This isn't a sales thread :)

It is a free scanner

Moon Rock - May 30, 2014, 7:09 pm

I like how it scans fast, and it looks clean. Thanks for the share :)

However it doesn't keep a link so others can see the scan.

mircosfot - May 30, 2014, 7:12 pm

Awesome site! Vouch for Sh1eld! Simple and easy to use.

Anonmoosekaab - May 30, 2014, 7:13 pm

Nice job, simple scanner and highly nooby-friendly. The theme is a neat little extra too, even if the difference is hard to notice. Good job and I hope your scanner runs well!

Flaxpicker - May 30, 2014, 7:14 pm

Vouch for Shield

Love this scanner already ?

Oops that was a mistake. It is fixed now.

Will be adding concurrent scans tonight.

Skorp - May 30, 2014, 7:18 pm

Vouch for Sh1eldy, will use it if needed! Nice.

Alex - May 30, 2014, 7:26 pm

Vouch, seen all of Sh1eld's products myself and I can assure they're the highest of quality.

MCWarriorz - May 30, 2014, 7:32 pm

Awesome scanner, will definitely use this. Thanks for the scanner!

VRUMM - May 30, 2014, 7:46 pm

Thank you for all the comments. Appreciate it.

Quest™ - May 30, 2014, 8:01 pm

Sweet finally a better malware scanner, thank you.

MineSQL - May 30, 2014, 8:40 pm

I'll vouch for sh1eld. He is a good guy and runs a great service here.

VRUMM - May 30, 2014, 9:37 pm

Again this is a free website. Nothing paid here.

stonerdays - May 30, 2014, 10:27 pm

Vouch for OP. Really nice scanner.

Odin the Wanderer - May 30, 2014, 11:21 pm

Vouch for Sh1eld I have never seen an LQ product from him,

~Tom~ - May 31, 2014, 1:24 am

Vouch for sh1eld, he's got top quality products.

All engines are updated. Which one you think is not?

-1234- - May 31, 2014, 6:00 am

For example Bitdefender. I scanned a file that is detected by Bitdefender PC version and your scanner doesn't detect it.

VRUMM - May 31, 2014, 6:02 am

(May 31, 2014 06:00 AM)-1234- Wrote: [\[CITE\]](#) For example Bitdefender. I scanned a file that is detected by Bitdefender PC version and your scanner doesn't detect it.

This is in scantime enviroment, not runtime.

Basically, your file will not be detected when it is downloaded by Bitdefender, but when it is executed, it will show up as malware since it isn't runtime fud.

-1234- - May 31, 2014, 6:11 am

It's detected during right-click scan too.

VRUMM - May 31, 2014, 6:17 am

(May 31, 2014 06:11 AM)-1234- Wrote: [\[CITE\]](#) It's detected during right-click scan too.

It is highly likely due to a runtime checking feature because this is the updated engine.

Would be nice if it was a bit larger.

Also what file extensions can you scan?

+3 concurrent scans

xVulnerable - May 31, 2014, 12:23 pm

Looks good, will be using this. ?

Odin the Wanderer - May 31, 2014, 2:22 pm

Vouch again, I just recently had to use this product.

Aura 2.0 - May 31, 2014, 2:40 pm

I get this error when scanning.

Works great 95% of the time, however a couple of times I think it corrupted the file somehow because the scan result hashes were not the same as the files I uploaded, but it's a free scanner so I am not upset about it, rescanning the file usually will upload an u corrupted version so I get an accurate result

Kangaroo?? - June 2, 2014, 6:57 am

Great scanner just used it and it works nicely :)

Dude, you will get banned from Scan4you if you continue doing so, the owner doesn't like much free scanners using his API and/or if you don't paid for the unlimited API (100\$/month).

look pretty greats scanner

VRUMM - June 2, 2014, 10:09 pm

Enjoy this while it lasts :(Just had a talk with scan4you

Niely - June 3, 2014, 10:52 am

^Why?! :(

This is an awesome scanner bro! :)
I used this yesterday and it works like a charm.

But maybe you could make something like "Share this scan" so people can easily copy the URL of the scan and don't have to use the URL in the browser addressbar. :-)

VRUMM - June 3, 2014, 10:55 am

Looks like I have to make this a paid scanner since I can't make free scanners with Scan4you API.

Niely - June 3, 2014, 11:12 am

^That is really sad! :/
Can't you make your own API/use another free one.

Homunculus - June 3, 2014, 12:45 pm

this is a welcome development and if you implement subscription, i will be glad to patronize you.

It will cost looking at around \$500 or more. The api is just that more convenient.
