English is clearly not your first language.

If you would like me to translate all the text for you so it looks nicer just PM me.

So what does this project do useful?

\$lick - May 19, 2014, 10:02 am

(May 19, 2014 09:59 AM)? I???¢???? ? Wrote: [CITE](#) So what does this project do useful?

Get you real followers or friends so you can sell accounts.

OR Spread a virus.

I say you work on your GUI, but program looks good though.

TheDesignerJob - May 19, 2014, 9:51 pm

It looks good but the GUI does need a little bit of work but anyways nice

Trig-Config-Maker - May 19, 2014, 11:02 pm

id like to see this been chekcing out some facebook stuff recently

Looks Good.

Are you Using Facebook Api ?

Cairns - May 20, 2014, 12:32 pm

Using FB API will only get you banned (VERY EASILY).

I have experimented a lot with Facebook and have quite a bit of knowledge with its security measures. Work with their website directly, not their API.

Im not sure but , i used this about a month . I never got it banned .
Srsly , i made it safe . No ban or anything to your fb account .
And thanks for your reply :)

With FB API you have a limit on the amount of requests you make per day etc, so yes it will get u banned if you want to post a lot of comments etc.

Its your choice though of course, I was just saying so you would not waste your time.

Lordude - May 21, 2014, 10:32 am

accounts list from where it takes you?

nitamade - November 18, 2014, 9:31 am

Can anybody tell me if this works?

Thanks. :)
