NexCrypter v1.0

#FUD SCANTIME

Made by me .

Here you can find some scanas :

[Crypter scan](#)

[Stub scan](#)

P.S: The builder is not FUD , but the stub yes. There is still some shitty code in the crypter that is considered a virus but I will solve that by the next version.

If any problems please PM me.

If I had to rate how sketchy this looks, I'd give 12/5

alexalghisi - May 23, 2014, 6:10 am

Please try before comment. It's nothing sketchy , if you want I can show you the code .

Your server will not be FUD

alexalghisi - May 23, 2014, 6:45 am

I can reFUD it any time , that's not a problem for me.

Splitediting - May 23, 2014, 6:46 am

Good luck refud it.

Voidlight - May 23, 2014, 6:47 am

But unfortunately the crypted file gets corrupted. Tried with 3 different RATs, none of them were working.

alexalghisi - May 23, 2014, 4:03 pm

What RATs? I've tried with darkcomet and it didn't get corrupted

cantbeatme - May 23, 2014, 5:41 pm

I love this!! windows automatically blocked the file for reports of Trojan
yay windows!
success for windows, fail 4 u good sir.

Psychogenic - May 23, 2014, 8:48 pm

Doesn't make any sense. You released a crypter without even crypting it. You basically just made the source public. I recommend crypting and then updating the download link as well as the virus scan. Also, don't use VirusTotal for crypters.

EDIT: Although the crypter is virus-free and it does indeed work, I recommend including more options.

Marcisback - May 23, 2014, 8:52 pm

Why the heck did you upload the crypter to virustotal?

bounce177 - May 24, 2014, 9:44 am

????????????do this works on darkcomate

frett - May 24, 2014, 9:50 am
