Thread: [Review Service By BoX.](#)

BoX. - June 2, 2014, 4:46 am

Hey guys, I'm posting this thread in the hope it'll be of use to some people needing a review done for the products they may be offering. There are quite a few of these services out there already, so I hope I don't offend anyone by creating another. I'd like to start this up also to build a better name for myself here on HF. So, lets get started.

So far, these are the reviews I have done that you can use as reference as to whether you'd like me to review anything for you or not.

These are some of the vouches I've left for products that aren't eBooks.

I will use the same structure as I have done in the links above. If you would like anything else to be added, just let me know. Hopefully my reviews will become better with practice.

I will update this thread with any new reviews that I do, and also create a better structure if anything I do is not up to standard. This is the first ever service that I'm offering, so I will try my best to make it a good one. I will keep the reviews on topic and review them as thoroughly as I can.

Thanks :)

User gave my e-book an awesome review, it was very HQ, and it covered a lot of important points that aren't normally included in your standard review. A big vouch for BoX. - he's a legit user, and his reviews are top notch!

BoX sent me a PM regarding my E-book and how he would like to take my last review copy. I gladly handed it over and It was one of the nicest reviews I've seen, before he made it he pointed out some mistakes I made so I can fix them before he posted the review. Really mature and trusted dude.

Fizzie - June 9, 2014, 1:25 pm

Very high quality review service that Box has here. Any eBook seller should not hesitate to let this fellow write a review for your book. Box has my vouch.

Krew - June 9, 2014, 1:26 pm

Your reviews look very well written. I will contact you when I get some new products to sell.

Kagetane wanted his first sales thread to have positive comments, so I helped him out a bit before giving him a review ? Thanks for the feedback man, I appreciate it :)

This is not grave digging as the OP wants to start up his review service once again and I assume he'll be using this topic.

Box. recently reviewed my eBook, you can see his review here:
<https://hackforums.net/showthread.php?tid=4545396&pid=43423467#pid43423467> As you can see he left a honest and HQ review.

I vouch for his service, do not hesitate to allow Box. to review your future eBooks.

How would you feel about doing a review of Pulse Servers, my server hosting company?

I'll give you a coupon code that you can use to get one of our powerful server deployed with the first month free.

You can keep the server after you've done the review, too. You may as well get something out of it for your time.

Thanks for the feedback buddy, I'm glad you liked the service.

And yes, I am thinking about starting this up again. I don't have a lot of time on my hands nowadays, but I can certainly do a few every week.

We spoke about this over PM. Unfortunately I didn't feel like I had enough experience with servers to do a decent review.

I'm thinking about getting a thread design for this too, to make it look a little more professional.
