Thread: [How to make your virus completely FUD no matter what software they use!! 100% works!](#)

nobody_here - May 22, 2014, 1:24 pm

Hey guys this is a tutorial how to make it appear as if your file is clean when it isn't!
It is very simple and noob freindly!

Step 1:

Upload virus to virustotal.com
And scan it

Step 2:

See that it is detected . Right click then click inspect element
[img]http://s15.postimg.org/l890amsp6/SCREEN1.jpg[/img]

Step 3:

[img]http://s15.postimg.org/5wz7a0vd3/screen3.png[/img]
Edit the html where it says text-red change the red to green.
Where it says 23/60 (could say any number out of any number) Change it to 0/60.

Step 4:

[img]http://s15.postimg.org/r7wreadhn/screen4.png[/img]
Take a screenshot and post it on as proof that this is clean!!!

Your virus is now clean for all to see with proof!!!

suffer4real - May 22, 2014, 3:11 pm

ur a genius >.<

next something usefull please :D

motrox - May 22, 2014, 3:27 pm

aaaand that is why virus scans prove nothing.

n0thing - May 22, 2014, 3:29 pm

Wow, this was not really needed. I've been using inspect element since 5th grade.

?Pulsar? - May 22, 2014, 3:30 pm

you normally need to give a link to the VS not a screenshot and you cant edit the server side results
therefore this is useless.

BI?ckhat - May 22, 2014, 3:33 pm

I use inspect element to sql inject my school website.

(Jk im not retarded, dont neg rep me)

nobody_here - May 23, 2014, 1:28 am

Chill guys it was for noobs and half a troll lol

AngularJS - May 23, 2014, 5:30 am

If you want it FUD don't scan it at virustotal..

Alex© - May 23, 2014, 9:37 am

Scanning on virus total is a bad idea, it wont be FUD for much longer anyway.

fallxn - March 25, 2024, 10:25 am

LMAO, okay honestly I didn't expect this

DramaKing - March 25, 2024, 10:37 am

literally saw it and just had to comment tbh

dubbstaap77 - April 21, 2024, 4:49 am

are you serious about tghat ?? CMON
