Thread: [DragDropControl - Example](#)

Only3 - May 21, 2014, 1:44 am

got this idea while googling

Code Class DragDropControl
Inherits Control

```
Public Property Control As Control = New PictureBox 'ListBox 'TextBox
```

```
Public Sub New()
```

```
    Me.AllowDrop = True
```

```
    Me.Size = New Size(100, 100)
```

```
    Control.Dock = DockStyle.Fill
```

```
    If TypeOf Control Is TextBox Then CType(Control, TextBox).Multiline = True
```

```
    If TypeOf Control Is PictureBox Then CType(Control, PictureBox).SizeMode =
```

```
    PictureBoxSizeMode.StretchImage
```

```
    Me.Controls.Add(Control)
```

```
End Sub
```

```
Protected Overrides Sub OnDragEnter(e As DragEventArgs)
```

```
    If e.Data.GetDataPresent(DataFormats.FileDrop) Then
```

```
        For Each f In e.Data.GetData(DataFormats.FileDrop)
```

```
            If TypeOf Control Is TextBox Then Control.Text += f & vbCrLf
```

```
            If TypeOf Control Is ListBox Then CType(Control, ListBox).Items.Add(f)
```

```
            If TypeOf Control Is PictureBox Then CType(Control, PictureBox).ImageLocation = f
```

```
        Next
```

```
    End If
```

```
    MyBase.OnDragEnter(e)
```

```
End Sub
```

```
End Class
```

```
?
```

What did you expect, 40+ compliments? Nice shit though.

Only3 - May 22, 2014, 12:31 am

didnt expect anything i was talking in general about this section >> msgbox thread with +40 posts
???

Are you new to hackforums?

Even the best projects get buried in an hour here with very few comments.

Only3 - May 22, 2014, 11:21 am

If you 'release' code for people to admire you then you must be dumb.

Give time to your thread and explain what is this, how it works, and why we need it.
Then ppl will understand your work and learn from it.

Can't agree more. Many quality threads have been buried for the same reason OP did.

Did he leeched the drag 'n drop function from you?

Oh, of course. Everyone is trying to copy from you. Only TheBarret codes unique applications.

Don't get cocky bruh.

I agree that some your projects are really amazing and unique, no one can't argue with that.

But your attitude is shit. Really.

As much as I respect you for being an HQ coder, that much I find you annoying for making these LQ posts.
