Thread: [Use FREE Azure Trials To Mine OmniCoin](#)

S-Moneyy - May 22, 2014, 5:51 pm

What You Will Need OMC Wallet [Download Here](#)

Windows Azure Free 30 Day Trial [Here](#)

Account On <http://pool.omnicoin.cc>

PuTTY Client <http://www.putty.org/>

Once You've Created An Azure Trial Account

- Log in through your portal and look at the bottom for "+NEW"
- Create a new virtual machine
- Make a UNIQUE DNS (yourName.cloudapp.net) for your VM
- Make a password *NEEDED FOR LOGGING IN THROUGH PUTTY)
- For "Image" choose Ubuntu 13.10
- For "Size" choose STANDARD A7 (8 cores, 56 gb memory)
- Select server closest to where you are located

pool.omnicoin.cc

-[Click Here](#)

- Register an account
- Click My Account > My Workers
- Create a worker name & password

Connecting To Your VM

- Open up your PuTTY client
- Put in your host name (yourname.cloudapp.net)
- Your login name is "azureuser"
- Your password will be whatever you put in while creating the VM in the azure portal

Once You're Connected

Copy and paste the following codes IN ORDER into your PuTTY command line

```
Code sudo apt-get install build-essential libcurl4-openssl-dev
Code sudo apt-get install build-essential libcurl4-openssl-dev
Code sudo apt-get update
Code wget http://sourceforge.net/projects/cpuminer/files/pooler-cpuminer-2.3.2.tar.gz
Code tar xzf pooler-cpuminer-*.tar.gz
Code cd cpuminer-*
Code ./configure CFLAGS="-O3"
Code make
Starting To Mine
```

-In putty type in the following command edited to cohere with YOUR personal mining worker details

```
Code screen -S miner ./minerd -a stratum+tcp://192.99.42.54:3333 -O
USERNAME.WORKERNAME:WORKERPASSWORD
```

Sit Back and Collect Your OmniCoins

StraightMonster - May 22, 2014, 6:03 pm

How many KH or MH are you getting? This could be good.

S-Moneyy - May 22, 2014, 6:06 pm

(May 22, 2014 06:03 PM)jAnimal Wrote: [\[CITE\]](#) How many KH or MH are you getting? This could be good.

By running 2 x A7 VM's and 1 x A6 you can get an extra 200 K/hs

Bigandrewgold - May 22, 2014, 6:15 pm

Dang, this looks nice. Posting to save this for later

Fizzie - May 22, 2014, 6:36 pm

Stupid CCV. Shit it won't work for me. Good find though, thanks.

jeejeepower - May 22, 2014, 7:11 pm

I am getting 31 K/hs By running on one A7 VM

I choose east coast of USA. Not that good, but thanks

Tenaxium - May 22, 2014, 7:21 pm

Anyone know how to bypass the stupid confirm thing? I think there's a website that lets you recieves voicemails, what is it?

Jhin - May 22, 2014, 7:49 pm

Nice share OP, gave this a try mining at around 50 kh/s. :D

HustlerEnergy - May 22, 2014, 9:02 pm

LOL this will never give you 200Kh/s. Barely even 50Kh/s on all 3. I'm on 3 of these plus 4 VPS's and only get around 135Kh/s (give or take) in total.

Zuse - May 22, 2014, 10:45 pm

Putty link doesn't work, just to let you know.

GamerBoy1499 - May 23, 2014, 2:58 am

I am already mining with a poor rate of 4 KH/s.....But with this can i create another worker in doctor blue's pool and start mining here also...but for azure you need payment information and i cant give any of that information.Any way to bypass that?

Dmoore - May 23, 2014, 6:41 am

Mine get's stuck at the payment information part, Keeps on loading without displaying anything I've reloaded a thousand times but still the same. ?

how big is the VPS instance? how many cores?

iToady - May 28, 2014, 12:37 pm

I have the same problem, I can't even get one.

1n9i9c7om - May 28, 2014, 12:40 pm

Too bad I don't have a CC to verify that - there is no other way to do that, right?

Fatboy Slim - May 28, 2014, 12:53 pm

(May 28, 2014 12:40 PM)1n9i9c7om Wrote: [\[CITE\]](#) Too bad I don't have a CC to verify that - there is no other way to do that, right?
wondering the same thing.. Too bad.

audrey - May 28, 2014, 12:56 pm

Wait, if Azure is run by Microsoft, why would they let you use *nix images?

Aceman - May 28, 2014, 12:56 pm

(May 28, 2014 12:40 PM)1n9i9c7om Wrote: [\[CITE\]](#) Too bad I don't have a CC to verify that - there is no other way to do that, right?If it didn't require a CC then people would create tons of VMs and have their own server farm off of these free subscriptions.

Bigandrewgold - May 28, 2014, 1:10 pm

(May 28, 2014 12:56 PM)godshawk Wrote: [\[CITE\]](#) Wait, if Azure is run by Microsoft, why would they let you use *nix images?
Because it would be stupid for them to not let you use the most popular web server software

Andromeda. - May 28, 2014, 2:31 pm

Do I have to keep putty open? Or can I close it to continue mining?
You get about 30-60khs for doing this.. Worth it? idk.

Aceman - May 28, 2014, 3:25 pm

you can close it.

And why would it not be worth it, its free

Huh, my account just hit the 'usage limit' after about a week.

So as a fyi, this wont work for the enitre month if your running it 24/7

Oops

Good find

even though you're a wierdo

It drives me fucking insane, I see the 'your' all the time when it's suppose to be 'you're'.

I feel ya, I usually don't post when I see it, but then again I don't usually make the error myself

Nonon Jakuzure - May 29, 2014, 2:01 am

Even though it is free I really don't consider it worth it. I tried using this on a coin, that was for a while only mined using your CPU, and it barely made anything. Sure it might be a free trial but in the end if you want to continue you have to pay. Not to mention CPU mining isn't very profitable. You'd be better off dropping \$20 into renting a rig. But I mean if you guys want to try out this by all means go ahead.

Andromeda. - May 29, 2014, 2:09 am

Ok, I withdraw my statement.

It only takes 5 minutes, and if you have good VCC's like moi, you can do it over and over again. Currently running 10 accounts with 2x A7 and one A4 and I'm hashing around 600khash

Scars On Broadway - May 29, 2014, 5:03 am

Thanks for this works well even if it is for a low hash rate.

.

ForumBeast7845 - May 29, 2014, 5:17 am

Thanks man , Good method :) But 50Kh/s is not good :(

Aceman - May 29, 2014, 5:17 am

Yes but they'll see the high CPU usage and cut you off after a certain while. So it's not entirely a month. More like maybe 2 weeks at best. It'll take me 5 minutes to setup a miner on a pool and fire up my GPU which would earn me about almost 5x as many coins per block. But I mean some coins are better than no coins to some people.
