Thread: [YouTube View Bot w/ Proxy Support](#)

Bruh - May 31, 2014, 9:50 pm

I know it's not the best share but a while back I coded this youtube view bot. It supports a proxy list and view intervals. It's pretty shitty because it uses a webbrowser instead of requests but I figured some of you could learn from it. Enjoy it guys :)

Please post a virus scan and a image of your tool.

Edit: Please upload the virus scan too.

Bruh - May 31, 2014, 9:57 pm

(May 31, 2014 09:53 PM)Black Root Wrote: [\[CITE\]](#) Please post a virus scan and a image of your tool. Just updated the thread with a screenshot of the tool. A virus scan isn't needed because it's the source but if you think so, feel free to scan it and I will edit it into the thread. ?

Thanks!

I find this very useful and it will be helpful to me!

It's a source, don't think this is necessary.

Code isn't very fancy itself, no error handling or such. Maybe this helps someone though. lol.

You open the project and you press F5..

CloudSigma - June 2, 2014, 9:23 am

Thank you for the source man! Downloading :)

As far as I know YT only counts views from webbrowsers, I could be wrong though.

jbr07.hacker - June 9, 2014, 2:59 pm

Thanks Man For Sharing This With Us

?XilluX - June 9, 2014, 3:05 pm

I took a quick look at it, looks good so far.

It can count from a httpwebrequest, you just need to learn how the requests are sent and understand what each parameter does. A lot of reverse engineering is required for the javascript etc. It's a real pain in the ass.

SIM-2339042 - December 5, 2014, 7:22 am

Good Job man! Keep it on! Thanks for the download!

AntiHacker - December 5, 2014, 2:02 pm

thanks for your great work sir

nice and neat! god bless you

A ? ? ? ? ? - December 5, 2014, 2:34 pm

what's the Use The views will get freezed after 301 views. youtube View Algorithm is Hard to crack, even if it get's cracked Youtube Keep's On Updating it.
