Before download the stealer, read below please.

ONLY ONE RULE:

DO NOT use the stealer to take informations of forum users. ?

What is a stealer?

A stealer is a software that when the victim open it, all passwords,emails,accounts steam/skype, ALL, are sent to the hacker.

How can I make the stealer undetectable?

Use a crypter, you can found one in the forum, just search a little.

You can also change the icon and name of the stealer to make him not suspicious by the victim.

THE STEALER DOWNLOAD:

Stealer: I WILL REPOST THE LINK

Scan: I WILL REPOST THE LINK

STEPS:

1) Enter your email adress (you can make a new email adress if you want) and all the logs of the victim will be sent to you.

2) enter your password email.

3) click on the square if you want just receive one time the logs.

4)here you can change the icon of the stealer and make him not suspicious by the victim.

5) to make sure that your email is valid.

6) the stealer will be create, you can now use it and crypt/bind the software.

Good hack guys ?
