OP provides fast and awesome coding service.

I'm a freelance programmer and web designer. Being a college student makes it hard for me to obtain money, so I'm doing this.

Languages:Python - My best language by far.

PHP - I've been working with it for awhile, and I'm above average.

MySQL - I'm excellent with it.

Bash - I work with Bash everyday.

HTML & CSS (Web Design) - Been working with these for 4+ years.

C# - Probably my weakest, but it's an easy language so I shouldn't have too much trouble.

Prices:Web Design (I consider this HTML, CSS, and sometimes PHP) - \$8 per hour.

Scripting (Python, Bash, C#, and sometimes PHP) - \$10 per hour.

You'll be given as estimation of the time I think it'll take to complete.

You don't have to pay first if:50+ rep

No scam reports

You must meet all of those requirements.

Otherwise I get paid about 25% of my estimation up front, another 25% upon completion, and the last 50% when you get the source code/script/etc.

Payment Options:PayPal from trusted members.

BTC.

LTC.

OMC.

Refunds are offered if:Script isn't functional (this won't be a problem because I'm testing them out).

You're not satisfied, although I still can choose whether I want to refund you for this.

I don't complete the project in time.

Other details:All projects should be completed within a couple of days, usually just one though.

Cancellations can only be made in the first 24 hours after the purchase.

If you cancel after 24 hours you must pay me for the hours I've worked.

Contact will be made through PMs, Skype, or XMPP.

Thanks!

Do you have a portfolio of any sort?

**stonerdays** - May 30, 2014, 8:05 pm

Not of web-design, I have a Github. I'm not able to link because my scripts would be deemed as against the rules.

May I see a portfolio? I just want programs made, specifically I want you to fix up a program that has stopped working for me.

**FOUNDER** - May 31, 2014, 3:10 am

Hi,

My website is instasocial.in

Can you redesign it?

Also would it be possible to use bootstrap while redesigning it?

Let me know your quote.

Hope to hear from you.

**Sparta.** - May 31, 2014, 3:29 pm

Do you think you can make me a MyBB page that displays game servers, such as Minecraft, Garry's Mod, and so forth?

**stonerdays** - May 31, 2014, 4:17 pm

Possibly, I'd need an example/detailed description.

I'd like to be able to add/remove server IP:Ports and it'd be displayed on a MyBB page, and maybe even a connect button as well.

It's a MyBB plugin, if you know how to make one.
