Thread: [Infamous | Developers, Graphics Artist & Marketers | Recruitment](#)

SIM-888979 - June 1, 2014, 12:34 am

== Innovation Department Recruitment ==

Welcome to Infamous newest recruitment thread. This time, the Innovation Department, a newly created group or sector, in the group is looking for new members. The qualities we look for are hardworking, innovative and active. Members who are unable to get in through previous recruitment are free to apply again. Members who are applying are also encouraged to put in effort into their application, as applications which are sloppy will be denied. The Innovation Department is a group of members dedicated to producing innovative ideas in the name of Infamous. We will be looking for people who are interested in marketing and creating products, as well as sharing our knowledge with one and other through our subforums. Members of the Innovation Department will also have access to Judge Dredd's Sponsored Member Forums (Judge Dredd's Personally Approved Products and Services).

We want members who are talented in their own field which will help increase the qualities of our innovations. People who are creative graphics artist, smart programmers or a great marketer are most welcome into this group.

Telstra - June 1, 2014, 12:36 am

Name:

Logan, but on HackForums I go by the name of Telstra.

Timezone:

AEST, GMT +10

Experiences in marketing, programming or designing:

I have been marketing on HackForums and other websites for almost a year now. I am very money driven, and this shows in my marketing practices. I love making investments, and love seeing the money roll in from the investments I make. I am experienced with dealing with customers, and have a great knowledge of the HackForums marketplace. From my business ventures I currently earn around \$100/day autopilot, which in turn has seen me leave my part time job, and be able to support myself from online income. I recently had bit of a marketplace issue with me being given resale rights to an eBook that had been copyrighted, but I am currently working with the original owner of the eBook to make some sort of compromise for what has happened. I enjoy teaching, and learning from others new and improved ways of making money, and am happy to share my experiences with fellow Infamous members, if I were to be accepted into the group.

Here are my earnings just from today (Only 6pm now, will double before I go to sleep, well it usually does):

Spoiler ([Click to View](#))

Examples:

Currently all of my marketing is based off-site, through websites such as ebay. I recently stopped selling my eBook due to the issue I mentioned in the previous section of my application. I am currently on the lookout for more projects to invest in, and perhaps going to start looking into something being coded for me.

Why should we choose you over others?:

I believe you should choose me over others because of my determination. Anything I set my mind to, it will happen. Whether it be something simple as a small assignment, or developing a product to be sold.

Thank you for reading my application Aurora, I look forward to potentially being a part of one of HackForums' greatest groups.

Experiences in marketing, programming or designing: Successful social media seller with shop with over 40 vouches and 100 replies (made over \$250). Can design and code in HTML and CSS without a problem. I am also half decent with graphics!

Why should we choose you over others?: Quite trusted member, not even 1 negative or neutral rep! Very helpful and willing to do whatever I need to in order to be a respected member of Infamous. Online extremely often (4-6 hours a day) and love the community of HF!

-

Please note I have a 60% warning level, for ridiculous reasons. 20% runs out on the 4th of this month, and the other 40% runs out on the 20th of this month, then I will be applying for ub3r!

Experiences in marketing, programming or designing: Marketing

Examples: I have owned a RSGp/RSPSGP shop, Middleman service, and am now owning a RSPS that will become within the top 5 close to a month from now. Owning a RSPS, IMO, is marketing because I take this thing as it's my business. I spend my money, time and commitment into this, which is what a personal businessman would do. Also, I have an eBook being released soon.

Why should we choose you over others?: Along, with my business skills, comes: Personal communication skills, where I can interact fondly with many members. Not just that, but, my people skills help me talk to those who desperately need someone to talk to. With all that I have been through, I know what it's like for someone to need a person to talk to. I am not the brightest of all people, my skills aren't amazing, however, I am a dedicated individual. You will not regret having me as one of the 10 you accept. I have been inside Brotherhood since it started and I am still in it, which is a great example. I really hope you accept me.

Why should we choose you over others?: I am a very chill person who is always willing to learn new things such as marketing, programming or even getting better at designing. I am very easy to work with and enjoy just chatting with others. I also am very hard working and strive to do my best at whatever challenge is thrown at me. I feel like this group would give me the chance to help expand my skills to just more than Gaming and Graphic Design.

Experiences in marketing, programming or designing: I have been doing graphics design for a few months, started back in mid or late January 2014, I wouldn't consider myself a pro, but an experienced amateur, meaning I got some knowledge in the structure of design, but I don't fully know everything about it. I got many years ahead of me before I can consider myself experienced designer. I got some of my best work so far in the examples. Ive worked from thread designs, signatures, and other. I worked with web design a little bit, but don't got much experience in it. I make from flat and non flat designs, all from scratch, from a simple text to something magical.

Why should we choose you over others?: I am a hard worker when coming towards anything interesting in mind. I guess trustworthy, don't think it will even effect anything in this app, Im sure

others got more talent than me, so they deserve to be chosen, but I got a positive attitude most of the time. I hate this question, so you can decide. Creativity is where I stand. Im pretty dedicated in some situations, but when coming towards creativity with designs, then I am almost never a slacker at work.

Scratch that on some things, I can be lazy if like an assignment is placed on the wrong day or time. But most of the time I work for it.

Why should we choose you over others?: Why? Can't say, because I'm not the best of the best of the best. I'm just good at what I do. I don't boast a-lot and I tend to do things seriously when there's a need for it. I always love to help others and adore browsing around at css-tricks (although some of the contents are outdated). I am also pretty much good at researching (or Googling, whatever you call it), as it helps me 50-70% of the time while I code. Only thing different about me than the others (like wayyy different) is how my personality goes. However rude or pissed my client/friend/prostitute/contact is, I always tend to stay relaxed around at serious moments and always attempt to chillax (chill + relax) them. I'm no different than the other coders in terms of motivation, hard work and research, to be frank. Programming could be a competition, but coders aren't meant to compete for the best. They are supposed to work together for the best, and that's how I was nurtured :)

That's all I can differentiate, although I come under the notion that all people are equal and no human is better than the other, just that it depends on how motivated and hard working they are (so tbh, I did have difficulty answering this question).

Good luck to the other applicants ?

((forgot to mention that my older post was instantly messed up as I accidentally pressed the wrong button, Ciao ?))

I've sold social media services for almost 2 years. Here on HF, I currently sell an ebook, but am working on producing a RAT and crypter. Marketing has always been an interest to me, and I've learned a lot about marketing. I've read psychology books on how to convince an unsure buyer to purchase your product. I've learned the do's and don'ts of successful advertising. I feel all my knowledge of a successful marketing campaign could prove useful for group projects.

Experiences in marketing, programming or designing:

Marketing - Since being on HF I have marketed three successful ventures. Firstly, I was the highest margin WoW game time seller, turning a profit of nearly hundreds of dollars per week. That venture went on successfully until Blizzard changed their system so that my sales could not continue. After that, I took up eWhoring. I found myself to be very proficient in this field and shortly after feeling that I had exhausted by time with a particular method, I released it for sale on HackForums, and made over \$1,000 USD through the sales of that eBook. Currently, I am a social media service provider on both HackForums and eBay, which is minting me a pretty penny.

Programming - I am proficient in Visual Basic, and have developed a working launcher / installer for my gaming clan.

Designing - I enjoy using Photoshop, and will always create my own graphics wherever possible. Time permitting, I can create impressive work of a high standard, using Photoshop and Illustrator.

Examples: See above for examples of my endeavours.

Why should we choose you over others?: That is a rhyme and reason beyond my scope. Only you know what you are looking for in members. If I do not fit the bill then so be it. However, if you feel I may potentially be an asset to this group, I would be more than delighted to join your ranks.

Experiences in marketing, programming or designing: I mainly have experience in marketing, and a bit of programming. Just about all my marketing online has been on Hack Forums. These projects include booters, various programs, tools, etc. Programming wise, I know a fair bit of Java, and am decent in HTML, JS, CSS, etc.

Examples:

Why should we choose you over others?: I'm a dedicated, focused, and pay a lot of attention to details when it comes to things I'm passionate about getting done right. My biggest goal is becoming proficient in various programming languages. This is because I've always relied on another person to do the programming side of things, and I'd like to become more comfortable with taking up that side of the project to make me a more independent marketer.

I'm currently wielding the most experience in the marketing field.

I've been monetizing different sites online and I'm always trying to learn new and unique ways to earn more, both offline and online.

That's why most of my work consists of website's and YouTube video's.

I won't say I'm the biggest earner of HackForums, but I do know on how to run & manufacture and keep an ongoing business.

I've sold quite some products before (links in the 'examples' section).

Examples:

[#1 PPD/CPA WIDGET SKINS | ONLY 3\\$](#)

[YouTube related to COD/Other FPS \[PARTNER\]](#) (auction)

[YouTube related to drawing/gfx \[PARTNER\]](#) (auction)

And other niche links being used in CPA/PPD

Why should we choose you over others?:

I'm already acknowledged about the fact that I'm still not fully educated inside the marketing field.

My main reason to join this group, is that I want to learn new things while sharing my knowledge with members inside the group.

To strive to my goal, I always keep the sentence "knowledge is power" in my head.

Because that's where it's all about.

I'm a professional Currency Exchanger, I've done tons of deals in the past and I'm still very actively exchanging. I mainly exchange Crypto Currencies (BTC, OMC, LTC,...) to PP and the other way around. I've made a lot of money, not only by exchanging but also by smart buying and then reselling at a higher price on another site or simply to another person. I spend countless hours monitoring current market prices and reading news on what's happened to form an image over what the price will do (if it will decline or increase) and then go from there to decide whether to sell or to buy, to maximize my profit.

Examples:

You could take a look at my rep where you see quite some rep I've gathered by exchanging on-site, but most of my exchanging is done off-site. A screenshot of my OMC wallet currently: Spoiler ([Click to View](#))

Hello, my username is ~HF~, i'm 17, and i'm from England.

I have been Selling/Marketing/Monetizing Online since I was 12 years old. I have made £32,000 online/in real life so far. My current method of making money online is using CPA. Im making \$20 per hour, I have also made \$1000 from my ebook sales in two weeks. I have lots of experience with Business. My dad owns his own business and I help him run it along with my brother. Helping running my dad's business have given me a lot of experience in the business side of the world, and has surely helped me make all the money I've made online and in real life. Currently I am studying: Business Studies, Economics, ICT and Maths for my A-Levels, which has vastly increased my knowledge business and marketing.

Example of one of my products: [CPA Goldmine](#)

You should choose me over others because unlike some other people I don't just have a ebook that does not work well and sell it for a cheap price to make money online and call myself a marketing/business man. I have earned big money, and im a real marketer. I started at a young age and am now making more money than most people my age or older. I also have more knowledge of marketing and business than most people as I study it and use it. Not just marketing a ebook on hackforums. I actually also lead a group myself. I have been allowed to fully manage it and im making it into a Business/Marketing/Monetizing group, as thats what im best at. I hope this shows you my skill set and knowledge. If you require to see any proof of money or want to know more about me, feel free to pm me.

Thanks.

Experiences in marketing, programming or designing: When OMC first started out I originally invested \$5 BTC which eventually lead me to 15k OMC and \$75 BTC before it being stolen (this is when OMC was 1:20). I had been mining at the time and was able to turn the 1k OMC I had from the mining into \$300 BTC and 10k coins. Since then I have used that money to invest and build a stresser with a long time friend. I'd rather not post our weekly income but for the short amount of time we've been open we've been very successful. During this time I've also been doing exchanges as well as small investment when I see good opportunities.

[img]http://x.hackforums.net/uploads/ficons/infamousf.gif[/img]

Examples: \$5 into 15k OMC (when price was 1:20 that would be \$750). Took the 1k coins I had left over and turned it into \$300 BTC + 10k coins + a couple hundred on PayPal. Now that money is involved in a successful and profitable stresser. On the side I have also been making currency exchanges when I see good opportunities and deals.

[img]http://x.hackforums.net/uploads/ficons/infamousf.gif[/img]

Why should we choose you over others?: I refuse to associated myself with any bad product. If I am involved I want absolute customer satisfaction and to have the highest quality of product. Investing profits back is something I have no problem with unlike many people who do business. Good business requires customer satisfaction and unlike many product creators I'm not greedy and understand the long term benefits of spending more to ensure a great experience. I'm somebody who is willing to put in as much work as it takes and am always looking for ways to improve what I am working on or selling. You should choose me because I will work harder and smarter than most and will not give up, but instead will innovate.

I'm a professional Currency Exchanger, I've done tons of deals in the past and I'm still very actively exchanging. I mainly exchange Crypto Currencies (BTC, OMC, LTC,...) to PP and the other way around. I've made a lot of money, not only by exchanging but also by smart buying and then reselling at a higher price on another site or simply to another person. I spend countless hours monitoring current market prices and reading news on what's happened to form an image over what the price will do (if it will decline or increase) and then go from there to decide whether to sell or to buy, to maximize my profit.

Examples:

You could take a look at my rep where you see quite some rep I've gathered by exchanging on-site, but most of my exchanging is done off-site. A screenshot of my OMC wallet currently:

Experiences in Marketing, programming, or designing:

Marketing

I have sold 5 eBooks in the past, all receiving over \$500 in sales over the course of selling them. I also made around \$7,500 by reselling products on various marketplaces. Made \$7,500 with only \$100 starting investment. I also have a graphics shop in which I take orders and fulfill them based on the clients' choices/preferences. I made \$500 in 3 days with this shop from customers coming to me and also finding customers that post requests. Along with all of this, I have also owned a fairly large gameserver network. We hosted servers on Garry's Mod, Terraria, and Minecraft. I received \$5,500 in donations in the 1 month that it was open and running.

Programming:

I know a decent amount of web development code (HTML5, CSS, and some PHP). I also know a tiny bit of LUA, just enough to get by editing scripts and whatnot. Beyond this, i'm quite clueless when it comes to making my own scripts and things. Generally I can edit anything that's given to me as long as I know the basics of the language.

Graphics:

This is the category where I feel that i'm near the top of the entries in. I have always had a passion for graphics and arts since I was a little kid, and now, I feel that i'm a quite experience graphics designer. I have a graphics shop that is located in the Paid Graphics section of the marketplace. I have been making websites for minecraft servers and hosting businesses for almost 3 1/2 years now, and have made a fortune off doing so. My portfolio can be seen in the "examples" section of this application! Before I made the HF userbars, I really didn't participate in the graphics section of HackForums. After making the new official userbars, I feel like I have contributed a lot towards the graphics section and I continue to strive to do so in providing quality graphics in my shop and giving criticism to those in the Rate My Graphic section.

Examples:

Current eBook that i'm selling: <https://hackforums.net/showthread.php?tid=3754748>

Graphics Shop (Imperial Designs): <https://hackforums.net/showthread.php?tid=4255498>

Portfolio: <http://minus.com/m0bGqaakrbNSo>

I realize I only have 2 (project) examples at the moment, because these are the only 2 projects I am managing right now. I would rather focus on 2 projects and make a decent amount of money on them while providing a quality product.

Why you should choose me over other applicants:

You should choose me over the other applicants due to my experience in graphics design. I know that Infamous has great designers, but I feel that most of the other applicants that are designers do not have the quality of design that I do. The reason I want to join Infamous is because I have always been wanting to join a group, and I feel that Infamous has some great people inside and I could learn a lot from them!

I hope you consider this application.

Thanks,
Kiosi.

A little extra information about the projects I have made / am working on:

The project manager: The project manager is an application I developed with 2 others, so that we can manage our product development without having to constantly be exchanging information.

This allows anyone with the privilege of "Admin" to create projects and tasks. Everyone else can add task notes to each task, and mark off projects.

Project Color Key:

Green: Low priority

Orange: Medium Priority

Red: High Priority

Task Color Key:

Red: Completed Task

Orange: Started task

Green: Have yet to start task

The RAT: This rat is still in development. Me and a buddy of mine are both working on this. Whether or not we release it is dependent upon peoples "want" for it. It is currently in working order (as seen with the slave list).

- Dollarboot

Sales thread

[IMG]<http://x.hackforums.net/uploads/ficons/infamousf.gif>[IMG]

I was one of the founders of Dollarboot. I handled a lot of the support but my main job was handling sales.

During the 3 months i worked on it we turned into a well known name both for our amazing prices and actually delivering what we promised.

That changed dramatically at the end though. If you want more details i am fine with discussing it privately.

- Blackout HTTP

[IMG]<http://x.hackforums.net/uploads/ficons/infamousf.gif>[IMG]

[IMG]<http://x.hackforums.net/uploads/ficons/infamousf.gif>[IMG]

This is my most recent project and one of my more successful ones.

In the two and a half months i was a part of this project i learned a lot about the market and gained a good bit of knowledge.

- GhostRDP's
12 pages
Sales thread

[IMG]<http://x.hackforums.net/uploads/ficons/infamousf.gif>[IMG]

I ran this store for rdp's on and off for about 6 months. This was really my stepping stone into the HF market.

previous to this i primarily sold accounts for different sites. I didn't earn a lot of money running this project as i was a newbie. Still gained a lot of contacts and learnt a lot about marketing.

- Misc

I have also sold a lot of other products and made smaller sales.

A lot of it was offsite and some i feel are just to small to require there own section.

My biggest business at this time is offsite and is related to spotify.

To learn more just send me a pm.

Here is a list of smaller threads that didn't require there own section.

| Why you should pick me - Reasoning |

I feel that what i can bring to the table is stability.

I might not be the brightest shining star but i haven't gone up in a puff of smoke and disappeared either.

A lot of people join and literally explode into popularity to end up disappearing two months later. Instead of that i like to bring stability and satisfied customers. I know how to play the market and what to not do since i have probably already done it or watched a close friend do it.

Experiences in marketing, programming or designing:

I have sold an eBook on here that had made just about \$100 in a week, and sold the resale rights. I also currently have a Shisha Pen Store on the market, we get multiple customers a day and I guarantee customer satisfaction. No customer gets their product and is not happy with it.

I also had a Steam Gift Shop up and made a ton of sales, until Steam Gift sales were banned on HF, then my thread got junked.

[img]http://x.hackforums.net/uploads/ficons/infamousf.gif[/img]

Examples:

<https://hackforums.net/showthread.php?tid=4246914> (My Shisha Thread, which has more than 100 responses, and we get a ton of customers a day!)

<https://hackforums.net/showthread.php?tid=4236905> (My Steam Wallet Magic eBook which sold more than 20 copies totaling to more than \$100)

<https://hackforums.net/showthread.php?tid=4257557> (My resale rights auction in which the first bidder messaged me and told me he would buy it right now for \$40.)

<https://hackforums.net/showthread.php?tid=4254360> (My Shisha Pen contest in which all you have to do to enter is wear our signature and post in the thread, and then we will chose a winner for two free disposable shisha pens of their choice.)

Why should we choose you over others?:

I am a very intuitive business man that loves marketing, and I am very good socially. I always make sure everyone's happy, even if that means I am not. I put a ton of effort into my products also, and love it when people leave a good review because that means I made a good product.

I feel like I would get along with everyone in Infamous because they're all generous and kind. They were one of the first groups I saw when I started HF, and they're still around today which is great!

I am on most of the day in the summer, then when school comes around I get on at night most of the time. I enjoy helping users because it makes me feel good.

Well, I hope you enjoyed me application. Thank you for opportunity!

Why should we choose you over others?:

Have no reason why you should choose me specifically. The decision is entirely up to you. I like socializing with others via Skype, and helping people by providing feedback. You can check out some of my RMG posts.

Thanks for reading.

Experiences in marketing, programming or designing: Programming (C/C++, Python, PHP)

[img]http://x.hackforums.net/uploads/ficons/infamousf.gif[/img]

Examples:

Skype bot source that's gotten somewhere around 1000 downloads. (I will be releasing version 3 soon)

Private stuff that I would show you if you really wanted to see.

Things I Am Interested In:

I figured I should probably share what sort of things interest me when it comes to programming. In no particular order:

Anything related to interacting with Skype

Creating databases for any sort of information

Creating reusable code that can be widely used by developers

Anything related to quickly searching for a result within a large set of data (think picking a result from a large data set in .23 seconds)

Writing secure code

Why should we choose you over others?:

I believe I am quite competent when it comes to programming, having worked on some pretty large projects. However, I'm also a very helpful person. I've helped countless HF members, as well as offsite people, for no charge at all, simply because I enjoy helping people, and working on programming projects. I am always adding to my programming knowledge, and I'm open to constructive criticism from anyone, because I believe being open minded is the key to learning. If I am selected, I will give everything my best effort, as that is all anyone can do. I do have a few projects that I absolutely will not work on (RAT, Crypter, Bot for botnet), so if that would immediately disqualify me from being selected, please let me know. Also, good luck to everyone who applies. Cheers,

Skyla

Edit: Fixed some typos, and formatting.

Edit2: Added my interests.

Six-Nine - June 3, 2014, 9:47 am

Name: Six-Nine here on Hackforums.

Timezone: I live in Sweden so my timezone is GMT +1.

Experiences in marketing, programming or designing: I run multiple products thats called "generators". I currently have a Remote desktop, Netflix, Minecraft and a Spotify generator. I am coding them and I am also handling the marketing for some of them.

I am also running Instinct SMS (coded by me).

I am not so experienced in designing but I'm experienced in Marketing and programming (VB.NET and some PHP and HTML).

I also run some bigger projects irl but thats nothing I want users here on HF to get involved in.

Examples:

[Remote Desktop Generator | Start Your Own RDP Shop | Accepting Omnicoin](#)
[NetFlix Generator | Start Your Own NetFlix Shop | Accepting Omnicoin 50% off Lifetime](#)
[Spotify Account Generator | Start your own shop today! | AUTOBUY |](#)
[Minecraft Account Generator | Start your own shop today! | AUTOBUY |](#)
[Instinct SMS Spoofer | Cheap and Secure | Starting at 10\\$/week | PP & BTC/LTC/OMC](#)

Why should we choose you over others?:

I am very active on Hackforums (about 8 hours every day) wich means that I can spend a lot of time in the group.

Designing - Designing is my one of my main skills, I've been doing graphics for 3+ years now, I love making graphics and designing and it's one of my passions. Here's a link to my portfolio: [Click Here](#)

Marketing - I've never really released any products or ebooks on HF before, I did however have a shop for Instagram and Twitter services named RoyalGram, it did pretty well but my Paypal got limited and I proceeded to junk it, however I'm very interested in learning new marketing tactics.

Why should we choose you over others?:

I believe you should choose me over others because of my dedication, every group I've been in on HF I've devoted a lot of time as well as my skills to that group; anything I'm told to do, will be done.

I will make it my one of my top priorities to help other members in Infamous and outside of Infamous as well with anything they need, whether it be graphics or just need to talk, I'll be there.

Thank you for taking the time to read my application and for giving me the honor of applying to Infamous.

Experiences in marketing, programming or designing: I have over three years of experience in Graphic Design.

Examples: <http://www.behance.net/SkylarEffects>, <http://www.behance.net/Nitrogized>

Why should we choose you over others?: I think everyone should have a fair chance.. However, there are advantages to having a specific member in Infamous. For me, I believe I can help out the group design wise. As mentioned before, I have over three years of experience in Graphic Design. That being said, I use programs such as Adobe™ Photoshop and Adobe™ Illustrator. Having such experience in these programs grant me the ability to be able to create anything! If I want to copy any type of PNG and turn into a PSD or a Photoshop template file, I have the skills to do so. My abilities in design are truly limitless. Give me a project and I'll have it done the next day. Designing isn't a job or a hobby, to me it's a lifestyle! I have so much to offer for Infamous when it comes to designing. I'm also learning to code VB.NET and C# which may come of use to Infamous in the future. Good luck to everyone else who enters!

Experiences in marketing, programming or designing:

... here we go :

- First of all, my real job is to help business getting more leads by improving their lead generation methods & strategies.

This is not a self-made title, I have followed French Business School and I passed Google University Certifications (Small & Middle Business Sale Process, Lead Generation Methods & Strategies, ...)

I can provide proof of this of course.

- I also handmade Landing Page that engage the audience. "Share to pay Landing pages" are my best-seller product. I sell them usually on Fiverr. I have made ~150\$ on Fiverr (Also can provide proofs)

- As a part of my creation of Landing Page, I made webdesign.

Can give you my certifications via Skype too :)

Why should we choose you over others?:

Because I have a cute blue-lion into my avatar ? ?

And because I really think I can share my knowledge, by writing ebooks and providing thread design :)

Please note : I have a wrning of 20%. The reason is simple, I opened a thread in the wrong part of the forum ... (See reason here : <https://hackforums.net/showthread.php?tid=4266801>)

Hackforums has a great marketplace and I try to take advantage of this as much as possible. Just by taking a quick peek through my threads one can tell that I sell multiple products/services on Hackforums, this is my only income as I have no real life job. I speak fluent English of course as it is necessary for such an activity. From experience I have learned great techniques which will result in a massive increase in sales which I won't be revealing by the way. I believe I am a true wise marketer as I am proud to say that my online monetizing keeps me from going to have to work in real life. I cannot ask for anything more.

Why should we choose you over others?:

I am a chill hard working internet addict with great marketing and business skills and I'm sure you would not regret having me in this group. I am a very active user and I am very dedicated in what I do. I'm on literally 24/7 except when I am asleep as I also post from my phone when I'm out.

Experiences in Marketing: This is less of an experience list than it is a story. It defines my devotion and will set me above other applicants as you may be able to relate.

I may not have as much experience as the next guy but I can guarantee I'd be a better fit.

Countless times I see a member have an 'exposed' thread open against them which not only effects that person's reputation but their groups, too. I hold a high care and level of quality when dealing on this site as if I am not representing myself but a business. I have an incredible reputation in the E-Whoring section which isn't only the section I have the most posts in but the section which I sell products in. I noticed an opportunity to put my true business skills to the test providing multiple quality products as well as innovation and support which truly lasts a life time. I'm not a shady 1980's car salesman, if someone has a problem with me or my product, I'll make sure to solve it as quickly and friendly as possible. I've come to find a good customer relationship will result in more profits for yourself.

As far as the story, I tried my hardest to earn money. I was focusing more on gaming then everything since the age of 10, I was afraid to get a job and my parents disliked the fact of me getting a job because they wanted me to have 'fun'. I tried making money online by sparking creativity and observing what people needed and applying them with a quick and clean transaction. My first form of Online money was a 'PSN Trophy Hacking Shop' which pocketed me \$100 (USD) in a little under 1-3 weeks. For someone who was begging for \$2 (USD), that was amazing. I bought myself a pair of gloves and the pride reigned through me.

I stopped doing the trophies and drifted onto HF. I started up a 'MLG free wins shop' which pocketed me a peasantry amount of \$17 (CAD). I worked so damn hard, two days into sales which were doing pretty good I was banned from Gamebattles. I tried making other Ebooks, selling products keys, and digital goods on Ebay. Made next to no money which is when I resorted to E-Whoring. I knew a friend who did it, he encouraged me. I made \$700 (USD) in one month and decided to create an Ebook. One week made me \$50 (USD) and I lunged with a risky but beneficial decision of buying a sticky. \$250 (USD) the next week, I was hooked.

I am a good fit, I can represent your group name and brand better than the others. I guarantee you'll never hear a complaint about my business and others like myself (entrepreneurs) can profit off of me.

Examples: Note: I've had multiple sales threads but i'll post my two most successful and recent.

<https://hackforums.net/showthread.php?tid=4246569>

Currency Exchange; closed down to losing \$210 (USD) in one week.

<https://hackforums.net/showthread.php?tid=4116659>

E-Whoring Shop; Ebooks, Voice Commands, VCWs, Spammers etc.

Why you should choose me over others: I can represent your brand in a positive matter, I won't be a skid and ruin its high reputation by causing unnecessary bullshit to arise that questions its stature. I'm a low key member, haven't done anything large and noticeable (besides in my respective sections) but I am more worthy than you'd think.

The reason to my success is I am not just a businessman, I incorporate my true personality into business which has been exploited but 9.9/10 of my customers and other forum members will tell you I'm nice, respective, and just a trill motherfucker! :D

Every obstacle I've overcome, especially when it's evolved around online monetizing. I'm persistent, dedicated, brilliant, and hopefully the next member of infamous! :D

If you're wondering why I've been AFK, I've been updating the Ebook and working on getting a new VCW. Making money on the side, of course! ;)
