Thread: [\[IOS\] Unlimed Instagram Likes \[DL IN THREAD\]](#)

**U63R** - May 19, 2014, 2:06 pm

Hey HF.

Today I wrote a RTF about an exploit you can do on an app called "InstaLike". This method has maybe been around in some other tutorials, but I've never seen it on this app. Please take a look!

You will need a jailbroken iDevice and 5-10 minutes to do this.

Here is the download [U63R's InstaLike Method](#)

You can view it directly at Mediafire so there is no risk of a virus. ?

Have a good one!

Not the first time I've seen this tutorial for the same exact app with the same exact steps for this app.

But I've haven't gotten the chance to do it. Are they real followers?

The likes look legit and this tool is so fucking overpowered. I asked for 10 likes it gave me like 100 and it's still going WTF

Aww. I'd be very glad if this worked on Android. =/

When did I tell you there was followers in this tut? No there is no possibility to exploit followers.

Either way, same tutorial as the one a hack forums member was giving a few weeks ago.

Yep, there is a way to do it via a computer but I do not have time to make a tut for that atm. If you want to request one, just shoot me a PM.
