Thread: [New Crypter codedom multi encryptions](#)

IAmNotHere - May 20, 2014, 1:42 pm

All kind of encryptions in one file, running smooth.

Codedom, Net Framework 2.0, Runpe multi encryption, assembly changer, inbuild scripts, file multi encryption.

File Name: uihreguhiy.exe

File Size: 876 KB

Scan Date: 2014-05-20

Scan Result: 2/34

MD5: d7c68594f1df7205d705cc6b2d6318fc

IAmNotHere - August 28, 2014, 10:55 am

I uploaded a file yesterday and I just passed Norton 360 v21 2014 with this source.

I am stil selling this, if anyone is interested. The source is easy to refud with a refud application I build along.

wow wait hold up I'm lost I'm lost o.o

you say 'FUD' but your scan says detected by FortiClient:MSIL/Injector.PE!tr
NANO Antivirus:Trojan.Win32.DarkKomet.cwxrcy

and the codedom crypter you can find soo many tut's on them.. and the encryption is easy to add cuz I bet 50\$ there all C&P cuz you don't sound like you know how the make the encryption just sayin lol

also may wanna post some SS?

IAmNotHere - August 28, 2014, 1:35 pm

Arghh, a fortuneteller responded on my thread. Aren't you from a quackery crypter you gave for free?

<https://hackforums.net/showthread.php?tid=4342748>

Quote:yes it has 4 detection's but with a icon it becomes FUD.:. I just read this is from the paid version, no kidding?

You don't ask money for this right, pay every month too much to you where the POSSIBLE fud is add an icon?

<https://hackforums.net/showthread.php?tid=3619744>

No one responded in 1 year? You don't know why? Where did you downloaded a probably fully compiled source from and without ever touching any compiler for this ugh, ugh, crypter and started giving "free" crypts.

Why is my crypter source not good? You didn't see the source, you don't have a testing crypt from me, and you won't. And this detection rate didn't change so far for for the last 4 or 5 months continuesly.

!Elite Crypter is a plagiarism of a sales thread with a crypter named "Elite Crypter", which is not from you, at all. I know, because I cracked the login off the crypter and have this crypter somewhere, but I didn't uploaded this to the internet, because the owner is also a member here.

!And for the 2 detections, if you buy this source go fud them yourself, this passes the main anti viruses in the world for months already.

You know what I am talking about: you can code: you sell detected crypters subscriptions for money. What am I talking about?!

And i don't post ss's since this a crypter and GUI isn't really important when it comes to what this is capable off. There is almost no GUI, so what's the purpose of posting a ss of a form?

And your name isn't Maiya. And if it is I am not sorry for my language.

Quote:And your name isn't Maiya

No shit <.< you use your real name LOL

and i didnt even read 1/2 that post and thought you were on on drugs? So now let me get this instead of selling a 'FUD' crypter that's 2/35 and no SS...

For heads up take advice next time and not try to disrespect me?

IAmNotHere - August 28, 2014, 2:11 pm

Quote:For heads up take advice next time and not try to disrespect me

A tooth for a tooth and an eye for an eye. Ahahah.

And I am not on drugs, or any other mind confusing substance.

Regards.

P.s.

Quote:and i didnt even read 1/2 that post and thought you were on on drugs

Maybe you are a bit incapable then.

tognioO - August 28, 2014, 2:13 pm

Thanks for the crypter !

Good bye !

IAmNotHere - August 28, 2014, 2:17 pm

Np, I hoped you like the free source I gave you after the comment from "Magnetron".

That's rather not ok from you "MicroWave", you start an arguement with me and you don't reply to a pm I send you.

I kept the original pm, if in case you go complain with the owners of hackforums and distort the

original pm just like you offer paid crypter subscriptions.

@ GALVAWaveTronMagna.com? Who did you scam to buy yourself a l33t subscription?

I was about to say something out of order, but when you do this to me: ? . You're not my fucking mother. Get fucked, give birth and go ? your kids. If you start with falsly accusing me, of a c+p crypter source. Then you have no right to speak anymore and out of respect: You started accusing me: take your responsibilities and leave this thread, I don't care
