Thread: [The Shortest & Greatest Doxing & Anti Doxing Tutorial Ever Created](#)

**No Effort** - May 19, 2014, 1:00 pm

## Introduction To Doxing

So you may be wondering, what is doxing? 9/10 of you have probably heard the term, but in case you haven't it is the process of social engineering information about a specified user, with that being said there are ways to prevent people from doxing you and I will be going through both topics in this post. I will try my best to keep this as thorough and as short as possible, this tutorial took a lot of time to create and any feedback would be greatly appreciated.

Lets start with doxing someone and then working our way back words to avoid people doxing you.

What you are going to need;

A [Pastebin](#) Account

A (Preferably Fake) [Facebook](#) Account

A Skype Account

Half A Brain & Patience

Some Basic Information On The Person i.e. Skype Name, Name, Birthday

A Fake Email

A VPN/Proxy

Lets start with the absolute basics, so the persons IP Address, this is necessary since we can get a lot of geographical based information out of this.

There are multiple ways to grab IP Addresses I will be going over two methods, Picture Grabbing & Resolving.

### Method 1 - Resolving (Easiest)

Spoiler ([Click to View](#))

Step 1 - Get The Victim's Skype Username, This can be done by right clicking there profile on Skype

[\[img\]http://s27.postimg.org/nu3kgyr67/001.jpg\[/img\]](http://s27.postimg.org/nu3kgyr67/001.jpg)

Step 2 - Head on Over to Any Web Skype Resolver (I will include a few different ones) [ResolveMe](#) [iSkype](#) [MostWantedHF](#) I will be using resolveme.

[\[img\]http://s1.postimg.org/wj6angfjv/002.jpg\[/img\]](http://s1.postimg.org/wj6angfjv/002.jpg)

### Method 2 - Picture Grabbing

Spoiler ([Click to View](#))

Step 1 - Head over [here](#) and type in your email, make sure its a real email (It will generate a unique LINK ONLY FOR THAT EMAIL, USING MINE WON'T WORK)

[\[img\]http://s2.postimg.org/ywblfkwx/001\\_1.jpg\[/img\]](http://s2.postimg.org/ywblfkwx/001_1.jpg)

Step 2 - Copy and paste either one of the first two links and put it in a URL Shortner, I prefers

Google URL Shortner since most people tend to trust "google" links [Google Shortner](#)

[\[img\]http://s27.postimg.org/rqxxxc3db/001\\_3.jpg\[/img\]](#)

Step 3 - Send that link to your victim and there IP Details will be sent to your email, for them it will be look like a site error.

Me: Hey John Check Out This Awesome Article LINK HERE

John: SURE!!! Me laughs diabolically because John is an idiot

Getting Information From The IP:

Spoiler [\(Click to View\)](#)

Your going to end up with a few IPs if you did the resolver part, head over [here](#) and try each IP one by one. If the ISP says Microsoft, or Valve or something along those lines its the wrong IP, however if it says an actual internet company it means you've got the right one. Make a note of the IP and all the basic information that comes up.

[\[img\]http://s30.postimg.org/iz16xukbh/003.jpg\[/img\]](#)

Congrats! we now have the victim's Geographic Location & IP. This alone is enough to really scare the average computer user shit less but why stop there?

This is where the tricky part comes in we need to get information on the actual person, there are quite a few ways to do this, I will review most of the main methods.

[Pipl](#)

Spoiler [\(Click to View\)](#)

If you have the email of your target, name, or username, this can be really useful, keep in mind that upon typing the name be sure to add that Geographic location we got earlier. The only flaw is going through all the information is annoying since you need to cross check with the actual guy.

[\[img\]http://s27.postimg.org/s9ajteolr/002\\_17.jpg\[/img\]](#)

[TinEye](#)

Spoiler [\(Click to View\)](#)

If you have the picture of the person this is Extremely helpful since you can upload their picture or just post the link to their photo.

[Lullar's Com Service](#)

Spoiler [\(Click to View\)](#)

Simply the greatest tool ever seen if all you have is the email of the target, this bad boy can pull up everything and anything associated with that email.

[Know'em's User Lookup Service](#)

Spoiler [\(Click to View\)](#)

Do they got a username? if so try it out with this and you may be able to get a hit

Okay now that we have all that basic information this is where the Juicy part comes in. Now that we have all the basics about the guy we want to rip out the juicy stuff. Most guides will say talking to them blah, blah, blah, but I am to please and will be doing something most guides don't talk about. Social Media plays a large part of someones life. All there information is up there just waiting for someone to take (careful the US Government hates competition). Create a fake Facebook account or use your friends and add the person. 6/10 people accept any friend request there way because people love having lots of friends on there list. Once your there friend go through there profile, sniff and gather what you need from his wall, about page, anything.

Gather all that information and put it in a new paste on Pastebin. Try to keep it really clean and professional since it adds the whole "pretty" concept to it.

This wraps up my doxing part of the tutorial.

### Introduction To Anti-Doxing

After going through the first part of my tutorial you are probably familiar with the ways people can grab your information, now the question is, how can I prevent people from grabbing my information? its really simple really and I will be going through it in this part of the tutorial.

How to remove already existent information on the web about yourself.

Google your full name in quotes on Google and take a look at where its used, if you see yourself appear on images or if you see your profiles or if there is any trace what so ever you need to take these steps.

If you see your image on Google notify Google via email, they take down pictures if you feel it's a violation of your privacy. If your under 18 even better because Google needs to follow the laws and help protect privacy of children under 18. [Contact Google](#)

If you see yourself registered on a forum or something go on over to that forum and simply deactivate/deregister your account. If you use the forum service create a new account and bind it to a fake email and name.

If you see your IP any where on google rather it be from a sourceban from a Garrys Mod server or whatever the case is, I would strongly recommend you call your ISP and tell them your IP Address is compromised and how you would like a new one. If you have a dynamic IP like most HFers do then this isn't an issue because the IP will restart on its own.

If you still see a trace, I would recommend purchasing a "cover up your track" service from members of HF. Its not that expensive (its about \$25 - \$30 USD) and the pros of doing this definitely out weigh the price.

### How to stay protected and protect your information

Now that you hopefully took down or managed to take down that information here are some tips to stay protected and conceal your information.

What you are going to need;

#### [A New Identity](#)

Create a brand new email account preferbly with GMAIL and do not add any of your real information on it. Go to this [website](#) generate a new identity based on your preferences and stick with that identity.

If you have any existent accounts delete them and create new accounts with your new fake email. If you are ever prompted to enter any information use your identity, it contains every thing from a

name to a Social Security Number. Final way, never upload a picture of your self on the internet ever again.

Well guys I tried my best to be as detailed and as short as possible in this tutorial, if you have any questions please feel free to PM me or just reply to the thread, if you are here to rant about my thread and talk about how you already know this or talk about how its been done a million times please just save your shit for another post. For the grateful people, a simple thank you in the comments would be great :)

Regards,  
Iconic ?

**navaneeth.kishore** - May 31, 2014, 7:49 pm

come-on HF, not even a thank you? Nice tut OP!

**No Effort** - May 31, 2014, 8:00 pm

(May 31, 2014 07:49 PM)navaneeth.kishore Wrote: [\[CITE\]](#) come-on HF, not even a thank you? Nice tut OP!

Thank you so much bro, I thought no one would reply!

Regards,  
Iconic ?

**Geck?** - May 31, 2014, 8:12 pm

Very HQ will use this in the future!

**No Effort** - May 31, 2014, 8:26 pm

(May 31, 2014 08:12 PM)Geck? Wrote: [\[CITE\]](#) Very HQ will use this in the future!

Glad to hear my tutorial has helped people  
:)

**UltimateCrimson** - May 31, 2014, 10:38 pm

Great post, I never knew that you could anti-dox

**hahdbwoannniabs** - May 31, 2014, 10:42 pm

You didn't even explain how to use the sites you provided in the doxing tutorial, not to mention the fact that you left out a lot of stuff. Same for the anti-doxing tutorial.

**B?wseR** - May 31, 2014, 11:46 pm

Sorry to burst your bubble but the new methods of doxing are done by calling there isp aka isp doxing.

**DedSecz** - June 1, 2014, 2:26 am

Very good tutorial for newcomers and guys who want to hide their stuff! :D

**set-fighter** - June 1, 2014, 2:38 am

Thank you for the tutorial.

Very interesting!

**Tommy?** - June 1, 2014, 2:39 am

I already know most of this.

But its still really good for the newbies!

Good job ?

**navaneeth.kishore** - June 1, 2014, 3:10 am

(May 31, 2014 08:00 PM)No Effort Wrote: [\[CITE\]](#) Thank you so much bro, I thought no one would reply!

Regards,

Iconic ?

I never thought seriously about doxing until recently. This means I have to leave this account and start a new one... you are an eye opener, thank you. ?

**reginasundaram** - June 1, 2014, 3:12 am

That's a SnS guide there .. thank you..

**No Effort** - June 1, 2014, 11:07 am

(May 31, 2014 11:46 PM)B?wseR Wrote: [\[CITE\]](#) Sorry to burst your bubble but the new methods of doxing are done by calling their isp aka isp doxing.

First of all no ISP is their right mind would give you access to someone else's information without a police issued warrant, "sorry to burst your bubble".

Regards,

Iconic ?

(Jun 1, 2014 03:12 AM)reginasundaram Wrote: [\[CITE\]](#) That's a SnS guide there .. thank you..

No problem! thank you for saying a minute to say thanks! :D

You have a better chance of brute forcing a password in the first 10 seconds then someone falling for that.

(Jun 6, 2014 06:44 PM)Nope. Wrote: [\[CITE\]](#) Limited to Australia/NZ only, but I find [www.personlookup.com.au](http://www.personlookup.com.au) to be very reliable - maybe you should consider adding it :o

I'm confused at what you are trying to say, if you are suggesting that the thread is limited towards them, it's not, it's more dedicated towards North America, if you are referring that I am not covering it and how I should add that link I would be glad to do it.

Glad you enjoyed it, thank you for the kind words!

**Vercetti7** - May 28, 2015, 9:54 pm

One of the best tutorials I've seen on the basics of doxing. Great job.

**Hack3rzGod** - May 29, 2015, 12:25 am

Thank you very much friend!

That was cool

**HackTrack** - May 30, 2015, 12:18 pm

I liked the doxing part short and easy. Good one, mate.

--Alexander-- - May 30, 2015, 1:30 pm

Great tut , thanks bro , keep it up ...

**SIM-2327840** - June 9, 2015, 1:55 am

Insane guide , short and helpful =)

**xrahitel** - June 9, 2015, 5:22 am

Very HQ will use this in the future!

**Payne** - June 9, 2015, 5:29 am

Posting this to come back later!

Thanks man.

**murt** - June 9, 2015, 12:58 pm

I finally understood how doxing work THANK U SO MUCH MAN

**SIM-782290** - June 9, 2015, 11:41 pm

Not bad of a guide, left a lot out though.

**AntraxShad0w** - June 24, 2015, 7:41 pm

Do you know can someone get your ip address from Facebook? like without clicking into anything  
just by knowing your facebook account?

**JustSomeN00B** - June 30, 2015, 5:42 pm

Thanks for the tutorial. Very interesting read.

**NoMemes** - June 30, 2015, 6:00 pm

Thanks for this. It is a good thread to help you hide your identity online for sure.

**Moldov** - June 30, 2015, 6:04 pm

Thanks for the tutorial, very good for beginners.

**Vanoxx** - June 30, 2015, 7:06 pm

Super detailed, thanks for making this tutorial!!!

**Mirazoka** - June 30, 2015, 7:09 pm

Very good guide, thanks for this mate!

**gundamwinger** - June 30, 2015, 8:36 pm

Thank you for the tutorial.

I like it

**Microlab** - July 1, 2015, 9:23 am

very good thread, helpful, thanks bro for sharing.

**koekblik2** - July 12, 2015, 11:40 am

so if i'm correct they can't trace you down?

**Tiacta** - July 15, 2015, 10:27 am

Thank you for making this awesome thread!

**Clam** - July 15, 2015, 10:42 am

Nice tutorial, thanks for this share.

**DarkTruTH007** - July 16, 2015, 6:47 am

really helpful , both parts of your tutorial are nice

**Evil Corp** - July 16, 2015, 2:49 pm

Thanks for the tutorial. I learned a lot of things.

**Billie Joe Armstrong** - July 16, 2015, 7:47 pm

Might be useful for beginner doxers.

**arnographic** - July 18, 2015, 7:45 am

this guide definitely will help me out ! thank you for this share !

**kmz22222** - November 16, 2015, 10:00 am

Good thread.... Good job on that....

**modymn77** - November 16, 2015, 10:29 am

will use this in the future

**Cosvo** - November 16, 2015, 1:11 pm

Cool stuff man. Thank you for sharing this:).

**PlusnPlay** - November 16, 2015, 4:24 pm

Thanks No Effort really helpful

**kk.dubs** - November 17, 2015, 6:24 pm

thank you for the tutorial.

**bingy** - November 21, 2015, 8:48 pm

Realz good OP, fek me that lullars is creepily good

**Landchester\_Turtle** - December 4, 2015, 4:15 am

Great tutorial really learned a lot.

**GOD OF SARADOMIN** - December 4, 2015, 4:18 am

Nice tutorial keep HQ m8 , :)

**Mr. Robot** - December 4, 2015, 4:37 am

Pretty basic methods but if you want help to write your next one hit me up - you can take full credit.

Can help you get passwords and all the other juicy shit plus some better methods and more reliable search content.

Otherwise this is perfect for keeping people at a decent level of knowledge.

Thanks for the share

**Ticoma** - February 12, 2016, 9:47 pm

Thanks man, this is glorious

**clickonthecat** - February 13, 2016, 1:57 pm

Sorry to burst your bubble but the new methods of doxing are done by calling there isp aka isp doxing.

**Domin0** - February 19, 2016, 9:25 am

Nice guide, maybe if you're making another you could let Mr. Robot help you on the way, since as some people mentioned there are lots of new ways nowadays. Good job anyhow !

**anonym** - May 18, 2016, 10:45 am

Wow, yours tutorial was very useful for me, thank you i am waiting for more!

**sam786000** - July 25, 2016, 1:00 pm

thank you very much for tutorial

**GargelyGoose** - July 27, 2016, 7:42 pm

Thanks for this awesome post. Helped me learn a little more about the world of Doxing. ?

**Ghxxl** - July 28, 2016, 7:37 pm

Helped bunches, great post!

**Stirate** - August 8, 2016, 1:00 am

Looks good. Lol, complaining to Google is probably interesting to do.

**Root Kit** - August 8, 2016, 4:28 am

Nice tutorial mate.

Thank you for this.
