OP, unless you're already doing so, you should make the script search through google dorks. Google can give you tons of info on someone just by using the right query.

When you try to get as much sensitive/private info on people such as aliases, addresses, family members etc. and then release online. Some people use the dox to 'swat' people (faking a distress call to local authorities in order to provoke a swat team to goto their house).

Hello, I am MaiTriCks from the White Hat Help section. I am of full merit to verify this application. ?

I had used this exact file when checking for all the proper information. There is no matter whether or not you choose to use the Download Manager. The Download Manager does not inject itself into the file nor does it change its MD5 hash value thus it is still an exact copy of whatever OP is providing.

There is no doubt that you altered files in the last 24 hours. ?

Here is the EXACT same file you provided at around 8:30AM western time, and I will be using this for my analysis:

<https://www.mediafire.com/?vh76obk2k2wer81>

MD5 Hash: 204f40639280fbe33979a29e5152b8db

(MD5 verifies that it is a copy of another file, or not. Same as SHA256).

SHA256: 529c75e9f7374a3c760de69761c8ea79069b588712aebacb3d294e4980ae5daa

I have decompiled your code to find that there is one malware detection and it has been coded using .NET. You have not changed the VirusTotal link you provided in the original post, which is already a red flag since you've changed the download link. Not cool.

A Comparison Between His VT Link & Mine:

[MaiTriCks's VirusTotal](#)

Original Poster's Link:

[Not MaiTriCk's VirusTotal, OP's](#)

Things I am to report as of right now is your email was placed as a string inside your program:

```
Code Private Sub LogInButton1_Click_1(sender As Object, e As EventArgs)
    MessageBox.Show(Conversions.ToString(Me.getRelatedDomain("drizzy****@live.com")))
End Sub
*, very nice email I see.
```

Also, explain why you need System.Security.Permissions?

```
Code Imports System
Imports System.Runtime.InteropServices
Imports System.Security.Permissions
```

```
Namespace System.Threading
    <__DynamicallyInvokable(), ComVisible(True)>
    <HostProtection(SecurityAction.LinkDemand, Synchronization = True, ExternalThreading =
True)>
    Public Class AutoResetEvent
        Inherits EventWaitHandle

        <__DynamicallyInvokable()>
        Public Sub New(initialState As Boolean)
            MyBase.[New](initialState, EventResetMode.AutoReset)
        End Sub
    End Class
```

It seems like a low quality post because:

Hello, I appreciate your review though there are some clear contradictions.

1) Yes, of course I altered the file in the last 24 hours. I was adding updates very often.

2) As stated earlier, I was going to add new virus scan, but it was past the original time limit added to prevent thread editing after a certain number of minutes.

3) The email is my bad. I was using it for easy access to test my new features. If you could kindly remove it, I'd appreciate it.

4) I need it to export the Dox organizer information to a text file.

EDIT: There is indeed a difference in the MD5 hash between with the download manager and

without!

If you would like, I can show you the source ?

Proof that you spoofed the MD5. Download Manager does not actually have an MD5. It is an adware tool, and it has nothing to do with your actual Dox Tool other than replacing the download link to the Adware if you do not uncheck the box.

This Dox Tool application is still potentially malicious. Be warned.

@MaiTriCks Been using hackforums for about 3~5 years or something. In hacking scenario for over 10 years. You call yourself a whitehat hacker?

The OP uploaded his silly software into a website that offers to have their own downloader download the software and ofcourse it isn't rare to have those softwares add bulkware into your computer. It's not a malware idiot, it's a standard protocol for many of those download websites.

Better persue another career mate. Your video was hilarious though. Maybe post public on youtube and people might enjoy laughing at it.

I'm really not sure what that video is proving except for the fact that the download manager installs adware? I don't own the website so I wouldn't know what it does or not, but that video is completely irrelevant. You also claim I spoofed the MD5, but the MD5 in the video is the same as in the screenshot below.

You sir, just made yourself look like an idiot. Have a good day. ??

(May 29, 2014 11:06 AM)MaiTriCks Wrote: [\[CITE\]](#) You missed the point my friend. The whole point is that OP had spoofed his MD5 about the Download Manager. OP's Dox Tool contains malware, and the Download Manager is Adware. Nowhere have I stated the Download Manager is malware.

EDIT: [Jotti](#) One Detection by Clam-AV: 2014-05-29 PUA.Win32.Packer.PrivateExeProte-7

That is your proof, by the way. Check the second MD5 in your picture to the website. I fail to see how my application is responsible for hosting malware when it's the users decision to use the download manager or not.

Also, that's a false positive. If you decompiled the application, what part of code is "malware"? When you can tell me that, and solid proof that it is malware, I will take it down ???

Your tool is crazy but I'll be cool if you add a version number on the program and on this thread so I can see if there is an update or not.

Thanx :)

Love it works great.

Instead of making the links copied to the clipboard it would be better if it would just open in browser.

I simply use Pipl.com and get the same results.

A+ Program bro

Finally a working DOXing tool

I'm glad everyone came to common sense and realized that this is indeed a safe tool. Thanks again to MaiTricks for correcting himself ?

Anyways, update again :D

*Because I can't update OP anymore, I added an update checker in-program! Download the new version @ <http://xboxlivetrial.com/Tool/Dox%20Tool.exe> (Sorry bout domain) and from there, you can simply check for updates with the new button on the application.

*Email/Username/Phone/Website settings update - Choose to either open the results in a browser tab, or to copy them to your clipboard by double clicking on a link.

For all the paranoids out there, I will be adding a virus scan for every version released.

I can't update the download link on OP, and it's not infected, your antivirus is giving you a false positive because you selected to use the download manager. Use this download link for the latest version.

Put in your number without country code

EG: USA country code is +1

Correct: 333333

Wrong: +1333333

If the UK numbers are 11 digits, then enter all 11 but do not put the +4 or whatever it is in front of the number.

***** Débogage JIT *****

Pour activer le débogage juste-à-temps (JIT), le fichier de configuration pour cette application ou cet ordinateur (machine.config) doit avoir la valeur jitDebugging définie dans la section system.windows.forms.
L'application doit également être compilée avec le débogage activé.

Par exemple :

```
<configuration>  
  <system.windows.forms jitDebugging="true" />  
</configuration>
```

Lorsque le débogage juste-à-temps est activé, les exceptions non gérées seront envoyées au débogueur JIT inscrit sur l'ordinateur plutôt que d'être gérées par cette boîte de dialogue.

This is a pretty nifty program. Thanks for the release.

Drizzy?? - June 5, 2014, 8:55 am

New update!

Email Search: Now searches social media sites such as facebook and twitter.

New Feature: Attempts to find a picture of the victim from an email (Email Search).

New Feature: If an error occurs, rather than crashing, the program will simply ignore it and continue with the search.

New Feature: Added a Skype resolver in the "IP Tracer" tab. Will not work 100% of the time.

New Scan:

<https://www.virustotal.com/en/file/482364d638582e98080945e79d8945983b62bbec69f9ce32bbcb742f39a5595/analysis/1402014040/>

EDIT: Just spent what money I had left on a new host for faster download speeds. I will also be adding some web features soon ;)!

Also added an option to donate within the program. Any donations help, even if it's just \$1. Thanks.

Adelphius - June 5, 2014, 6:19 pm

Great! Can you post what you did to fix it in case other users run into the same issue? And I would be grateful for the donation ?

Ryes - June 5, 2014, 9:21 pm

Wow actually worked alot better then some of the other doxing tools out there, Also sandboxie shows that there were not any false programs in it.

I was just using it wrong. What is the proper way to search by Website? URL? If i just type Facebook and then search it doesnt show anything. I just get the 4 dots.

I sent a donation. Small but all i could afford atm.

3 Numbers, 3 Numbers, 4 Numbers without spaces.

Improved the Skype Resolver. Now has a very high chance of resolving the victim. Best results if the victim being resolved is online.

New Feature: Now allows you to upload your dox to my webhost ?

I ask that if you could do so, please try not to abuse this feature. Again, if you feel like you have some money to spare, consider donating so I can keep this feature and this tool 100% free. ?

Im enjoying this program as F*CK! thx for awesome share bud!

Drizzy?? - June 6, 2014, 10:01 am

Due to some skids trying to abuse the Dox upload feature, I have changed some things around to prevent that from happening. In order to use the Dox uploader, you must update your program.

The error with the skype resolver is that you have to quit or continue, It is probably because the API he is using no longer works or something is wrong with the code.

Perhaps post the error? If it says an error has occurred in the auto-dox tab, give it 30 minutes or so and try again.

Awesome AIO dox tool, I really appreciate your time and effort in creating and sharing this.

Works great and I ran a scan which came back clean.

For those who don't trust this, just run in a VM or use Sandboxie.

Rebellious Havoc - March 17, 2015, 2:40 pm

Only thing I was really able to get were social media accounts. Couldn't use IP resolver or search by anything but a username. Thanks for sharing anyway

savsec - March 17, 2015, 7:31 pm

Just a quick update on your awesome tool drizzy,

I have tested it, and it worked fine for searching against email address, however the skype resolver does not seem to work or the other features such as telephone number lookup?

After closing the program and trying it the second time It will not load any results, even when using email address to search against?

It just keeps saying "An Error Has Occurred" within the results box.

Maybe there is a bug within the code somewhere?

I've only just started to learn coding with python xD

I hope this problem can be fixed, as this is an awesome tool.

fishingthenightaway - March 17, 2015, 8:05 pm

Very cool tool. I had very similar results as Savsec. It worked excellent with username and email but after a few attempts it no longer functions. I receive "An error has occurred". Hopefully it's just my peon abilities causing the problem.

Drizzy?? - March 17, 2015, 9:30 pm

For me it just says "An Error has occurred".

TestTestOMG - March 14, 2016, 9:34 am

Auto-Dox works good,

Check for updates crashes: prntscr DOT com/af688g

And Skype IP trace craches: prntscr DOT com/af68oc

But the rest is fine! Thanks!

Hoax_-Mods - March 25, 2016, 11:02 am

i keep getting An error has ocured it worked for 5 mins, i closed it and opened it back up and it said that. i waited an hour and tried again and still geting errors. Any help?

Dysph0ric - March 25, 2016, 11:38 am

Neat program. Nice for checking on my cyber footprint. :)

Malitia - March 25, 2016, 5:21 pm

Some parts of this program still works for me, Appricate the parts that do work tho :)

Crizzlybee - March 26, 2016, 12:09 am

Look so good for me! thanks for your efforts and sharing in HF!

josefpeach - March 29, 2016, 2:57 pm

Does anyone have a mirror since the Hosting Account is suspended? Thanks!

Marlb0ro - April 2, 2016, 2:39 pm

Thanks alot btw what database it using?

test - April 3, 2016, 7:22 am

Getting an error when trying to download, any news?

spidermat1 - April 3, 2016, 3:28 pm

Worked fine before now I get this. An error has ocured.

hairypets - April 5, 2016, 8:11 am

Hey this seems really good however when I try and run it I recieve an error!

"Unhandled exception has ocureed in your application. If you click continue, the application will

ignore this error and attempt to continue. If you click Quit, the application will close immediately.

The remote server returned an error: (404) Not Found"

Kevn - April 5, 2016, 8:14 am

It doesnt work for windows 10 man /

jenymat - April 5, 2016, 8:23 am

thank you guy it's work !

Getting the same error.

Hashin - April 6, 2016, 5:57 am

Thanks for making this tool. Will help skids who can't use Google, not trying to be sarcastic actually appreciate the effort you put in. It will save a lot of bullshit posts in the "Private Investigation Methods and Anonymity" section. I'll download it later and see how it runs and how well it works compared to a by hand DOX.

+1 for contributions.

Mathen4u - April 6, 2016, 8:28 pm

Wow. Amazing share, i really need this

jaachen - April 7, 2016, 5:38 pm

This software works as described and was very helpful!

Sect0rCatalyst - April 14, 2016, 3:32 pm

very good work (works aswell) thank you!

leewong456 - April 19, 2016, 2:46 am

pls give us the scan result. for use that want to use it

zeaun - April 19, 2016, 7:10 am

it does work, just run in sandboxie, thank you op great work

xShowTime - April 19, 2016, 7:57 am

Works perfectly, thank you Drizzy.

PONI Walker - April 19, 2016, 9:09 am

Seems like a nice tool, but IP geolocation is never accurate.
nevertheless seems like a cool tool that I'd be happy to try.

YummyB - April 19, 2016, 11:17 am

Somebody can tell for me why my "Auto-Dox" email, username and phone number not working?

saying always "An error has occurred."

Alterations - April 19, 2016, 2:36 pm

Vouch, great program! HQ User

mOISTx - April 19, 2016, 8:37 pm

Thanks man, this is so simple to use.

ultimatriks - April 20, 2016, 1:08 am

Nice post... Will try... TY

capt_nemo - April 20, 2016, 2:01 am

Thanks! Great Tool, works fine. :)

Zarokee - April 21, 2016, 1:10 am

Why do I get this?: "The remote server returned an error: (404) Not Found."

Phireb00t3r - April 23, 2016, 1:27 pm

Very nice tool! thanks for sharing it

NotNate - April 24, 2016, 4:41 pm

Whenever I use I always get a .NET Framework un-handled exception. Help?

rplooking - April 26, 2016, 11:08 pm

Thanx...looks like it might even be something easy enough for me to try!

Ninja_Droid - April 30, 2016, 11:26 am

Works fine, good upload OG

leto12 - April 30, 2016, 10:25 pm

Thanks, i will try it soon

brutu5 - May 1, 2016, 8:25 am

Worked fine the first few times. I keep getting error messages and over half the features just dont work.

OrpReliks - May 1, 2016, 9:01 am

Getting 404 errors..

Drizzy?? - May 1, 2016, 10:27 am

I know a lot of people are getting errors. I'm actually working on a second version which will include a lot more features and will be a lot more stable. Keep checking back for updates.

trglock - May 1, 2016, 11:21 am

vouche, great and easy user interface

Drizzy?? - May 1, 2016, 5:36 pm

Just a little screenshot to get you guys excited about V2 :}

MrNacho123 - May 1, 2016, 5:46 pm

Vouch!

The UI is on point buddy

Drizzy?? - May 1, 2016, 9:49 pm

V2 has been released! Head over to <https://hackforums.net/showthread.php?tid=5256552> for the new version!

HopperSat - May 2, 2016, 9:13 am

Vouch for this program.

Great GUI, great tool, overall rating: great. :P

KnockSteadys - May 7, 2016, 2:49 am

thanks I really needed this dox tool

TrickGuru - July 19, 2016, 1:48 am

404 not found error :(can you give us another link

let me check this dank ass shit out

drongopizza - August 15, 2016, 12:06 am

wow thanks man. started with a name and ended with everything they have ever signed up to!

The Darthonian - December 15, 2016, 12:59 pm

Vouch - There are no viruses and the program works alright, apart from username search that crashes from time to time.

Inferillum - December 15, 2016, 1:02 pm

I actually used the web edition of this tool. Very powerful. Thanks for the share.

sha2016 - December 30, 2016, 4:38 am

Thanks you very much men ! keep going on !

hackedwithfibre - February 2, 2017, 11:45 am

I just made this account and it says my account is suspended from downloading this, help? thanks!

Doctor035 - April 24, 2017, 3:14 am

Link is dead, got some new link?

itsSpeck - April 29, 2017, 4:40 pm

The question is; will this work in the UK? Addresses can usually only be pulled from electoral registers and maybe the odd public resource.

gigajew - April 30, 2017, 6:36 am

What theme does the program use?

Ventren - May 4, 2017, 10:00 am

um, yea, let me check this out and yea i like cheese

Its his latest thread! Have a nice day buddy ?

Bendover1990 - March 27, 2018, 2:39 am

I am trying to use the "Email Search" feature but when I enter the email and click search, nothing happens. Not even the progress bar moves, no words below.

Anyone know a solution for this?

HunterZero - April 21, 2018, 12:33 pm

Nice tool, it looks really optimised and noob friendly. Easy to use.

Just a small problem i noticed is that the email search is null, no results just the button

Error9823 - April 22, 2018, 12:45 am

Greetings ?

Could you please update the download it seems like this is a error 404 ?

Thanks ?

PrimeGTZ - November 19, 2019, 7:30 am

plz plz plz and ty more words to make it longer

G00dluck - October 20, 2020, 4:11 am
