in this method. After you did that thing you could invest in the first time, you should have no problem putting the money you earned in investing. There's one problem with this method, that is that it's not guranteed to payout. So the harder you work, the more likely they are to pay out!

Good luck with sales!

Sorry but I just really wanted to say how high quality that money image is... It's making my mouth water. Who designed it?
