It would be useful for us if you could supply Instinct graphics that have already been created, such as a vector logo of those eyes or a larger version of that text that you use on your userbar. It's difficult to make a signature based on a 136x42 userbar when presumably elements from that will be needed in a 650x200 signature. Some resources would be appreciated.

If I had anything to give you I would, that's why we need a graphics guy. I'll ask around though.

Just going to leave it open until I get bAck from vacation. If no one has any good entries, I'll just close recruitment and no one will be invited.
