Thread: [What are some nice programs to create programs?](#)

Munch - May 19, 2014, 12:17 pm

Looking to start making some programs, need some suggestions for programs that's free or that have a cracked version out.

If you have some programs to suggest post them below.

Will be looking for a mentor as well if interested lmk.

I'm not quite sure what you are asking here. Are you looking for a form of compiler for a programming language, or a simple IDE? It wasn't very clear. I'd be happy to mentor you with anything from Java to C++ but I'm just not sure what type of program you are looking for here.

You don't need a program, all you need is a text editor, I recommend notepad++.

Otherwise, if you are set on using an IDE theres netbeans, codeblocks, visual studio express (all of them listed are free).
