Thread: [User Crying Blood wants to involve you into blackhat activity](#)

iWatch - May 26, 2014, 5:42 am

Hello everyone. Today [Crying Blood](#) (UID: 77329) sent me a Private Message asking me if I am good at Web Development in order to design him a website similar to DHGate etc..

Private Message

Spoiler [\(Click to View\)](#)

So, I sent him my portfolio and he added me on Skype. I thought he would like to start his own dropshipping business but when we started our discussion, he revealed his truthful intention which is to use the e-Shop website to scam thousands of people.

Our conversation:

Conclusion

Do not deal with the user [Crying Blood](#). He will definitely involve in a very serious blackhat activity in which you will not get away from. Therefore, if you don't want to be raided by FBI sometime after his scam, don't deal with the user.

~Tom~ - May 26, 2014, 5:59 am

You're one of those "I'm doxing you and reporting you to the fbi" idiots then ???.

That is what matters from the thread, obviously. I guess people don't care that they might get involved into blackhat activity but instead they care that I said I will report to Interpol.

Sarcasm.

Reporting someone to the FBI is not the way to go, just inform the community GameFire and be done with the whole thing.

Isn't this offsite? Thanks for making the thread, OP

Chickendipper - May 26, 2014, 6:21 am

They won't get too far, he used Skype.

IkHoudVanSinus - May 26, 2014, 6:22 am

What is the problem with designing a website for someone? I highly doubt you'd get in trouble for helping him design it.

how much i hate this kind of people .. If you dont like it, just say goodbye and perhaps warn your friends about the site if you know the domain lol. But doing the job for the police .. nope.. let them do their work .. as we all know they need some exercise ..

Para?more - May 26, 2014, 6:26 am

And furthermore doxing is also illegal soooo

Sur Justice - May 26, 2014, 6:28 am

This is not a rule violation or what so ever.

Because this is an off site conversation we don't care, if it was onsite you could maybe have gotten him banned.

Anyhow for you, good decision not to go into this shit. It will never get you very far.

How is looking up public information illegal?

I used to decompile users RAT's when they posted their links and report their DNS & IP to no-ip and their ISP, 'twas fun.

HackForums is not a blackhat site nor do they condone blackhat activity. If you want to participate in blackhat, you can go elsewhere.

You don't need to capitalize every word in a sentence.

OT: Just close the thread , nothing happened and if he was blackhat he's the worst I've ever seen.

Restarting - May 26, 2014, 7:30 am

this the reason i keep my black hat activities off site and dont talk to no one on hf about it

I am willing to show you via Teamviewer that I didn't write such thing. This and this only proves that the Crying Blood is lying.

Regardless if this is offsite or onsite, I thought it would be good idea to warn people about this.

Also, if anyone wants to read our Private Message conversation as well as our Skype conversation in order to see with their own eyes that I didn't even ask BTC up-front, please send me a Private Message and I will reply back with Teamviewer details. For the record, I am not using BTC.

Yes, I left out the part that I am from Greece. I don't understand why does it matter which country I am from.

This was the hardest thing I have ever read. Everything was capitalized Like This, How Is That Not Annoying? What do username switches have to do with it/

Sky - May 26, 2014, 9:02 am

The OP just went on Teamviewer with me now, at no point did he ask for anything. The Skype logs he pasted in the OP are exactly how I saw them in Skype, no messages have been removed/edited.

Crying Blood, you really shouldn't of lied about him asking for a cut before hand, now I've seen the messages are as displayed in the OP the fact you lied just makes you that much sketchier, even though you can do as you please off-site.
