Thread: [Dumbest scammer EVER! Hacked](#)

Love and Peace - May 28, 2014, 4:02 am

How i Owned a scammer and took full access to his site under 5 minute

ive seen many scamms and thieves but this take the cake

This site offers you money and all you have to do is login to your bank account.....?

Who ever run this site is a retard, after 2 minute i found this

This dumbass didnt even remove the source code but instead added it aswell

now lets take a look at this

Once your enter your info it saves username,password and your ip address

it tries get more info out you, then it redirect to a real bank website to make it look legit

But wait theres more...HAHAHA now it send the info to his gmail ?

Hold on 1 sec so i decide do a little research and.....GUESS WHAT? I NOW HAVE ACCESS TO THIS IDIOT WEBSITE

Why dont the fbi go after idiots like this instead of some kid who buys blackshade , What should i host on his site? ?

[Bytific] Andy - May 28, 2014, 4:13 am

Sign that fella up to some dodgy websites..

B?ue - May 28, 2014, 4:19 am

Gonna start spamming his email now with porn subscriptions, good post op! I'm gonna give this scammer so much shit

wellager - May 28, 2014, 4:19 am

I'm surprised they don't ask for your SSN

Madison Ivy - May 28, 2014, 4:21 am

Added him to few email subscriptions, thanks for sharing OP!

Reviews - May 28, 2014, 4:21 am

im curious whats the link to site lol

What a ridiculous site, hope no one falls for their nonsense.

Krew - May 28, 2014, 4:40 am

Hosting a bank login stealer at Hostgator and having your website source available as a .zip file in a public directory. Smart scammer xD

xzzzzx2 - May 28, 2014, 4:45 am

There are people that don't have any knowledge about things like these and they actually fall for this.

It sucks, but it's true.

Vanilja - May 28, 2014, 4:47 am

Lol nice find.

Was pretty hilarious

Some people are so dumb ???

Im guessing no one signed up, but check just in case :)

Twinsun - May 28, 2014, 5:06 am

I was going to say why the hell they used there real email then I thought nevermind they don't know

how to make a proper website to scam people with.

If I was going to get scammed I would want to be scammed someone who isn't retarded and actually gives a fuck.

TheMike - May 28, 2014, 5:10 am

If you want to scare the shit outta him i'd suggest remove everything from his website and only upload this picture to make it look legit like FBI have seized his web-site.

This: [img]http://bshades.eu/banner.jpg[/img]

Krew - May 28, 2014, 5:14 am

I must say, he has some very neat PHP sources.

Haha you fucking genius, thats funny but im thinking doing bigger things to this scammers ;) ill keep you guys updated

Aceman - May 28, 2014, 6:26 am

It's not worth the FBI's time since there are thousands popping up every day. There are people who go after these sites but they can't find them all right away.

SIM-1073426 - May 28, 2014, 6:41 am

Uhm..I just searched on his email and found the Shell you screenshotted.

Bro? - May 28, 2014, 6:42 am

Nice job. You should expose this guy on that website or something like that or like try to get a domain change to whatever you want.

Krew - May 28, 2014, 7:04 am

<http://inkaprotein.com/online/c99.php>

Uploaded a shell. This scammer is losing all his files.

Realizm - May 28, 2014, 7:18 am

There are a ton of grammar mistakes on the website. This guy is seriously stupid, I mean he couldn't even spell authorized correctly.

Thats what im talking about, this was too easy probably stupidest scammer ive seen so far

T0ucaNSaM - May 28, 2014, 7:26 am

hahaha beast modwe OP if i do say so myself.

what an idiot.

WarOnDrugs - May 28, 2014, 7:28 am

Link to the GCSB website or something, hahah.

Nigga From Africa - May 28, 2014, 7:30 am

Did you find the shell or did you manage to upload it?

Reviews - May 28, 2014, 7:32 am

wow lol this guy is skid as hell cant even secure his crap

??ph??! - May 28, 2014, 8:04 am

You should keep spamming his email address.

Vodge - May 28, 2014, 8:12 am

i remember when runescape phishers first started, people used to use like downloaded templates one, the passwords were saved in a text file as passwords.txt

i used to just go hunting for people advertising their phishers and steal all their logs. made over 200m which was pretty nice. didn't take long before some noob decided to post on a forum how to do it though which ruined the method

Critique - May 28, 2014, 8:18 am

I'm guessing that's one of your ways with dealing with scammers.

I hope he saw it coming haha.

MAYBE you can help me answer this ??? i have.

If he left his shit vulnerable what are some actions he should have taken to secure the site??
?

I have seen those before im like wtf really now. YOu have to be an idiot to give them that kind of information.

zoopazexy - May 29, 2014, 2:13 pm

The site got taken down now ? . But that is hilarious. I wish this could happen to every scammer.

Haha I also used to de-compile phishing programs for RuneScape that I found on YouTube, GMail accounts weren't hard to find. I'd delete the video then their E-Mails, I'd never take any of it myself however.

s7venty s7ven - May 29, 2014, 2:46 pm
