Thread: [How do you insert a popup box thingy?](#)

CreepyPasta - May 26, 2014, 1:45 pm

So I've seen a lot of people and I can't remember what they're called. But it must be a code or something that I don't know of.

I'm talking about those boxes you can click to open and view the list instead of having it all in the thread. Does anyone know what I mean?

It's like a pop up box.

It's like a pop up box.

Do you mean a spoiler tag?

Code [spoiler]Your text here[/spoiler]

Translates to this:

Spoiler [\(Click to View\)](#)Your text here

Suffixed - May 26, 2014, 2:15 pm

You can use [spoiler]Text here[/spoiler] or [sp]Text here[/sp] to use a spoiler.

Spoiler [\(Click to View\)](#)Your text here

Exactly this but you can also just use [sp] instead of typing the whole [spoiler]

iMythik - May 26, 2014, 4:42 pm

Your looking for this?

Code swagPHP Code

<?php

test

Spoiler [\(Click to View\)](#)lol

Code swagPHP Code

<?php

test

Spoiler [\(Click to View\)](#) lol

Or are you talking about the recent phishing attempt?

He's talking about spoilers as you click to open them (he stated that in his original post).

Viral Dragon - May 26, 2014, 8:46 pm

OP:

Yes. You can use [sp] [/sp] or [spoiler] [/spoiler]

They don't pop up though. ._. There should also be a spoiler

button on the mybb text editor when you hit newreply, newthread or full edit.

Unless of course ... you mean using a new window, like a small popup box (much like the buddy system or emoticon list?)

-Viral.

Orianthi - May 27, 2014, 7:54 am

I think OP might be talking about a popup box, like an actual one. You know when you click some images it makes a new tab or window.

Hopsin - May 27, 2014, 8:20 am

It's spoiler

Use

Code [spoiler]text here[/spoiler]

And you will be fine! You are welcome.
