Vouch for this product it works wonderful!

Rboss726 - May 26, 2014, 9:35 pm

Vouch! I`ve used many of Jaxxy`s products and they are all great! Jaxxy responds quickly to skype messages and all his products are %100 LEGIT

Trooper_Jt - May 27, 2014, 3:57 am

Vouch for Jaxxy, and all of his products.

Jaxxy - May 27, 2014, 4:18 am

Thanks for all the vouches guys. I appreciate it alot.

Kuky - May 27, 2014, 4:29 am

Does this support proxies or not? Just wondering

Pinkflow - May 27, 2014, 4:46 am

I'm going to purchase this tonight, it looks very legit.

I dont understand why one would buy this when we still have to create accounts, also how do you gurantee inbox that is impossible ?

Cheers

Cheers

The garauntee depends on your usage for this. If you want to bomb emails your acc may or may not get flagged. If youre an email marketer it will always be in inbox. Reason why someone should buy it is because you can do alot more like sms bombing with this tool. Its better than all that bombers on hackforums since it has more flexibility with emails other than gmail.

Lycoso - May 27, 2014, 4:21 pm

i am not sure but looks like i have to use my own gmail or hotmail accounts, right?

Yes you are correct. You must supply your own email to send the messages.

Jaxxy - May 30, 2014, 5:02 pm

Bump this is still one of the greatest tools. Also there is another one coming soon stay tuned.

Jaxxy - June 10, 2014, 10:55 am

Still up for sales. Email marketers or mass mailers or people who want to sms bomb - this is the tool for you.

The things u can do with this amazing program is endless.

Jaxxy - June 16, 2014, 10:23 am

This program is still for sale! I'm pushing an awesome update soon :)

Jaxxy - August 11, 2014, 10:34 pm

Still up for sales! NOW 50% OFF! LIFETIME!

Jaxxy - August 31, 2014, 9:45 am

Sales still at 50% off, get your copy before 50% ends !

Blatngu® - August 31, 2014, 10:09 am

Could you add smtp option?

If so i will be interested

boing133 - September 1, 2014, 2:48 am

Would also be interested if smtp option would be added yes! :)

Jaxxy - January 3, 2015, 8:25 pm

I have updated the payment settings on netseal. I am now supporting and taking sales once again

for the beauty.

Jaxxy - January 10, 2015, 9:08 am

still up for sales. I am currently working on adding custom SMTP to this.

Jaxxy - January 22, 2015, 8:26 pm

Still up for sales and functioning.

mfacundo94 - January 23, 2015, 4:18 pm

Nope guy, it's not how to do it. You have to be able to pass a list of gmail accounts, or hotmail accounts or whatever, and it sends around 200 messages per account while spamming. If not, useless.

I hope you implement that!

Exactly, if it's a mailer i want to send to mails lists my email. Mail lists are not of less than 10k emails. Gmail, for example, allows a max of 250 messages per day if I remember well. It's a suggest! :D Well and in this case the possibility of adding a proxy list so each account uses the next proxy!

It would be great :D

It's not my website. The payment gateway I use is Net Seal and I think it could be down for everyone who uses Net Seal. If you wish to buy, please PM me. I am online most of the time.

Jaxxy - February 7, 2015, 9:07 am

Payment gateway has been changed to Paylvy. We are fully autobuy/ instant activation again since netseal is being weird. Now you can pay with BTC and PayPal and receive your product immediatley without having to contact me for it.

Still up for sales.

Jaxxy - February 8, 2015, 8:54 pm

Now that Paylvy has saved the day, we allow bit coin and paypal auto buy. We will soon accept omc and other payments too.

This tool is still up for sales. PM me if you need help.

This tool will NOT have a spoofed server added to it because of that reason. Technically this is supposed to be used for mass mailing but if you know what you're doing you can SMS bomb multiple people at once with this too.

~~

Version 2.0 IS OFFICIALLY OUT. Tested and working perfectly as it should.

Custom SMTP works. Logs work. Test email functions work. All of it works perfectly.

I did warn people ahead of time to purchase this before I raise the prices so for those who did that, good job because you saved some money and got the update for free. Other than that, access to this program is \$15 One time fee.

You supply the email. All emails should go to inbox if used for legit purposes. If you plan on fucking with people, Try not to use keywords such as "spammed by, bombed by, lol spam" etc because some email carriers such as Google and Microsoft filter keywords in those messages as spam. So emails will go to inbox too if you spam BUT if your account is flagged it will go to spam.
