Thread: [\[TUT\] School Administrator with NO downloads\[/TUT\]](#)

Mutiny - May 27, 2014, 9:45 pm

So this tutorial is just for the people who get bored at school or just want administrator privileges at school and on their account.

Step 1: First of all if you can take out the battery of your laptop then read A: if not then revert to B:

A: You're wanting to get into the startup recovery I think it's called? So boot your laptop then take the battery out and then turn it back on with the battery in and boot into Startup Recovery.

B: If you can't take out the battery as in its screwed in their or there is no quick slid thing then what you wanna do is turn it on then wait 1-2 seconds then turn it off. Do this a few times until there is an option to put it into the recovery option

Step 2: Once you're in this startup recovery tool what you're going to want to wait for it to do the " Searching for the repairs " then it'll say send report or not. DO NOT close the message box and below the two options it'll have view report or something along the lines of that. Scroll to the very bottom and it'll have " View this if it isnt working online " (as in the very bottom option) and click it. Then it'll open it in notepad.

Step 3: Now go to File > Save As and System32. In the saving option make it so it has " All files " so you can see .exes then locate osk and rename it to anything apart from its current name like " Hackforums" but do not put .exe in the name.

Step 4: Once you've renamed osk (on screen keyboard) find cmd once you've found cmd then rename it to osk

Step 5: Once you've renamed both these then hold the power button and wait for it to turn off. Press the power button once again and wait for it to get to the login screen.

Step 6: Once you're at the login screen on the very bottom left there is a circle, click that then check the box that says type on screen or whatever then hit apply. CMD should then open.

Step 7: now in CMD type control userpasswords2 select your account then properties (I think) then change the type to Administrator, click apply and login with that account :)

Ahaha yeah it is :) no problems ?

LGxTragic - May 27, 2014, 10:28 pm

This is quite interesting. Probbly get in a lot of trouble for doing this.

SniperWolfOffi - May 28, 2014, 3:48 am

It's interesting ! I gonna try this at my school, thanks you men!

Vanilja - May 28, 2014, 3:50 am

Hmm.. I try this next week.

Thanks for sharing.

justmatty - May 28, 2014, 3:00 pm

Thanks for sharing this method, gonna try it on my school computers =D

Mr. Mayhem - May 28, 2014, 5:27 pm

Thanks for sharing the info, just don't want to get caught doing it.

mini890 - May 28, 2014, 6:56 pm

It's nice, i used to do the same thing but switch the sethc.exe to cmd and then press shift five time. Instead of sticky keys warning I would get cmd.

Mnikkilla - May 28, 2014, 8:31 pm

SnowCloud - May 28, 2014, 8:54 pm

Thanks for sharing. I already know the Administrator account info with my black hat skills.

Just kidding, can't believe shoulder surfing still works.

Accelerator. - May 29, 2014, 4:21 am

Can vouch for OP, used this method a while back to gain admin rights on my school laptop, been selling the method to kids at school :3

Jerrelle - May 29, 2014, 5:13 am

Thanks for the share, may try this next time I'm in school.
