Thread: [MYBB Disable The message is missing. Please enter a message.](#)

Haza?d - May 18, 2014, 11:59 pm

So I want to disable the feature that prevents users from creating blank posts.

When I try creating a blank post I get this error:
The message is missing. Please enter a message.

Is there a way to disable this function?

Remove the check in the post.php file which is located at

Code inc/datahandlers/post.php

Change this: [\(Click to View\)](#)

~Lines 223-228

Code // Do we even have a message at all?

```
if(my_strlen(trim_blank_chrs($post['message'])) == 0)
{
    $this->set_error("missing_message");
    return false;
}
```

To this: [\(Click to View\)](#)

Code // Do we even have a message at all?

```
if(my_strlen(trim_blank_chrs($post['message'])) == 0)
{
    //$this->set_error("missing_message");
    //return false;
}
```

You can also remove the subject check in the posts.php file too, but make sure you set the subject to something otherwise you won't be able to click on the post.

If you do want to remove the subject check, view the following

remove subject check [\(Click to View\)](#)

~lines 198 - 265

Change this

Code // This is a new thread and we require that a subject is present.

```
else
{
    if(my_strlen(trim_blank_chrs($subject)) == 0)
    {
        $this->set_error("missing_subject");
        return false;
    }
}
```

to this

Code // This is a new thread and we require that a subject is present.

```
else
```

```

{
    if(my_strlen(trim_blank_chrs($subject)) == 0)
    {
        //$this->set_error("missing_subject");
        //return false;
        $subject = "Default Subject";
    }
}

```

Thank you so much! This helped a bunch. I got it working.
